Thread: [hacking a car flip out dvd](#)

desitdt - January 27, 2010, 7:26 pm

my friend has a flip out dvd player. He had the battery unplugged for a few days and now it wants a security code which we have no clue what it is. It is a 4 digit code and it has usb support. I was wondering if i could get any info on how i could possible run the 10,000 combinations on the device through my computer, flash drive, or cd/dvd. Its the first screen that pops up when the unit is turned on and the screen flips out. I know there are brute force cracking programs for cell phones so im wondering if there is a way to implement it here.

Did you try the default passwords?

google the product number, lol

SunSchrein - January 27, 2010, 7:28 pm

What's the brand/model? Also did you try the easy passwords? '0000' '1234'?

desitdt - January 27, 2010, 7:30 pm

tried all the easy numbers, social security number, adress, favorite numbers, birthday, everything lol its a Kenwood Kvt 512

SunSchrein - January 27, 2010, 7:31 pm

Ya, then I would definitely google the model/brand and find out what the default codes are or how to reset it if it was changed from the defaults.

would i not be ablr to use something like tsgrinder once i get the headunit to recognise my computer as an input?

if you read here

<http://forum.ecoustics.com/bbs/messages/4/601404.html>

last post says if i send it to kenwood they hook it to a laptop and decode the chip. there has to be someway for me to do this at home or some way to brute force the key.

anyone have any suggestions?

desitdt - January 27, 2010, 9:47 pm

basicly just wondering if there is a brute force programe that will run from 0000,0001...9999 on the headunit to find the code?

desitdt - January 28, 2010, 2:38 pm

found a better way. these radio have eeprom. heres a thread here i found

<http://forum.gsmhosting.com/vbb/showthread.php?t=503264>

and for xbox

http://forums.afterdawn.com/thread_view.cfm/357863

could i build the eeprom reader from the xbox threadd, hook it up to eeprom in radio, dump the file,

then get the code?

desitdt - *January 28, 2010, 4:55 pm*

does noone on this forum have any clue how to go about getting the code. i would have no problem sending it to kenwood but i cant find the receipt.
