Thread: [\[100% autopilot\] \\$.16/day with #!\[AUTOPILOT\]](#)

Daddy. - May 6, 2012, 1:43 pm

So before we start, here is proof that I make ~\$.16/day with # without doing a single thing.

I earn this while I sleep/eat/work or whatever I do that does not involve a computer...

NOTE: I am not saying to rely on this but autopilot money is free money... so why not have it?

How I do it: I have a blog! (Look in the signature picture if you want to see it) I give free, NO SURVEY, links which right away gets peoples attention right away! I include a survey link if people want to do one for me :P

I have 14 posts and thats the only thing that gets me that!

no bots or anything is used

Sorry if this is really confusing to read... Post or pm me if you need help with this because I think most of you are going to flame me for the grammar...

You get around \$.50 using LifeTimeShares. ?

That's a great idea , non survey links because no - one downloads those.
