Which one is best and why?

chivien - January 25, 2010, 3:20 pm

Well .. I believe Dio Brando is the best ? ...

CYBERGATE IS THE BEST ITS THAT SIMPLE.

Verdande - January 25, 2010, 3:21 pm

had bad experience with all of them

seeaaaaannn - January 25, 2010, 3:34 pm

I just want one good one please anyone?

CyberGate is the best, just use it right

Widow's Peak - January 25, 2010, 3:36 pm

Cybergate has client problems, BAD. Cerberus is more unstable when it comes to the server side, but I haven't noticed it, also with Cerberus the features work very nicely. Spy net is what Cybergate was made from..its okay, but I haven't really been able to tell that much about it.

I use CyberGate and have personally not had problems with it. It does what I want it to do. Cerberus is unstable and your servers will randomly disappear.

Never used Spy-Net, so my vote is CyberGate.

On Cybergate I had terrible client problems. It might just be me on Win 7

cybergate has client problems like if you have alot they disspear but if you re open they come back so deffttlllyyy cybergate.

seeaaaaannn - January 25, 2010, 3:52 pm

Ok fuck this. I went form Cyber-Gate to Cerebreus, to Net-Spy. BACK TO CYBER-GATE I GO!

seeaaaaannn - January 26, 2010, 6:53 pm

Ok, I switched back. Having no problems at all, but I think someone sent me a virus -.-

I have both, spy-net 2.7 and cybergate 1.04.8 and i can say Cybergate is better:

stable

most of the function work well

server stable

Cybergate is the best my friend

If you want a free one lol

UniqueX - May 3, 2010, 7:26 pm

Cyber Gate is a good one from my personal view
