Thread: [\[Tutorial\] How to setup Blackshades Stealth \[RAT\]](#)

Cubee - May 9, 2012, 5:26 pm

[img]http://i.minus.com/ibhTVSgbCHwbF4.png[/img]

To start with you need to add it to your products.

Sign up on <http://bshades.eu/> then go to UserCP > Add New Product > Add Stealth

When your done with that you need to sign up for a DNS if you don't already have one.

Go to <http://www.no-ip.com/> > Sign Up > Add a Host > Select a host name and take the extension no-ip.biz > Create Host

Then you need to download DUC you can do that here: <https://www.no-ip.com/downloads.php>

Then login to DUC > Select Hosts > Select your host > Refresh Now

When your done with that go back to back to <http://bshades.eu/> > Add Products > Download Blackshades Stealth

When your done with the following steps startup Stealth > Settings > Enter your port > Active > Save

Spoiler [\(Click to View\)](#)[img]http://i.minus.com/ibb51mE3Y5RiLx.PNG[/img]

When your done with that go back to <http://bshades.eu/> > My Products > Build Stealth

Here you need to configure your binary.

Code IP/DNS: Your NO-IP DNS Hostname

Port: The port your using

Filename: The file name you want.

ID: The ID you want it to show up in Stealth

Password: Your encryption key

Startup value: Your startup path

Keylog name: The keylog name Spoiler [\(Click to View\)](#)

[img]http://i.minus.com/iYAALuAE1GXzQ.PNG[/img]

You can find your password/encryption key under Settings > Basic > Encryption Key

When you filled out all information compile your bin crypt it and your ready to go!

I tried allot of crypters, Non have corrupted the binary so most should work fine.

How to Download & Execute: Right click on the connection > Commands > Download & Execute > Enter your direct link > Ok

Spoiler [\(Click to View\)](#)[img]http://i.minus.com/i3rJDefYnxvwQ.PNG[/img]

How to Uninstall a connection: Right click on the connection > Maintenance > Uninstall > Yes

Spoiler [\(Click to View\)](#)[img]http://i.minus.com/iD0ddKF3sYKmc.PNG[/img]

That's pretty much all you need to know about Stealth, The rest will you figure out by yourself for

sure. I have noticed that it's extremely stable when it's comes to holding connections.

Rourke - May 9, 2012, 5:59 pm

Very nice tutorial.

Stealth is a cool thing when you get down to it. Ability for use on a mac :)

Another good thing is the fact that you have to own it to be able to make a server, mwahahaha.

Cubee - May 9, 2012, 6:05 pm

Yeah it's pretty cool, Yeah it's pretty good. The crackers can stay off.

Tutelary - May 9, 2012, 6:10 pm

Excellent tutorial. Very informative and easy to read. (May 9, 2012 06:05 PM)Cubee Wrote: [\[CITE\]](#)

The crackers can stay off.

They'll find a way, they almost always do.

douchebag - May 9, 2012, 8:18 pm

Nice tutorial, Will help many newbies. :)

Advanced - May 9, 2012, 8:35 pm

Well done Cubee, didn't expect more! :)

Jinu - May 9, 2012, 9:26 pm

It's very nice tutorial. Neatly described :)

Cubee - May 9, 2012, 9:31 pm

Thanks for the positive feedback, It's a easy tutorial but I haven't seen a Stealth tut yet so I did this one.

Flayer - May 10, 2012, 12:16 am

Are they the only options in stealth or are there more?

Anyway , nice tutorial, might think of buying it.

Skiezo™ - May 10, 2012, 1:01 am

Very nice Cubee, You did a good job on making this tutorial

Noob friendly / Pictures / Knowledge

10/10

Stev - May 10, 2012, 1:47 am

So this is the well known, coded in Java, Blackshades Stealth RAT.

Never seen it before, thank you for the tutorial I might try it out.

Are the outputs FUD/UD when building?

D4rk_Leg3nd - May 11, 2012, 1:04 am

I can't register fully on your site, it won't sent me the activation code in my email... Can you help please?

xTechnique - May 11, 2012, 1:17 am

Nice tutorial Cubee, very neat and informative.

Sir Cyrano - May 11, 2012, 3:50 am

Well done Cubee, didn't expect more! :)

No they are not they are like 7/37. But most crypters FUD it easy.

Zalg0 - May 11, 2012, 5:53 am

This is an HQ tutorial for sure! To bad i dont own Blackshades Stealth :).

Is it really worth it? And why should i get it?

Except for supporting the makers.

Cubee - May 11, 2012, 5:56 am

It's not a HQ tutorial it's only basic steps since I didn't find anyone. But thanks I guess.

I think it's worth it since you can run it on mac's and that's always good if you need it sometimes, And from that it is extremely stable. Also really easy to crypt it I will be suprised if you corrupt any problems. It's also faster streaming the all other RAT's.

Lil Uzi Vert? - May 11, 2012, 6:53 am

You can't infect MACs with Blackshades Stealth. Only the client is coded in Java meaning only your slaves can controlled from a MAC. The output is coded in C and is an .exe file which will not infect a mac.

Cubee - May 11, 2012, 7:30 am

I know your fully right, I'm just really tired. I think I writed similar things like ten times before, ???

Carb0n F1ber - May 12, 2012, 2:48 pm

Thanks for this tutorial. I don't own the product, and as staff, I found it hard to support some customers. However, this will come in handy now ?

Cubee - May 16, 2012, 5:32 pm

any one who can help me to setup and run RAT i will pay for it give me the price you ask for everything has to be setup b

What rat is it you need setup help with?

Une - May 16, 2012, 5:41 pm

almost evrithing i have try to setup it but dos not look lik work for me :) some sql things and wht ever i need from A to ZH setup

ThinkThinkorThink - May 16, 2012, 5:45 pm

Very nice tutorial you got there. I personally don't own that client but it'll be useful to help people out. I thank you buddy for all your HQ posts. I tip my hat to you sir. ?

blackopec12 - May 30, 2012, 6:19 pm

saving up for stealth as we speak, however i do have 1 concern, i noticed under the "commands" there wasnt many options, i was under the assumption that it included with it a key logger, etc. does it?

thx for the tut, will be using soon.

blackopec12 - June 2, 2012, 4:33 pm

I've purchased stealth and got it working with much success,
The application is slightly limited on features at the moment but I cant wait to see the future of:

GFX BY: Blackopec12

TheDulki - June 4, 2012, 1:40 am

Thanks for sharing this tutorial :-)

PMCWorlds - July 9, 2012, 6:59 pm

Can Blackshades Stealth send DDoS attacks?

SpaceForMore - July 10, 2012, 6:06 am

(May 9, 2012 05:26 PM)Cubee Wrote: [\[CITE\]](#) [img]http://i.minus.com/ibhTVSgbCHwbF4.png[/img]

When your done with the following steps startup Stealth > Settings > Enter your port > Active > Save

Spoiler [\(Click to View\)](#)[img]http://i.minus.com/ibb51mE3Y5RiLx.PNG[/img]

When your done with that go back to <http://bshades.eu/> > My Products > Build Stealth
Firstly, when you say 'Enter your port', how do i know what my port is?

And secondly, i can't see the 'Build Stealth' option anywhere under My Products. Please get back to me!

Rajat - July 10, 2012, 7:14 am

It's very nice tutorial. Neatly described :)

husky141 - July 10, 2012, 8:39 pm

cool, i bookmarked this for when i can buy this rat :)

coreycatfinder - July 11, 2012, 4:27 pm

This is a good tut, i liked it, very informative

Buzzle - July 11, 2012, 4:55 pm

There is alot of peaple doing this on hackforums for free =P Anyways nice tutorial! :D

PMCWorlds - July 17, 2012, 5:49 pm

does this have a key logger? it says it does on bshades.eu but I've never seen it.

Plzsitdown - July 21, 2012, 4:02 pm

I need someone that knows how to work Stealth and the download and execute buttons works for them. PM me please

Delete Me - July 24, 2012, 6:44 am

(Jul 10, 2012 06:06 AM)SpaceForMore Wrote: [\[CITE\]](#) Firstly, when you say 'Enter your port', how do I know what my port is?

And secondly, I can't see the 'Build Stealth' option anywhere under My Products. Please get back to me!

1, You enter the port that you have forwarded.

2, It should be there. If it's really not there you should submit a ticket on their site.

SANTERMY - September 15, 2012, 4:03 pm

Excellent tutorial. Very informative and easy to read. :)

yellow submarine - September 20, 2012, 5:45 am

Hello, I need some help setting my RAT up (blackshades stealth) I think I have done all of the steps correctly but when the file is clicked it does not show up on the RAT, thanks.

Clarence Boddicker - October 17, 2012, 7:51 am

hi I've just purchased this RAT I cannot create a login on bshades.eu there is nowhere on the site to do this? and I cannot PM anyone as I don't have enough forum posts!

raphh - October 17, 2012, 1:13 pm

Thanks brother I will try this tutorial :)

mars030511 - October 18, 2012, 12:02 am

I will try this out later thanks for sharing :D

wanzcompany - October 18, 2012, 7:19 am

I will try this out later thanks for sharing :D

Raz Riverblade - October 18, 2012, 8:52 am

backdoored software. just sayin'

no offence OP, still a good tut.

dujac - October 23, 2012, 10:49 pm

I have done all of this so far, so to infect a person.. they just dl the file or..

stamp3me - December 10, 2012, 7:07 am

Nice! now I just have to get a good crypter.. any suggestions?

BlackGoblin - January 1, 2013, 12:31 am

hey can someone help me out? I got all this working but I don't know how to give the RAT to other people. Please help.

Fixx - January 29, 2013, 11:34 pm

Nice tutorial was very helpful with setting up my blackshades rat thankyou very much.

titopuente10 - *February 28, 2013, 11:38 pm*

This is a great tutorial. Thank you very much!!

monali - *October 14, 2013, 3:42 pm*

after I download my stealth and try running it, it shows only the logo and nothing else. Please advise on what to do.

Bewbs - *October 14, 2013, 3:43 pm*

Very nice and detailed tutorial.

Thanks for sharing it with us!
