Thread: [~??ULTIMATE PORT FORWARDING TUTORIAL forward ANY PORT \[no utorrent or VPN\]??~](#)

Error2012 - May 12, 2012, 11:02 pm

okay This wont be one of these Fancy Tuts Because im in a hurry here and i just Discovered this awesome way so yeah excuse me for that

many of you had problems with Forwarding the Ports Necessary Ports for Their RATS or any other tools to work, i had a problem with Forwarding Ports for like eternity it even made me quit RATING Before even Starting

There are a couple of Ways and tuts out there to Forward your Ports but Let's face it they're not THAT efficient

Using a VPN Is a Good Choice but the free VPNs are Extremely rare and let's face it we're not going to pay to forward our ports

Using Utorrent is a Good choice as well but the only Bad side about this is that you can only Forward ONE PORT ONLY and most of our Tools need more than that

Going Through your Router for Ages Trying to find the right way to Forward a port ... no. you'll Either Wind up in one of these mental Health Institutes or Arrested for splitting your router in half with an AXE

so What i have for you here Gentlemen is a New way To forward Any Port you want and ANY number of them so they can Send and Receive Packets Like any other good little port

Many of you use the DarkComet RAT, but what you dont know that that RATING Tool of yours Can be used as a Super port opener [meaning for Forwarding ports...]

Lets Take a Look at our Awesome DarkComet Client

[img]<http://3.bp.blogspot.com/-mj2gjXzpQy8/TorPnoOEJII/AABWk/UI7RQoW3l9w/s1600/dark.png>[img]

Beautiful Isn't it ?

Notice that Little Magical Button there ?

Thats what happens when you Click it

all you Gotta Do now is just to Right Click anywhere in the Upper Panel there So this menu pops up

And then you Click the First magical Option which will Bring up This Box

In this Tut We'll Try to forward the 1337 Port Because i can.

And that's what happens when you Click "Listen"

Now you can see that the Client is now Listening on the Port We Chose Earlier.
Now shall we check if the port is Correctly open or not ?

Gentlemen, i would kill to See that Green Word there.

And as the last Pic says my Work here is done People
if you got any other Question Just leave it in the Replies or PM me if its absolutely necessary like if someone is going to die if you didn't forward that port
And if you're a "Pro Port forwarder" And you're Going to come here and Show up about how much of an idiot i am [IM NOT >:(] and that its actually easy to Forward Ports manually and that we're all skids Because we can't do it the Manual way then Congratulations in Advance, you're the next Kevin Mitnick

Hope You all Enjoyed the tut and FINALLY forwarded some ports ?

mouradbenazouz97 - May 13, 2012, 1:03 am

Error 20123 thank you
PORT FORWARDING for the ULTIMATE TUTORIAL
I will use this method now

the_lizend - May 13, 2012, 11:00 am

going to try... hopefully it will work...by da way...nice tut

killr619 - May 13, 2012, 11:07 am

this never works man... not the ultimate guide

woodleei - May 13, 2012, 11:33 am

Great Tutorial! I Will Be Pointing People To This Whenever They Ask Me This Question! Which Is Alot...

Error2012 - May 15, 2012, 12:09 pm

Thank you All, and i will be sharing any more "Discoveries" i make later
and killr619 Make sure you added an exception for the dark comet EXECUTABLE in your firewall
and make sure that you have UPNP Enabled in your Router as well

Pot - May 16, 2012, 6:59 pm

some one should just make a upnp program, that way I can still use my fucking antivirus.

roma4ka - May 19, 2012, 1:07 am

Dam Man!!!

This sentence so true!! haha i feel that way after i tried for 5h to forward a port in my stupid router!!!

"3Going Through your Router for Ages Trying to find the right way to Forward a port ... no. you'll Either Wind up in one of these mental Health Institutes or Arrested for splitting your router in half with an AXE"

Thanks a lot for the tutorial!!!!

rowrow - May 19, 2012, 3:34 am

YES
THANKS
FOR TUTORIAL BROTHER
!!!!

Athena - May 26, 2012, 2:11 am

This might work for some and not for others. As for me, it doesn't work... ^_^

Celebris - May 26, 2012, 10:47 am

Doesn't work for me either. 35 char

Athena - May 27, 2012, 11:59 am

I think you must turn off your Windows and Antivirus firewall for this to work.

It actually ended up working for me in the end. ^_^

Error2012 - June 1, 2012, 10:45 am

you DO need to turn off the Antivirus, as for the firewall you just need to add the Dark comet Executable to the firewall so it tells the Firewall "whatever port this Executable Requests, Open it for it" And Try again :]

And yes Someone REALLY does need to Make a UPNP Program it would make Everything Way Easier.

fasttex - June 1, 2012, 10:48 am

very very helpful thank you bro !!!

FroStorm - June 5, 2012, 11:10 am

Didnt work I turned antivirus off and did what u said and didnt work :0 help would be AWESOME!

crashfire - June 5, 2012, 11:47 am

Good tutrial for Beginners with Rats, But i still thing Darkcomet is an Unstable rat.. And Easy to be botkilled..

Cracy9 - June 5, 2012, 2:07 pm

Error: I could not see your service on xxx.xxx.xx.xx on port (1337)
Reason: Connection timed out

Must be cause i dont have a static ip (?)

?xperiment - June 5, 2012, 2:14 pm

Can anyone confirm this please? I dont think it will actually work.

alfonzo1955 - June 6, 2012, 4:56 pm

UPnP only works if your router supports UPnP and has it enabled. For example, I disable it for security reasons.

wizzard.wizzard - June 12, 2012, 6:04 am

THANKS
FOR TUTORIAL BROTHER

HELPED ME ALOT

aM1toL - June 12, 2012, 7:17 am

thanks for that. my friend needed help with that..

Zonated - July 14, 2012, 7:24 am

Hey, thanks for the share, but this still didn't open my ports.. :(

Coecane - July 14, 2012, 4:10 pm

Probably the most pointless tut ever. You didnt show us how to port forward you showed us how to listen to the port you forwarded to with Darkcomet. Lol would be a nice tut if you changed to the name

TheMotiveForce - July 15, 2012, 12:00 pm

Holy god I love you! I've followed every other forwarding guide on earth, and none of them work, except this one! Thank you so much! :D

Error2012 - August 15, 2012, 12:25 am

(Jul 15, 2012 12:00 PM)TheMotiveForce Wrote: [\[CITE\]](#) Holy god I love you! I've followed every other forwarding guide on earth, and none of them work, except this one! Thank you so much! :D

No problem Pal, Have fun ?

(Jul 14, 2012 04:10 PM)Coecane Wrote: [\[CITE\]](#) Probably the most pointless tut ever. You didnt show us how to port forward you showed us how to listen to the port you forwarded to with Darkcomet. Lol would be a nice tut if you changed to the name

The port you Specify in that box Gets Forwarded Automatically Using UPNP, This is not Just Listening.

and for your information, the port wont appear opened unless something is listening on it anyway.

Parade - November 2, 2012, 6:49 pm

BUMP. This tutorial is genius. I love you man.

Tahu151 - November 2, 2012, 7:41 pm

I'll give this a shot thanks for this bro.

zenolook - November 2, 2012, 7:54 pm

Thanks man I just used this to port forward.

BITDurg1 - November 19, 2013, 4:25 pm

Doesn't work man...still no success in port forwarding.

abdjoseph - November 19, 2013, 4:47 pm

Great tutorial.. Will definitely come handy..

WarangHawong - November 20, 2013, 6:32 am

woow!! this was very long time ago.. how long did they dig this? lol . :D

uddeshya - November 20, 2013, 8:56 am

i tried this much time ago...i use 3g datacard nd this only worked in a particular sim AIRCEL not in anyother sim..just for your kind information it depends on your I.S.P ...?

AWAIS113 - January 15, 2014, 12:46 pm

Hi bro I have problem with my router port forwarding I can not see any service on my PC when I run Trojan on my computer but when I send that Trojan to my friend or someone else who on other network It works fine can you tell me how I can setup my ports they will on my local area network because I know there is problem that I can see my ISP block inbound connection if I run Trojan how I can do that I know there will some option that I know will work correctly I also make my ISP router LAN bridge and modem dumping but still no luck would you please tell me how I can setup my firewall thanks !

crashingbananas - February 8, 2014, 7:35 pm

I love you !!!!! it works like a charm !

Trenchguns - February 23, 2014, 6:22 am

Didn't work for me... just seems like I'll never be able to port forward. There goes 20 bucks for a vpn...

angusburrto - April 2, 2014, 2:00 am

I sure hate to dig up threads, but this does still work, at least it worked for me.

ziyalil - May 24, 2014, 5:40 am

? my ISP not supporting UPNP I think

sufiyan - April 13, 2016, 3:27 am

Where Download Link For this tool?

djstell1 - April 26, 2016, 3:36 am

don't work for me :-(.....

sorry is work

iam wrong :-) :-) :-)

_veex - April 26, 2016, 3:41 am

Nice tutorial bro. Thanks! ;)

billou - May 10, 2016, 1:15 am

going to try..... thxxxxxxxxx

Cryptic Killer - June 26, 2016, 7:08 am

Can somebody add me on skype to go through the steps for this, cuz i tried several times and i tried manually aswell. Skype: reigningcapricorn ?

chrisjo - June 28, 2016, 6:57 pm

nice tutorial, thank you for the contribution

retherenn - June 30, 2016, 10:25 am

I wish I had found this guide a couple of days before, when I was pulling my hair out, trying to figure, how to port forward... Thank you.

gork - January 17, 2017, 2:56 pm

Thanks for this, really helpful

camarazon100 - February 8, 2017, 10:27 am

THANKS

FOR TUTORIAL BROTHER is perfect

weirdo1987 - February 17, 2017, 4:17 am

thank you!! worked for me!

anwar212 - April 5, 2017, 2:37 pm

going to try..... thxxxxxxxx

ultrazone - June 4, 2019, 7:03 pm

thank you brother I hope this works with me

Raphae - June 6, 2019, 1:50 pm

thx for sharing!!! nice tutorial btw
