Thread: [\[Preview\] Green's Booter \[Taking Suggestions\]](#)

RhymeSayers - May 12, 2012, 3:20 pm

Here it is, the preview of my up and coming Advanced Booter.

Features:

iChat (Coded by [Blink](#))

UDP DDoS

orloris DDoS

Enemies List

CloudFlare Resolver

IP Tracer

Pinger (Online or Offline)

Website Resolver

DownOrJustMe (Website Online or Offline)

Credits/About Page

Red = Not Completed

Green = Completed

I did a few lines on the UDP DDoS but i have no vps to test it out so i have to stop on it for a few xD
I am taking suggestions on what i should add at this point.

^ Message that opens when chat system starts.

I am not gonna upload the main menu right now for the fact it is ment to be functional. (It looks like shit lol)

The booter has been finished. Closing thread until released. PM me if you have any questions on the booter.

?????? - May 12, 2012, 3:22 pm

Upload a picture of the booter :) would love to see it so far. Also, how did you add the website pinger? or is it a webbrowser?

RhymeSayers - May 12, 2012, 3:23 pm

(May 12, 2012 03:22 PM)Interlaced Wrote: [\[CITE\]](#) Upload a picture of the booter :) would love to see it so far. Also, how did you add the website pinger? or is it a webbrowser?

Website Resolver = Website to IP, uploading photo now(:
Edit: All photos uploaded :3

SomeWhiteGuy - May 12, 2012, 3:32 pm

You definitely need to improve the GUI. I like how it doesn't have a theme because most themes are overused and it just takes away from the final product IMHO.

The buttons are too big. I'm assuming you made them that big to take up space but buttons should (basically) never be that big. Make your form smaller or add an icon or some shit.

RhymeSayers - May 12, 2012, 3:34 pm

(May 12, 2012 03:32 PM)SomeWhiteGuy Wrote: [\[CITE\]](#) You definitely need to improve the GUI. I like how it doesn't have a theme because most themes are overused and it just takes away from the final product IMHO.

The buttons are too big. I'm assuming you made them that big to take up space but buttons should (basically) never be that big. Make your form smaller or add an icon or some shit. I didn't want to leave just a big white blank space, and yeah I know i need a GUI, i was gonna use Ghost Theme, but i was like... And join all the other kids? That's why im asking for good themes/ if someone can make me a simple custom one.

?????? - May 12, 2012, 3:39 pm

If you add a theme, that means you've gotta add all the buttons again lol if you want it to look nice or you could keep the same buttons that you have now.

RhymeSayers - May 12, 2012, 3:41 pm

(May 12, 2012 03:39 PM)Interlaced Wrote: [\[CITE\]](#) If you add a theme, that means you've gotta add all the buttons again lol if you want it to look nice or you could keep the same buttons that you have now.

I am in no rush to get this booter out(: Idc if i have to start all over. I am willing to redo my program to add a theme. So send me some good themes everyone!

?????? - May 12, 2012, 3:58 pm

What style of theme are you looking for? AenonHack has some decent ones on his pastebin :D

RhymeSayers - May 12, 2012, 4:01 pm

(May 12, 2012 03:58 PM)Interlaced Wrote: [\[CITE\]](#) What style of theme are you looking for? AenonHack has some decent ones on his pastebin :D

Most of his themes are dark and grey, dont get me wrong, they're amazing themes, but i wanted something for happy? Idk how to explain. I got vodka's theme archive, and didnt really like most of the themes, i saw some i liked but all the theme had was a button, I need more than just 1 button D:

#Realtalk. - May 12, 2012, 4:03 pm

The gui is soo ugly looks like something i could make in vb on 5 mins man have to do something with that shit but anyway Good luck i will gladly be your beta testers xD

-Simon ?

RhymeSayers - May 12, 2012, 4:06 pm

(May 12, 2012 04:03 PM)#Realtalk. Wrote: [\[CITE\]](#) The gui is soo ugly looks like something i could make in vb on 5 mins man have to do something with that shit but anyway Good luck i will gladly be your beta testers xD

-Simon ?Thanks for trashing the gui and than asking to be my beta tester? Hahah I KNOW IT'S SHIT. Why do you think im asking for a theme...

xMercuryx - May 12, 2012, 4:07 pm

Now if only you could spell "Enemy"

RhymeSayers - May 12, 2012, 4:09 pm

(May 12, 2012 04:07 PM)xMercuryx Wrote: [\[CITE\]](#) Now if only you could spell "Enemy"Sorry im not perfect. You can gtfo my thread, if you're gonna be an asshole.

xMercuryx - May 12, 2012, 4:13 pm

(May 12, 2012 04:09 PM)Gre?n Wrote: [\[CITE\]](#) Sorry im not perfect. You can gtfo my thread, if you're gonna be an asshole.

No one's perfect. But at least look in the dictionary for spelling. You're just going to make your program look unprofessional. Besides, from the looks of it, you only have the simple features (ping, isitdown).

RhymeSayers - May 12, 2012, 4:15 pm

(May 12, 2012 04:13 PM)xMercuryx Wrote: [\[CITE\]](#) No one's perfect. But at least look in the dictionary for spelling. You're just going to make your program look unprofessional. Besides, from the looks of it, you only have the simple features (ping, isitdown).Im adding SSH connections soon. Im getting some advise from my friend, I didn't want me program to glitch. This hasn't been realeased yet so how im I making my program (Thats in Beta) unprofessional, nothing is perfect in beta. Thanks for the update, I will edit the name now.

xMercuryx - May 12, 2012, 7:56 pm

(May 12, 2012 04:15 PM)Gre?n Wrote: [\[CITE\]](#) Im adding SSH connections soon. Im getting some advise from my friend, I didn't want me program to glitch. Anyways. I'm starting to look forward to this booter. Use mavamaarten's theme for GUI, it's amazing.

RhymeSayers - May 12, 2012, 8:24 pm

Im adding a theme atm. Does this look good?

<http://screensnapr.com/v/hnaQt7.jpg>

NoteMEdown - May 12, 2012, 8:38 pm

Ah, the theme looks really nice bro :P

Keep up the good work.

Invicta - May 12, 2012, 8:54 pm

Use the "Crystal Clear" Theme. It looks quite sexy.

RhymeSayers - May 12, 2012, 9:05 pm

(May 12, 2012 08:54 PM)kush lol Wrote: [\[CITE\]](#) Use the "Crystal Clear" Theme. It looks quite sexy. Thanks for suggestion but im using a sexy Green Blue and Grey theme :3

6e756c6c - May 12, 2012, 11:23 pm

I like the theme you chose, it's very simple and clean. I'm kind of burnt out on glossy things myself..

RhymeSayers - May 12, 2012, 11:28 pm

(May 12, 2012 11:23 PM)Aeonhack Wrote: [\[CITE\]](#) I like the theme you chose, it's very simple and clean. I'm kind of burnt out on glossy things myself..Thank you for your input! I liked it too, I wanted to change the button color so it was green and not blue... But i couldn't get it to change -__-

Coleak - May 13, 2012, 5:06 am

A little confused as to why you would integrate chat into a program like this.

Futuristic - May 13, 2012, 8:14 am

(May 12, 2012 03:20 PM)Gre?n Wrote: [\[CITE\]](#) Here it is, the preview of my up and coming Advanced Booter.

I am not gonna upload the main menu right now for the fact it is ment to be functional. (It looks like shit lol)

I really like this and hope it becomes public/free! It's looking good so far with the updated GUI, as well.

lakiluki - May 13, 2012, 8:15 am

Looks very HQ. I also really like the GUI. Keep up the good work!

RhymeSayers - May 13, 2012, 10:28 am

(May 13, 2012 05:06 AM)Coleak Wrote: [\[CITE\]](#) A little confused as to why you would integrate chat

into a program like this. Its mainly just for fun. If i make it public, im gonna upload the files so they dont have to use my chat room to do it, so they can make their own and have it private among their friends.

Thanks everyone who said they liked it!(!:

nathan72389 - May 13, 2012, 10:32 am

it seems like everything it should do isnt done, but you did all of the little things that dont matter.

and having a "website ip revolver" is stupid. just make your app check to see if the user entered a url or an ip address.

wh do you want to make the end user go through more steps than what they need to?>

Percocet - May 13, 2012, 10:36 am

That's funny, I swear I saw something like this before... Oh yeah, it was XR Shell Booter... Nice job making it obvious your using his source.

RhymeSayers - May 13, 2012, 10:42 am

(May 13, 2012 10:36 AM)killermanjaro65 Wrote: [\[CITE\]](#) That's funny, I swear I saw something like this before... Oh yeah, it was XR Shell Booter... Nice job making it obvious your using his source. Are kidding me lol? Like how dense are you. Please do tell. Mine isn't even a shell booter.

Percocet - May 13, 2012, 10:53 am

(May 13, 2012 10:42 AM)Gre?n Wrote: [\[CITE\]](#) Are kidding me lol? Like how dense are you. Please do tell. Mine isn't even a shell booter.

Just because it's not a shell booter doesn't mean you didn't rip things from his source...

Things you both have in your programs:

- Enemies list
- IP Tracer
- Pinger
- Chat (but not by blink)
- CloudFlare Resolver

I rest my case...

RhymeSayers - May 13, 2012, 10:55 am

(May 13, 2012 10:53 AM)killermanjaro65 Wrote: [\[CITE\]](#) Just because it's not a shell booter doesn't mean you didn't rip things from his source...

Things you both have in your programs:

- Enemies list
- IP Tracer
- Pinger
- Chat (but not by blink)
- CloudFlare Resolver

I rest my case...Ohh, I get it! You mean i added the fundamentals off a good booter? Something all booters should have, if they are to be considered advanced? Just because it in his booter doesnt mean i ripped his source, i haven't even seen his source, and im pretty sure he wouldn't give it out to me. Stop being a little skid who runs HF k? Thats like saying everyone who's built an auto clicker/ auto type ripped it off the first person who did it. Like honestly. HOW DENSE ARE YOU?

Percocet - May 13, 2012, 10:57 am

(May 13, 2012 10:55 AM)Gre?n Wrote: [\[CITE\]](#) Ohh, I get it! You mean i added the fundamentals off a good booter? Something all booters should have, if they are to be considered advanced? I don't think I'm running HF, I'm just proving a point, not to mention his was created before yours, and the source was released before yours. Plus, I'm not the skid trying to rip someones source...

Oh, and if you didn't rip, why are you getting so defensive?

RhymeSayers - May 13, 2012, 10:58 am

(May 13, 2012 10:57 AM)killermanjaro65 Wrote: [\[CITE\]](#) I don't think I'm running HF, I'm just proving a point, not to mention his was created before yours, and the source was released before yours. Plus, I'm not the skid trying to rip someones source...He released the .exe not the .vbproj so how could i steal his code?

_DeNy - May 13, 2012, 10:58 am

(May 13, 2012 10:53 AM)killermanjaro65 Wrote: [\[CITE\]](#) Just because it's not a shell booter doesn't mean you didn't rip things from his source...

I rest my case...

That's such horrible logic.

I guess any good booter copy/pastes too because almost everything has that.

Hell, I could make a booter that does that in 5 minutes if I wanted to.

Get over yourself.

Also going by your logic:

<https://hackforums.net/showthread.php?tid=1648636>

I guess I copy/pasted a million other people because it does the same thing as everyone else's right?

Dummkopf.

Percocet - May 13, 2012, 10:59 am

(May 13, 2012 10:58 AM)Gre?n Wrote: [\[CITE\]](#) He released the .exe not the .vbproj so how could i steal his code?

Really? I could point you to the thread where he released it.

Also, I'm done with this conversation.

RhymeSayers - May 13, 2012, 11:01 am

(May 13, 2012 10:59 AM)killermanjaro65 Wrote: [\[CITE\]](#) Really? I could point you to the thread where he released it.What you're saying is, well with your logic atleast, that just because something has the same functions as another it means its been ripped? You haven't even seen my code. Thats like saying every crypter ripped off each other because they all have icon changers and binders.

Percocet - May 13, 2012, 11:03 am

(May 13, 2012 11:01 AM)Gre?n Wrote: [\[CITE\]](#) What you're saying is, well with your logic atleast, that just because something has the same functions as another it means its been ripped? Figures. Retreat when you're proven wrong.

Leave, don't come back.

RhymeSayers - May 13, 2012, 11:04 am

(May 13, 2012 11:03 AM)killermanjaro65 Wrote: [\[CITE\]](#) Again, I'm done with this conversation. I'm not going to be a spammer. The most logical thing you said in this thread. Have a good day(:

Percocet - May 13, 2012, 11:07 am

(May 13, 2012 11:04 AM)Gre?n Wrote: [\[CITE\]](#) The most logical thing you said in this thread. Have a good day(:

The same to you (about the "Have a good day" part).

NoteMEdown - May 13, 2012, 1:19 pm

(May 13, 2012 11:03 AM)killermanjaro65 Wrote: [\[CITE\]](#) Again, I'm done with this conversation. I'm not going to be a spammer.

lol, you say your are done, and your are not going to be a spammer, yet you post like 5 more times, gtfo..

?mnipotent - May 13, 2012, 2:59 pm

I think it actually looks pretty good. I don't understand why everyone else is hating. If you don't like it make your own seriously! Programming is tough!

RhymeSayers - May 13, 2012, 8:46 pm

Edit: Just added iChat to it! (Pictures in spoiler)

Note: I did not code iChat.

Will be adding UDP/Slowloris when i get a vps i can barrow for a few hours.

Any more scripts/tools i should add!?!?!?

nathan72389 - May 13, 2012, 9:19 pm

yo, dude, if its a fucking booter then code the booter part of it, not all this ding dong stupid shit that you have already wasted your time on. Because everyone knows that a car with electric windows and a blown motor is all win!

RhymeSayers - May 13, 2012, 9:21 pm

(May 13, 2012 09:19 PM)nathan72389 Wrote: [\[CITE\]](#) yo, dude, if its a fucking booter then code the booter part of it, not all this ding dong stupid shit that you have already wasted your time on.

Because everyone knows that a car with electric windows and a blown motor is all win! If you took the time too read my thread, you would see that i said.

I need to get a VPS to do the DOS function. I haven't purchased a VPS yet. Okay? I also said i was gonna do the DOS function last.

Im trying to enjoy myself while coding this. I want to add little things that i find fun okay?

nathan72389 - May 13, 2012, 9:27 pm

wait, lemme take YOUR words..

[img]http://i.minus.com/ibmmkSA62WcWxn.PNG[/img]

so your saying that all the minor bullshit that your app IS NOT susposed to do is done, but the ONE THING that it IS SUSPOSED TO DO is not done..

thats so fucking stupid.

RhymeSayers - May 13, 2012, 9:30 pm

(May 13, 2012 09:27 PM)nathan72389 Wrote: [\[CITE\]](#) wait, lemme take YOUR words..

nope. thats plain ignorance in my book.

its like ... pulling toilet paper off the roll b4 you go shit.

how much paper do you need, and how can you figure that?

your app... the main thing that its supposed to do isnt even done but you put all this extra crap into it,... so basically if you cant find someone to give you a few php shells, then your whole app just got fucked and all that time you put into all those little ding dong things is time wasted.

but whatever, clean that glass, and make sure the radio works on a car that dont have a motor.

RhymeSayers - May 13, 2012, 9:48 pm

nathan72389 - May 13, 2012, 9:58 pm

its ok man, if you like clean windows on a car that dont run, whatever.

im saying....

you advertise a booter...

but yet the ONLY THING YOU HAVENT DONE IS THE BOOTING PART

thats just plain stupid.

Jash - May 13, 2012, 10:25 pm

gui = fugly = fucking ugly
feats = so damn good

???? - May 14, 2012, 1:07 am

Awesome booter bro,
Looks Really good, Got nothing more to say

-demonnator

AnthraxUnited1 - May 14, 2012, 1:02 pm

this look really cool. cant think of anything at the moment for you to add. i might know later so stay open!!

Exit - May 14, 2012, 1:10 pm

Just a tip of suggestion, if you don't like it please IGNORE, if you like it : have it.

Instead of making/showing many Forms, you could include their controls and functions in Tab pages.

Makes it look professional, I guess. (like in RATs).

;]

RhymeSayers - May 14, 2012, 3:58 pm

(May 14, 2012 01:10 PM)Exit Wrote: [\[CITE\]](#) Just a tip of suggestion, if you don't like it please IGNORE, if you like it : have it.
