Thread: [\[HF Userscript \] RepsGiven.php Fix \[V 1.0.0 \] \[UB3R+ ONLY \]](#)

DeNy - May 7, 2012, 4:28 pm

I put UB3R+ ONLY in the title since this would only be useful to anyone using an upgraded account past the L33T upgrade. This includes ub3r, mentor, moderator, staff, and admin.

What this script does: This script fixes an error on the repsgiven.php page. This error causes the lack of the ability to view only positive, negative, and neutral reputations given by a user.

How to install: I recommend Firefox with the Greasemonkey extension or Google Chrome.

Firefox: <http://userscripts.org/about/installing>

Opera: <http://www.howtogeek.com/howto/3986/set-up-user-scripts-in-opera-browser/>

Internet Explorer:

<http://www.ghacks.net/2008/11/16/install-greasemonkey-scripts-in-internet-explorer/>

Google Chrome / Chromium: Install [TamperMonkey](#) from the Chrome Web Store. Then follow the instructions for installing under FireFox.

Script: <http://userscripts.org/scripts/show/132741>

Any feedback, just as long as it's constructive, is welcome! :D

Hmm..

I have no rep, I will download it for use to when I do.

Glassy - May 7, 2012, 4:30 pm

Seems like something that will be useful for many. :)

ROI - May 7, 2012, 4:31 pm

I noticed this flaw a while back, and I was too lazy to report it because I didn't know if people already knew about it. It actually pissed me off, and this should be a nice fix. Thanks for this.

Burn™ - May 7, 2012, 4:33 pm

Dude this is awesome <3

Thank you so much :D

Dan. - May 7, 2012, 4:33 pm

This will only be useful for Ub3r and up. L33ts can't see reps given.

Tarn - May 7, 2012, 4:34 pm

Thank you so so so much for this! I have been dying see that get fixed!

Ah, thought l33t could see their own repsgiven page. Oh well. I'll fix that. :)

Sol Yurick - May 7, 2012, 4:40 pm

Seems like a quick easy fix, that is useful :).

Anyny0 - May 7, 2012, 4:52 pm

Nice add on :)

I downloaded it, this is a nice fix.

_DeNy - May 8, 2012, 7:18 am

Thanks for the feedback everyone. If it doesn't work you, let me know ASAP.

Hug. - May 8, 2012, 7:50 am

Looks amazing, going to try it now. Thanks a lot!

Techie??? - May 8, 2012, 8:16 am

Did you notice this crashes HF tabs in Chrome?

Nice fix though.

What version of chrome are I using?

I made this on chrome, so it sounds like a personal issue.

This is pretty damn useful. I sent you some feedback on the script by PM. Thanks for sharing this, I'm now officially using it. :)

This doesn't work for me mate. I still get reputation.php instead of repsgiven.php.

What browser are you using?
Are you sure you installed it properly?

Mr Kewl - June 26, 2012, 1:57 am

Using on Firefox, obviously I've been using userscripts since 2009.

What version of the userscript are you using?

What version of FireFox are you using?

Are you using any other userscripts?

Are you viewing the repsgiven page or reputation page?

Your description has me confused.

What error are you fixing? I can't even realize what this script does with this description ?

The lack of ability to only view positive negative and neutral? Isn't that the only types of reps you can give?

BigG - June 26, 2012, 5:35 pm

I still don't understand what this does.

Go to hackforums.net/repsgiven.php?uid=47962

Click on the numbers next to "positive", "neutral", or "negative".

You will see that it takes you back to reputation.php instead of keeping you on repsgiven.php.

That's what this fixes.
