VOUCHES

Spoiler [\(Click to View\)](#)

(Oct 10, 2012 08:32 AM)Drayk Wrote: [\[CITE\]](#) I'm really positive about this piece of software so far, it's working flawless +Vouch.

(Sep 29, 2012 01:06 PM)imss_amante Wrote: [\[CITE\]](#) I just bought ClientMesh a couple of days ago and am loving it! It's working great, seems stable so far and has lots of features.

(May 3, 2012 07:05 PM)CyberProdigy Wrote: [\[CITE\]](#) I was able to determine that this RAT is...

FANTASTIC.

It really is. The screen capture is fantastic, the GUI is simple, easy to navigate, and sexy as hell. The webcam capture is amazing, and the layout and logic of this RAT is incredible.

(Aug 20, 2012 06:11 AM)SkyRider Wrote: [\[CITE\]](#) had this 1 year and is stable as fuck. great support to. i reformatted and lost everything and Modesty got me back up and running in 2 mins thanks bro

(Mar 7, 2011 04:51 AM)MsAH Wrote: [\[CITE\]](#) This RAT works great . Love it :3

(Nov 13, 2011 06:24 PM)jorje2008 Wrote: [\[CITE\]](#) Vouch for this awesome product and support. I am extremely satisfied !

The support is very fast and really nice.

(Nov 16, 2011 03:01 PM)m4kia Wrote: [\[CITE\]](#) I have to honestly vouch for this guy !!

This product is great, i had a problem cause i didn't put the right setting,

He came 10 mins after on TV put the right setting and now it work like a charm !!

Support is AWESOME guyz !! Just buy this before he raise the price !!

(Aug 22, 2012 04:14 PM)?Caillou Wrote: [\[CITE\]](#) Vouch! Sent me the updated copy for clientmesh, I totally suggest this rat!

(Nov 13, 2011 12:07 PM)Adzz Wrote: [\[CITE\]](#) Ive got it and it works like a fucking BEAUT! i actually think this is a must buy and one of the best rats on the HF market!

<3

Adzz

(May 13, 2012 03:44 PM)Monsey Wrote: [\[CITE\]](#) Amazing rat, totally blew me away when i could hold 200 connections so stable! :D

Big vouch

Also Modesty will be back soon :)

(May 24, 2012 06:12 AM)Twitterr Wrote: [\[CITE\]](#) Vouch for this RAT, also to Modesty amazing support..

(May 24, 2012 06:07 AM)Simegu Wrote: [\[CITE\]](#) Great support and great client thanks alot modesty :D

(May 28, 2012 06:43 AM)Cape Wrote: [\[CITE\]](#) Vouch for Modesty & ClientMesh RAT

nice RAT ever and worth money.

Good Luck on sales. xD

(May 28, 2012 04:49 PM)#cn Wrote: [\[CITE\]](#) Vouch for stability

~250 is all this mobile connection can handle right now, this laptop's specs are pretty pathetic too.

(May 31, 2012 01:29 PM)Monsey Wrote: [\[CITE\]](#) I just bought this, and it's superb! It's only getting better and better! Keep up the work Modesty

(Jun 1, 2012 10:56 AM)lilo Wrote: [\[CITE\]](#) This is already a good RAT.

(Jun 14, 2012 09:48 AM)SkyRider Wrote: [\[CITE\]](#) just bought this and its dam nice ?

(Nov 23, 2011 06:49 AM)Wre©ked Wrote: [\[CITE\]](#) Vouch for this product it works great! Amazing work!!

(Dec 2, 2011 04:29 PM)iKush Wrote: [\[CITE\]](#) Vouch

This user is fast with his sells and awsome with his post thanks man

(Dec 5, 2011 04:03 AM)P4NIC Wrote: [\[CITE\]](#) works perfect for me thanks for this wonderful RAT

(Dec 12, 2011 03:19 PM)Mr. CEO™ Wrote: [\[CITE\]](#) Definitely!! ?

Keep up the good work Modesty, I haven't played around with it much yet but I will in a few hours. Looks like a solid piece of software!

(Dec 18, 2011 12:46 PM)Baird Wrote: [\[CITE\]](#) Vouch for Modesty, come on my PC and set this up for me..works great!

Also great price and shits all over blackshades.

Thankyou very much

Would also like to add the support it incredible, buy at this great price!

(Dec 18, 2011 05:21 PM)Đark Wizard Wrote: [\[CITE\]](#) Hey Modesty!

Just wanted to leave some kind words from a satisfied customer. The ClientMesh RAT is working really good for me. Your dedication to the project is amazing, thank you for a nice product. Keep up the good work!

(Dec 19, 2011 08:38 PM)Baird Wrote: [\[CITE\]](#) Modesty really takes care of his customers, he's a great owner..I feel lucky to buy this from him.

(Dec 22, 2011 05:21 PM)XBOx Wrote: [\[CITE\]](#) Just purchased, setup was incredibly easy with the help of Converto. He was more than happy to help. No port forwarding is a blessing because I can't on my computer. Have a few bots already and everything is working great! Love this RAT! And for the price it's a steal. I would purchase this over BS any day because it's sleek, easy, and effective. Thanks!

(Dec 23, 2011 05:34 AM)echapp Wrote: [\[CITE\]](#) I recommend you guys to buy this....

Good Rat and Good Support,

Goodluck guys

(Dec 22, 2011 10:39 PM)Baird Wrote: [\[CITE\]](#) Vouch this product, great support from the ClientMash crew.

Best RAT I have ever seen..coder dedicated to his work, I love you.

(Dec 27, 2011 04:37 PM)Diabolic Wrote: [\[CITE\]](#) This is an amazing RAT, you should definitely buy.

(Jan 8, 2012 07:17 PM)Quizzical Wrote: [\[CITE\]](#) Damn dude, this looks like an amazing RAT, I think its personally better then Blackshades as it stands now. :)

(Jan 10, 2012 04:17 PM)Baird Wrote: [\[CITE\]](#) Vouch Modesty, you should all buy this.

Without doubt the best RAT there is.

(Jan 11, 2012 01:56 PM)iKorkSkalle Wrote: [\[CITE\]](#) I vouch big time for this rat!

The support is the best, and Modesty is a really nice guy!

Aiiight

(Feb 1, 2012 02:38 PM)Gold Hat Wrote: [\[CITE\]](#) Bought this today , took us 20 minutes to make everything done !! Great service and a Great RAT !!

(Feb 21, 2012 10:11 AM)unix2 Wrote: [\[CITE\]](#) ohh i suggest everyone buys this rat. The inbuilt crypter is 1/37 and is very good!

(Mar 4, 2012 12:53 AM)1337 is leet Wrote: [\[CITE\]](#) Bump for this! I own this RAT pretty good lol

(Mar 6, 2012 06:50 PM)theguybro Wrote: [\[CITE\]](#) Vouch, just got this. Very nice RAT. DNB helped me set up. It has a very professional feel to it. Thanks a lot for this great product!

(Mar 12, 2012 04:41 PM)Jinxxy Wrote: [\[CITE\]](#) The RAT is very, very good. I really like it, the things you can do with your connections is just all great.

(Mar 24, 2012 08:20 AM)Baird Wrote: [\[CITE\]](#) Is a very good RAT would recommend to all.

(Dec 27, 2010 10:13 AM)Jinxxy Wrote: [\[CITE\]](#) By far the best RAT in my opinion.

(Dec 27, 2010 01:08 PM)mrroxi Wrote: [\[CITE\]](#) just au-some :D

so fast and such good shit :D

would recommend

(Dec 28, 2010 04:18 PM)Jinxxy Wrote: [\[CITE\]](#) After buying this product, I would like to make a nice little review of it.

Support: First of all, let's talk about support. The support for this product is absolutely amazing, with professional help from the maker himself. He knows what he's doing, and helps no matter how long it takes.

Connections: The connections tab is simply extraordinary. The features and abilities you can do with your clients is an ongoing list, and there are many more to come. The speed at which clients connect to your server is astonishing. Normally, it took me 2-3 minutes to load all of my clients. But now, it takes less than 20 seconds to load them.

View All: Viewing all of the screens of your clients is a feature I have not seen on any RAT I have used in the past. It shows the screen of your clients, with a scroll down to see the rest. It's a great feature that can ease your lookthrough if your looking for something specific.

Configuration: The configuration of this RAT is very easy to setup, yet has alot of options. All in one tab, you can decide what your ports are, DNS options, and what it should fully connect to.

Create Client: This is one of the best "create a client" features I have seen in my history of RATs. After Albertino, Blackshades, and TitonicRAT, this is probably the nicest and easiest to use menu to create your client. It has options like making a fake message, startup, giving fake credentials, setting fake product information, ect.

Network: The network tab is really nice when your trying to see what people connected when, what kind of commands you executed, and the types of encrypted data it sets. Really nice addon.

Download Queue: This feature appends files to a download queue from download manager. You can put 5 files from the file manager to the download queue to go to another client.

UPnP: This is a really nice feature for those who just don't want to waste time port forwarding. This little option allows you to set up a port with port mapping, and therefore it opens the ports automatically.

Send Mass Commands: The mass commands feature is really nice for advertising, playing a prank, or simply wanting to do a mass command to all of your clients. You have options like sending messages to them, downloading a link from a URL and uploading it, controlling system functions like log off, shut off, or restart, and updating your clients from a URL.

Notes: This tab is probably the tab I like most. You can write personal notes about each of your clients, and save them to this tab. You can open them at any time you want, and you can view them that way too.

All in all, I give this RAT a 9/10 because I simply find it superb in all ways. Once updates persist, like a crypter, a webcam, etc. (definatly in the next few updates), it will go to a perfect 10/10.

VOUCH FOR P Y R O, ONE OF THE BEST RATs I'VE DEALT WITH.

(Dec 29, 2010 04:44 AM)dude2k Wrote: [\[CITE\]](#) thanks for the fast delivery..everything went fine,nice contact and seem to be good supported software(That is not always so on HF;-))

(Dec 29, 2010 07:50 PM)Jinxyy Wrote: [\[CITE\]](#) Great rat, love how it's detected by 1 engine. PYRO, what makes it so undetectable without a crypter?

(Dec 29, 2010 09:26 PM)nestt Wrote: [\[CITE\]](#) Great RAT!

I'm very happy with this RAT. Looks pretty, stable, and fast. I want to thanks the coder his work and good job!

I recommend to all customers to buy now, before prices go high, because this is a great tool :)

Thanks!

(Dec 30, 2010 12:31 PM)Spinningtop5 Wrote: [\[CITE\]](#) This program is excellent, and so is the support, in fact im talking to P Y R O right now about the program ?

(Dec 31, 2010 05:47 PM)iRtehLeet™ Wrote: [\[CITE\]](#) I agree. The best RAT on the market in HackForums history lies in this thread. This RAT is extremely easy to crypt.

(Jan 1, 2011 01:45 AM)warhacker Wrote: [\[CITE\]](#) This by far the best RAT.

(Jan 1, 2011 06:36 AM)Radino321 Wrote: [\[CITE\]](#) great product , great support, great price

(Jan 1, 2011 08:36 PM)narutorine Wrote: [\[CITE\]](#) :) Epic RAT

(Jan 3, 2011 05:16 AM)Jinxyy Wrote: [\[CITE\]](#) Everything works with me great. I ha the same problems with my victims, and then PYRO came and fixed it all for me.

(Jan 8, 2011 09:37 PM)_JackLivesHere_ Wrote: [\[CITE\]](#) Good rat, Im happy I bought it

Looking forward to the update

(Jan 9, 2011 10:25 AM)C???????l Wrote: [\[CITE\]](#) That's an extreamly sexy rat :3

Very nice!!

(Jan 30, 2011 11:19 AM)georgio Wrote: [\[CITE\]](#) THIS IS A MUST GUYS!

FUCK Blackshades, GO FOR CLIENTMESH ;)

VOUCH VOUCH again for this guy xd

(Feb 1, 2011 08:25 PM)narutorine Wrote: [\[CITE\]](#) EPIC RAT Now I get alot of people on :DDD I love it pyro epic coder.

(Feb 3, 2011 12:33 PM)etomaniak Wrote: [\[CITE\]](#) Vouch for PYRO. Buy tris RAT few minutes ago. All works fine.And great support by MSN.

(Feb 5, 2011 01:08 PM)Risheng Wrote: [\[CITE\]](#) Alright, I bought it yesterday and it's a pretty good RAT.

I like the inbuilt crypter but you should make an option to use the inbuilt crypter or not. Because if we have our own private crypter (or a private one), it is not good to crypt an already crypted file, it causes crash. :)

Also, you should put more options to your crypter like persistance, melt file, bind file, etc.

Client Mesh is actually a good RAT, but it can be the BEST if you add a lot more features. It's a "simple" RAT FOR NOW.

This RAT has a seriously huge pentential, now GOGO PYRO. <3

Edit : Also I forgot, VOUCH for PYRO.

(Feb 5, 2011 01:25 PM)00v6 Wrote: [\[CITE\]](#) Awesome seller; very accommodating, very helpful, and has a quality product. Vouch!

(Feb 26, 2011 04:46 PM)Anvio Wrote: [\[CITE\]](#) I bought this RAT yesterday and I gotta admit it's pretty damn good, I am pretty anxious for the new update!

(Feb 27, 2011 05:31 PM)reese8468 Wrote: [\[CITE\]](#) just bought it good job guy love this

(Mar 1, 2011 01:09 PM)Xupack Wrote: [\[CITE\]](#) Thanks for Modesty he is a great support :). He figured out my problem with ports and my ClientMesh is now working alright ++++

(Mar 3, 2011 04:44 AM)Spinningtop5 Wrote: [\[CITE\]](#) ~UPDATE~

I've been using this for awhile and it was O-K but its VERY Stable and has a great support team with features being updated all the time.

I will be making a TUT on how to set this up/use it :D

IMPORTANT

When buying, you'll need to provide your Hardware ID which is a unique ID of your PC that will make your license valid when you run the product. In order to get your Hardware ID, you can download a tool we have made here (image below). You need to then run the tool, and it will provide

you with your Hardware ID as shown below. The use of the Hardware ID means that only you will only be able to access and manage your connected clients on one PC; however, if you ever want to manage your connected clients from another PC, you can change your Hardware ID to the other PC's Hardware ID using the supplied web panel. IF you encounter an error during this process, please leave the HWID field blank during the order and it can be resolved afterwards.

[IMG]<http://clientmesh.com/images/hwid.png>[/IMG]

AFTER PURCHASE

Once you have bought ClientMesh, a confirmation email will be sent to with a download link to the product itself. Since we check all orders manually and create accounts manually to prevent fraud and to prevent any mechanical errors that could occur, it may take up to 24 hours for your account to be activated. You will be kept informed of the progress of your account activation, and you will receive a final email when it is complete with a generated username and the password you specified when making the order. From then onwards, you may start up ClientMesh and log in with your credentials. Please read the "ReadMe" file provided with the purchase before running the application. You will also be provided an online panel where you may change your Hardware ID (limited to once per 24 hours) so that you can use the application itself on other PCs.

Please read our Terms of Use at: <http://www.clientmesh.com/members/TOU.html> . Any misuse of this application WILL result in termination of license AND appropriate authorities WILL be contacted. This involves illegal activity, reverse engineering and more.

REFUNDS

We do not offer refunds due to the nature of the product, there is no way of us checking if you've stopped using it. However you are free to resell your license to anyone :)

ClientMesh is sold as is and deemed working. If it doesn't work on your system then it is a defect of your system and so is not our fault and you may resell your license. We will also not be responsible by any of incompetence.

SUPPORT

A setup tutorial is provided with the purchase.

EDIT: Now the work NVM. Looks very cool

Yeah we're just upgrading servers so images may break for a tick lol. After some stress testing, we managed to hold 1000 clients with just 1% cpu usage. fuck yeah >:]

D??M! - May 12, 2012, 2:49 pm

What is new in this version if you don't mind me asking?

Nathan Moriarty - May 12, 2012, 2:54 pm

I bought a while back. Is there any way to recover my user/pass? I can't find the payment as I used a prepaid card.

Modesty - May 12, 2012, 3:29 pm

(May 12, 2012 02:49 PM)BV1 ? Wrote: [\[CITE\]](#) What is new in this version if you don't mind me asking?

Sure, i've entirely re-created a more optimal connection system, complete new keylogger (both live and local), a new, more efficient method of transferring files, decreased a lot of unnecessary communication, ability to use multiple ports, ability to use custom "stubs", more mass commands. New webcam capture and remote desktop :) Basically transferring everything new I've learnt and implementing it. This is a strong base for future development, and we've reached the optimal level in terms of GUI aspects after trialing many methods of presenting the various controls.

In the next update that should be out after my exams (around the middle of June), we can expect a new virtual machine that will run allowing people to code custom scripts for clientmesh so it can automate a huge range of tasks as well as bringing back the console feature and much more hehe ? As well as integration with our upcoming HTTP Bot/In browser rat :)

(May 12, 2012 02:54 PM)Nathan Moriarty Wrote: [\[CITE\]](#) I bought a while back. Is there any way to recover my user/pass? I can't find the payment as I used a prepaid card.

You can PM me the email you used for purchase.

Cape - May 12, 2012, 5:03 pm

Vouch for Modesty owner of ClientMesh RAT

If you want any help feel free to ask from ME via PM! xD

Invicta - May 12, 2012, 5:18 pm

More .NET malware, oh well. Good luck with sales Modesty.

Modesty - May 13, 2012, 2:53 am

(May 12, 2012 05:18 PM)kush lol Wrote: [\[CITE\]](#) More .NET malware, oh well. Good luck with sales Modesty.

It's a common mis-conception that .net leads to instability. But the truth is that there is only a downside of a lower compatibility rate than native, however I can't remember the last time I came across a home/business system without the .net framework. Of course native languages give you full control over memory management and such but the framework does a great job itself. As I said, we're able to hold 1000 clients with only 1% cpu usage :) oh AND ClientMesh is NOT to be used for malware. AT ALL. UNDER NO CIRCUMSTANCES. Please read our Terms of Use at: <http://www.clientmesh.com/members/TOU.html> . Any misuse of this application WILL result in termination of license AND appropriate authorities WILL be contacted. This involves illegal activity, reverse engineering and more.

I'm ready for support and sales.

I know. I was working on a RAT in .NET myself. It's stable, but not really worth selling.

But my question to you, is why is this WORTH my money?

Modesty - May 13, 2012, 6:57 am

(May 13, 2012 03:00 AM)kush lol Wrote: [\[CITE\]](#) I know. I was working on a RAT in .NET myself. It's stable, but not really worth selling.

But my question to you, is why is this WORTH my money?

Well what do you want to do with it? Tell me and I can say whether it's for you ^^ The full feature's list is shown and it does every single thing there (minus the password manager which is undergoing refurbishment and will be released in the next update (mid-june) where we'll see a huge amount of features that i've been developing since last a year, an incorporated virtual machine so you can code scripts for it, plugin system, integration with a HTTP bot we're creating that's more like an inbrowser rat (mor einfo here: <https://hackforums.net/showthread.php?tid=2290823>), and much more :3) But in terms of what it can do now, pretty much everything any regular RAT does with increased stability and extra features such as the map, ability to view all desktops as thumbnails, fluid file manager etc) :) And when I mean stability, I'm talking about most minimal CPU usage with the highest number of clients as well as making clients themselves crash-proof. Obviously it is impossible to make the crash rate 0%, but it will only crash if only something obviously silly is done. I managed to open the remote desktop viewer on 20 clients at once with no lag at all. I think that's saying something.

Oh and finally, you have great support from me ^_^

The crypter will be coming back in 2 weeks when my exams are over! Seems that HF crypters aren't fit.

swe22 - May 13, 2012, 7:27 am

Vouch for Modesty owner of ClientMesh RAT

Nice work bro

Modesty - May 13, 2012, 7:32 am

Cheers mate. We've completed our server migration and now are fully back up! get buying guys <3

prodigyhf - May 13, 2012, 8:49 am

[\[img\]http://img198.imageshack.us/img198/8398/a18733b3e5cd47408f04025.png\[/img\]](http://img198.imageshack.us/img198/8398/a18733b3e5cd47408f04025.png)

You don't even need a crypter with this. The server is already FUD after it is created. The new version is extremely stable, the remote control is phenomenal, and the RAT is a lot easier to navigate now. Excellent work Modesty.

EDIT: I found a typo:

[\[img\]http://img198.imageshack.us/img198/8398/a18733b3e5cd47408f04025.png\[/img\]](http://img198.imageshack.us/img198/8398/a18733b3e5cd47408f04025.png)

Unless that actually rubs the CMD, then you need to change it to run. ?

Modesty - May 13, 2012, 8:55 am

Oh my god LOL Jheez now I have to recompile and get it up there again -.- BUT thankyou xD

prodigyhf - May 13, 2012, 9:02 am

(May 13, 2012 08:55 AM)Modesty Wrote: [\[CITE\]](#) Oh my god LOL Jheez now I have to recompile and get it up there again -.- BUT thankyou xD

No problem. Are you planning on trying to keep the server FUD? Because if you do, then I will love you. xD

And where is the password stealer? Is that still added or did you have to remove it?

Modesty - May 13, 2012, 11:54 am

(May 13, 2012 09:02 AM)CyberProdigy Wrote: [\[CITE\]](#) No problem. Are you planning on trying to keep the server FUD? Because if you do, then I will love you. xD

Well since i've implemented the possibility to use external stubs then It shouldn't be too hard but there might always be like 1 or 2 detections max.

I fixed the spelling mistake by the way!

(May 13, 2012 09:02 AM)CyberProdigy Wrote: [\[CITE\]](#) And where is the password stealer? Is that still added or did you have to remove it?

it'll be back again in about 2 weeks ish, i was going to wait to release it till that was fully done but i thought better release the full rat and finish the stealer later. it'll be out soon :)

Just updated thread with proof of stability.

193 clients, 0% cpu usage. isn't that awesome?

[img]http://i.minus.com/iqmr66sgoyrsZ.png[/img]

Buy now before we raise the price again!

Monsey - May 13, 2012, 3:44 pm

Amazing rat, totally blew me away when i could hold 200 connections so stable! :D

Big vouch

Also Modesty will be back soon :)

Invicta - May 13, 2012, 8:14 pm

When you're unbanned I might consider buying this. I already have a 250\$ RAT though, so it might not be needed.

Cape - May 14, 2012, 3:34 am

Modesty was banned, but I have spoken to him. He will have his ban lifted on the 27th of May. So, everybody stay calm! If you have any queries or purchase contact:

Vouch for this RAT, also to Modesty amazing support..

Modesty - May 27, 2012, 1:44 pm

Ahh guys, back on HF again and open for sales as always! In my break I've been adding features to current version, adding features to stubs (soon will allow purchase of custom stubs and etc), and reprogramming the website! Going to have a sexy website up now instead of the old one :3
Accepting sales!

(May 13, 2012 08:14 PM)Are\$ Wrote: [\[CITE\]](#) When you're unbanned I might consider buying this. I already have a 250\$ RAT though, so it might not be needed.
Let me know whenever if you wish mate.

Cape - May 28, 2012, 6:43 am

Vouch for Modesty & ClientMesh RAT

nice RAT ever and worth money.

Good Luck on sales. xD

Modesty - May 28, 2012, 9:11 am

Nearly done with the final web-site design, will probably be re-designing the panel too :D

prodigyhf - May 28, 2012, 9:57 am

Is the password stealer going to be added in the next update too?

Modesty - May 28, 2012, 9:58 am

(May 28, 2012 09:57 AM)Kyber Wrote: [\[CITE\]](#) Is the password stealer going to be added in the next update too?

That's correct, hence why I've put it in the program but disabled functionality since I was expecting to finish it for the last version but didn't manage to. :)

Also, the secondary half of this project will be out soon. It's a little surprise hehe >:]

#cn - May 28, 2012, 4:49 pm

Vouch for stability

~250 is all this mobile connection can handle right now, this laptop's specs are pretty pathetic too.

Breakout Kings - May 28, 2012, 5:43 pm

Hello. Breakout Kings here.

I am offering to review your product in a video/voice commentary. I would like a short time with your product and then I will give my honest opinion on it, I have no negative reputations and I think I have a "decent" amount of posts here. If interested I would love a PM.

Modesty - May 29, 2012, 3:44 am

(May 28, 2012 04:49 PM)#cn Wrote: [\[CITE\]](#) Vouch for stability

~250 is all this mobile connection can handle right now, this laptop's specs are pretty pathetic too. Thanks for your vouch buddy, lemme know if you encounter any problems or anything.

@poster above, no thank you.

Brand new site is now up guys! Check it out :3

sumbody - May 29, 2012, 9:04 am

Vouch for Modesty, I know him for 2 years at least and the guy is a great coder. Good luck with the sales mate. ;)

Modesty - May 29, 2012, 9:55 am

(May 29, 2012 09:04 AM)sumbody Wrote: [\[CITE\]](#) Vouch for Modesty, I know him for 2 years at least and the guy is a great coder. Good luck with the sales mate. ;)

Cheers mate, thanks for your purchase too. PM me if you have any problems, though I suspect you shouldn't encounter any!

Snoepie1012 - May 29, 2012, 3:45 pm

RAT looks very nice! To bad I dont got 40\$ and I probs wont have that money for a while..

Goodjob and goodluck with the sales!

xTechnique - May 29, 2012, 4:31 pm

Nice RAT Modesty, it looks really nice and the best thing is that the server is completely FUD.

Modesty - May 30, 2012, 1:53 am

N'aw thanks guys. Will be putting up the video demo soon (should have done this ages ago, but oh well) and check out the new site: www.clientmesh.com

Also, I'm just currently coding a scripting engine for it! fun fun fun :3

Modesty - May 31, 2012, 2:25 am

Also guys, if you require specific functionality then you can request custom stubs :)

Monsey - May 31, 2012, 1:29 pm

I just bought this, and it's superb! It's only getting better and better! Keep up the work Modesty

Modesty - May 31, 2012, 4:09 pm

(May 31, 2012 01:29 PM)Monsey Wrote: [\[CITE\]](#) I just bought this, and it's superb! It's only getting better and better! Keep up the work Modesty

Thanks duude. Don't forget to make sure that you aren't using the same ports on another app aha

Next update I reckon will come in two weeks. Please request features if you wish!

lilo - June 1, 2012, 10:56 am

(May 31, 2012 02:25 AM)Modesty Wrote: [\[CITE\]](#) Also guys, if you require specific functionality then you can request custom stubs :)

What is it ?

Is it like i need a new fonction i will be able to pay to have it ?

If yes a monetize plugin will be very good, like adfly hidden clicker or Bitcoin and also why not

exchange link between the user !

Is just idea ,maybe is just stupid .

This is already a good RAT.

Modesty - June 1, 2012, 3:14 pm

(Jun 1, 2012 10:56 AM)lilo Wrote: [\[CITE\]](#) What is it ?

This is already a good RAT.

That is correct, we can code custom stubs for you for an extra price with the features you require and you can use normal clientmesh with the custom stubs :)

Oh and the console feature and passwords will return too, of course.

Do you guys have any requests for next version btw?

Setrex - June 2, 2012, 10:51 am

(May 13, 2012 02:53 AM)Modesty Wrote: [\[CITE\]](#) As I said, we're able to hold 1000 clients with only 1% cpu usage :)

Show proof of this, and I will buy...

I am calling you out on this one.

Modesty - June 2, 2012, 1:14 pm

(Jun 2, 2012 10:51 AM)Setrex Wrote: [\[CITE\]](#) Show proof of this, and I will buy...

I am calling you out on this one.

I currently dont have access to 1000 machines sir, I am limited to the restrictions of my resources to show the proof again. But due to the way connections are handled, the only thing that goes up when a new client connects is memory usage (primitive information about each client (country, location, OS, etc) is held). So what's that, 300 chars max ? that's 300 bytes per client (the controls it uses, the listviewitem, is insignificant). This means that with 1000 clients, that's 300bytes x 1000 = 300,000 bytes = roughly 300KILOBYTES. Add that onto the general running of the server and all, the impact that will cause on a decent system with 2 gig RAM and a dual core processor is INSIGNIFICANT.

It uses 0% with 250 clients, you can't expect CPU usage to shoot up so drastically for 1000 can you? Proof of the CPU usage for 250 is on the first post :) As soon as I have legal access to 1000 machines I will post proof sir.

Tibit - June 2, 2012, 9:59 pm

Got to say the new version looks pretty sexy, bought it a long time ago, but just found my email with the login and set it up on my new computer :)

Modesty - June 3, 2012, 3:40 am

(Jun 2, 2012 09:59 PM)Tibit Wrote: [\[CITE\]](#) Got to say the new version looks pretty sexy, bought it a long time ago, but just found my email with the login and set it up on my new computer :)

If you need a link to the latest version the please let me know!

Tibit - June 3, 2012, 10:40 am

(Jun 3, 2012 03:40 AM)Modesty Wrote: [\[CITE\]](#) If you need a link to the latest version the please let me know!Thanks, but it was the same link from my email. I haven't check yet, but is the builtin crypter still there and is it FUD?

Modesty - June 3, 2012, 10:44 am

(Jun 3, 2012 10:40 AM)Tibit Wrote: [\[CITE\]](#) Thanks, but it was the same link from my email. I haven't check yet, but is the builtin crypter still there and is it FUD?

There is no crypter, however users have reported the stub having 2 or even no detections in some build cases. Use a hi res icon as always :D

You guys can re-download the download if you wish, I've edited the stub to prevent minor kaspersky detections.

Ready for sales here guys. Just edited some stuff with the sellers page, complete rebranding :D

Modesty - June 5, 2012, 4:40 am

We're also coding a c++ downloader that will download and install framework silently if it doesn't exist :D how wonderful

etsH - June 6, 2012, 6:02 pm

Hello Modesty

can you please give me the link to the HWID grabber so i can update it on my control panel

dogfuker - June 6, 2012, 6:41 pm

I am wondering where we stand on the detectable side, will you always offer a FUD stub and whats the current detection rate?

tangox - June 6, 2012, 6:58 pm

Is the stub cryptable with a third-party crypter or this is not supported? Also, does it install itself on start-up or we must take care of this?

dogfuker - June 7, 2012, 6:36 am

Can you answer my question please mate.

Modesty - June 7, 2012, 11:09 am

(Jun 6, 2012 06:41 PM)Derby Wrote: [\[CITE\]](#) I am wondering where we stand on the detectable side, will you always offer a FUD stub and whats the current detection rate?

Sorry just saw this. We have a custom stub feature, so maintaining FUD-ness is much easier than in previous versions. Once it becomes wideley detected, I will do my best to FUD it again.

(Jun 6, 2012 06:58 PM)tangox Wrote: [\[CITE\]](#) Is the stub cryptable with a third-party crypter or this is not supported? Also, does it install itself on start-up or we must take care of this?

It has an option to install itself to start up.

It is compatible with third party crypters, e.g. infinity crypter

Scatman John - June 9, 2012, 7:38 am

I received my account information very fast. This is a great RAT, I wish I knew about it earlier.

Lucky™ - June 9, 2012, 8:20 am

This looks great and I'm especially interested in the Thumbnail feature. Which image formats does it support ? Do I have to click every picture to get a thumbnail view ? This is a killer feature mate .D

Modesty - June 9, 2012, 10:19 am

(Jun 9, 2012 08:20 AM)Lucky™ Wrote: [\[CITE\]](#) This looks great and I'm especially interested in the Thumbnail feature. Which image formats does it support ? Do I have to click every picture to get a thumbnail view ? This is a killer feature mate .D

What do you mean thumbnail view? Like actual thumbnails of the actual picture itself? We had that in an earlier version of clientmesh where it showed the pictures themselves, but unfortunately we took it out for this version. It will hopefully be included in the next minor update though, if we can make it stable.

For now it only shows the thumbnails of the filetype :)

Modesty - June 10, 2012, 10:23 am

Any features that you guys wanna request btw?

Gatsby - June 11, 2012, 6:40 pm

Can I get a link to a tutorial to set the RAT up? I bought this a couple months ago and now have the newest version. I'm having some problems with the port forwarding though, I think you guys use new ports in the newer version.

Modesty - June 12, 2012, 9:00 am

(Jun 11, 2012 06:40 PM)Gatsby Wrote: [\[CITE\]](#) Can I get a link to a tutorial to set the RAT up? I bought this a couple months ago and now have the newest version. I'm having some problems with the port forwarding though, I think you guys use new ports in the newer version.

It's in the download mate, click the question mark button at the top right and it'll load it up.

Sensiz - June 12, 2012, 9:07 am

Just waiting for the new crack lmao

Joke , good luck with your sales

Flamenduck0 - June 12, 2012, 6:41 pm

Hey Modesty ive just purchased this through Supporter 747, great salesman and friend. However I purchased this a little over now and I havent gotten the payment verification or an email. If you could help me out with that it would be awesome.

Modesty - June 13, 2012, 8:30 am

(Jun 12, 2012 06:41 PM)Flamenduck0 Wrote: [\[CITE\]](#) Hey Modesty ive just purchased this through Supporter 747, great salesman and friend. However I purchased this a little over now and I havent

(Jun 13, 2012 04:10 PM)Scatman John Wrote: [\[CITE\]](#) That sounds great, thanks.

NP. I am currently devising and implementing a new method by which clients can connect and you will not need to forward ports.

SkyRider - June 14, 2012, 9:48 am

just bought this and its dam nice ?

Scatman John - June 14, 2012, 12:33 pm

(Jun 14, 2012 08:34 AM)Modesty Wrote: [\[CITE\]](#) NP. I am currently devising and implementing a new method by which clients can connect and you will not need to forward ports.

In my opinion, if you can do that, this will be the greatest RAT ever.

Modesty - June 16, 2012, 3:56 pm

(Jun 14, 2012 12:33 PM)Scatman John Wrote: [\[CITE\]](#) In my opinion, if you can do that, this will be the greatest RAT ever.

proving to be difficult, but not impossible. Requires relaying the traffic through some sort of server

Necro Space - June 16, 2012, 5:39 pm

noob question here but does the computers i infect need .net framework 2.0 and higher to work? i will be using a c++ crypter with no dependencies but just wanna know if the rat requires it for them as well as me

Modesty - June 17, 2012, 1:44 pm

(Jun 16, 2012 05:39 PM)Deviluntro Wrote: [\[CITE\]](#) noob question here but does the computers i infect

need .net framework 2.0 and higher to work? i will be using a c++ crypter with no dependencies but just wanna know if the rat requires it for them as well as me

They will need it **HOWEVER** currently I am working on a **NATIVE** downloader (c++, uses winapi mostly) and it will download and install framework first (if the machine doesn't have it), then it will download your client file and execute it. So basically, if they don't have .net, it will be downloaded and installed silently, and then the client file will be executed.

Please refrain from using the words "infect" as it suggests misuse of the licence terms! Thank you.

For all: We just got a new server, upgraded today so I will have to re-release this version to be compatible with it. If ClientMesh won't start for you then please re-download at the link you've been provided to get the latest version! Thanks.

Necro Space - June 17, 2012, 4:23 pm

have you got a eta on the **NATIVE** downloader ?

Modesty - June 18, 2012, 11:40 am

(Jun 17, 2012 04:23 PM)Deviluntro Wrote: [\[CITE\]](#) have you got a eta on the **NATIVE** downloader ?
Currently it looks for .net, if not found then it downloads and installs. Just need to make it download and install the client file and it'll be done. I know that's the easiest bit but been busy with sport and etc past week. Lets say a week or two.

Scatman John - June 18, 2012, 12:33 pm

(Jun 16, 2012 03:56 PM)Modesty Wrote: [\[CITE\]](#) proving to be difficult, but not impossible. Requires relaying the traffic through some sort of server
Black Shades Fusion does this, but it isn't good.

Modesty - June 19, 2012, 8:48 am

(Jun 18, 2012 12:33 PM)Scatman John Wrote: [\[CITE\]](#) Black Shades Fusion does this, but it isn't good.

Yep I know but this method is optimizeable to be near-perfect ^^

Hedex - June 20, 2012, 10:02 am

I guess it looks nice + I like the fact it has a built in crypter good job :)

Modesty - June 24, 2012, 9:50 am

Alright the c++ loader (installs .net if its not there) is done and we'll be releasing that in a bit, woop woop

elmedoc - June 26, 2012, 1:33 am

They don't have password stealer ? True ?
:/

Modesty - June 26, 2012, 8:39 am

(Jun 26, 2012 01:33 AM)The_Blood_Justice Wrote: [\[CITE\]](#) They don't have password stealer ? True ?
:/

We never had a password stealer, and never will. ClientMesh is NOT to be used to steal passwords or licenses will be revoked.

We may include a password retrieval tool to retrieve your passwords though.

Modesty - July 3, 2012, 9:59 am

Sales re-opened after confirming a few details with paypro. Please make sure you use clientmesh responsibly and stay within the TOS or licenses will be revoked!! This product is NOT to be used illegally!!

Cape - July 3, 2012, 11:15 am

Best RAT ever it works like a charm on sandboxie also, I have tested on sandboxie several times. If anyone need any type of support feel free to contact me.

Added back on guys, found about 50+ vouches! Here ready for instant account activation :)

mrsnickers3 - August 19, 2012, 12:21 pm

This is the exact same thing as Emissary RAT? SAME EXACT SOURCE LOL

Modesty - August 19, 2012, 12:28 pm

(Aug 19, 2012 12:21 PM)mrsnickers3 Wrote: [\[CITE\]](#) This is the exact same thing as Emissary RAT? SAME EXACT SOURCE LOL

Don't fuck with me, if you read the first post then you'll see that the product has been in development since 2010 (2 years, nearly 3) whereas emissary was released 3 months ago. Coding4Noobs (coder of emissary) has admitted he used clientmesh as inspiration for his rat. Now if you will please fuck off and take that filthy, insulting mouth filled with utter garbage out of this thread I will be more than happy you little cunt.

How dare you make such accusations? The source has never even left my hard drive you bastard. If you even LOOKED at the screenshots you'd realise that they are COMPLETELY different.

If you even had half a brain to do some research before making such accusations you'd know that clientmesh was here LONG before emissary, and paradox for that matter.

Ku?s?h? - August 25, 2012, 7:18 pm

Hey, I PM'd you about my account. Glad to see the RAT up and running again, hope you add auto-crypt back in, it was really helpful. Thanks!

Dreamer - August 25, 2012, 8:16 pm

I vouch for this user. He is 100% legitimate. Do not hesitate what-so-ever to purchase from this guy. Good luck will sales, friend.

Modesty - August 26, 2012, 5:36 am

Thank you for the vouch!

Spacew00t - August 27, 2012, 1:12 am

Can you tell me how big the server is and what the dependencies are? I'm seriously considering purchasing this product. Thank you.

Modesty - August 27, 2012, 3:07 am

(Aug 27, 2012 01:12 AM)Spacew00t Wrote: [\[CITE\]](#) Can you tell me how big the server is and what the dependencies are? I'm seriously considering purchasing this product. Thank you.

Server (the controller, what you have on YOUR COMPUTER):
4.25MB

Client (this is the part that you build and send out to clients):
78KB

Requires .NET 2.0, which, as said many times on HF, is available on a LARGE proportion of PCs. Comes default with windows vista and windows 7 and windows xp received it as a security update. I believe server editions have .NET 2.0 as well.

In the next update dependencies will not be a problem since I will be releasing a loader in C++ that will download and install .net if not present and then run the client on the person's PC.

Let me know if there's anything more you want to know about :)

Fredo In The Cut - August 27, 2012, 11:26 am

I cannot login to my clientmesh?

Sent you a pm already. Also why is the site down now?

Modesty - August 27, 2012, 12:23 pm

We're undergoing a server upgrade to accommodate all the new customers and will be up shortly. This is only to improve YOUR experience :)

ETA ~ 1 HOUR.

\$W1TcH - August 27, 2012, 12:45 pm

ok good scared me i thought u got shut down man.. haha

nastytrickshotz - August 27, 2012, 2:14 pm

does it have anti bot kill? also how much is it. pics are down and it says website iss offline

Spacew00t - August 27, 2012, 2:40 pm

I'm going to buy this at the first chance I get(I get paid today or tomorrow), however it'd be extremely useful for me to have a password retrieval system.

Harold Wren - August 27, 2012, 3:12 pm

i'm going to buy this first thing, is it paypal autobuy i cba for one of those other stupid websites...

Modesty - August 28, 2012, 3:17 am

Our server had finished upgrading last night and we're back on with a more powerful system woop! :D buy buy buy guys <3

(Aug 27, 2012 03:12 PM)iHatefilters Wrote: [\[CITE\]](#) i'm going to buy this first thing, is it paypal autobuy i cba for one of those other stupid websites...The order form is provided by PayProGlobal where you can checkout with PayPal :)

But we will have it soon! :D Feel free to ask anymore questions if ya need buddy.

Traitor-Panda - August 28, 2012, 4:32 am

Might be a repeated questions but how many victims do you reckon this RAT would be able to contain?

Pumpkins - August 28, 2012, 5:04 am

Just keeps getting better and better, personally never purchased this but every time I check its just better. :o

Vouch from me

Modesty - August 28, 2012, 5:21 am

(Aug 28, 2012 04:32 AM)Traitor-Panda Wrote: [\[CITE\]](#) Might be a repeated questions but how many victims do you reckon this RAT would be able to contain?

I will need to stress the importance of not misusing this RAT, and will have to say that this RAT is NOT TO BE USED to collect "victims". Please read our Terms of Use at:

<http://www.clientmesh.com/members/TOU.html> . Any misuse of this application WILL result in

termination of license. This involves illegal activity, reverse engineering and more. This message is a mandatory legal requirement.

However if you are interested in how many clients it can hold, I can assure you that it will be in the thousands if you really require it :) I was able to hold 250 PCs (with permission ofc) with 0% CPU usage (sometimes up to 1%) and no crash at all. It uses asynchronous sockets so it really doesn't matter how many clients you hold, it is more dependent on the amount of RAM you have to be able to hold all that info. However if you have 2GB or more, you should be more than fine sir :)

(Aug 28, 2012 05:04 AM)Zakary Wrote: [\[CITE\]](#) Just keeps getting better and better, personally never purchased this but every time I check its just better. :o

Vouch from me
Thankyou! :)

If anyone has anymore qs please feel free to post! :)

Modesty - August 29, 2012, 4:32 pm

Just edited thread to cope with HF's new image linking policy cause of all the malware shit -.-

Modesty - August 31, 2012, 2:54 am

Images updated and fixed again, woop woop purchase now guys!! :D

Kornflex - September 2, 2012, 1:23 pm

Mate, pm me asap when you come online.
Have some additional questions.
Thanks.

Contacted and questions answered :) Discount going soon so buy buy buy this wonderful software :3

dpdcli1 - September 26, 2012, 2:55 am

when are you update with crypte itself and etc.

Modesty - September 26, 2012, 3:51 pm

(Sep 26, 2012 02:55 AM)dpdcli1 Wrote: [\[CITE\]](#) when are you update with crypte itself and etc.
Dont have ETA as of now :) It won't be longer than a month though. Online for instant activation!!!

Modesty - September 27, 2012, 4:27 pm

More features coming soon, if you have any requests please PM.

imss_amante - September 29, 2012, 1:06 pm

I just bought ClientMesh a couple of days ago and am loving it! It's working great, seems stable so far and has lots of features. The one thing it is NOT, is FUD. 18/37

huManipulator - September 30, 2012, 12:39 pm

Vouch, A+ seller, great product thanks a lot for this

Modesty - October 1, 2012, 3:34 pm

(Sep 30, 2012 12:39 PM)ChessWithPeople Wrote: [\[CITE\]](#) Vouch, A+ seller, great product thanks a lot for this

Thanks mate :) Hope you enjoy the product.

LatitudeBlu - October 1, 2012, 11:21 pm

I already own other Remote Administration Tools but would purchase this without hesitation if you added a feature where it can Socks5 reverse proxy even behind a NAT/Firewall on a client.

Would be a very unique feature that no other product has on the market.

Also to find a way where the remote viewer doesn't get frozen if a Firewall pop up appears - would be much easier to troubleshoot clients PC when they aren't available to click the Accept button.

SIM-570417 - October 3, 2012, 6:48 am

With the rat we get a fud crypter or updates ?
