Thread: [What just happened to Dividesby0?](#)

His Profile: <https://hackforums.net/member.php?action=profile&uid=497866>

All day he was selling his Dell laptops, and plenty of people ordered.

Then he posted this: <https://hackforums.net/showthread.php?tid=2496314>

His name also went black in the past hour, and you can't PM him, now I know the black with a line means banned, but I don't know about the just black part.

Did he scam those people? I was going to buy once I got home, which I am, but now this stuff happened.

His account was banned for stolen accounts, Which would mean that everyone that sent payments to him during that time got scammed.

Oh well...

EDIT: Incase I didn't make it clear enough, His account was hacked.

If you find out what's up, can you please PM me and let me know? I wanted to order some stuff off him, but now I'm not so sure it is a good idea.

It looks as if he junked the thread then used the staff excuse to justify it.

i dont know though, ive seen dividesby0 around and he looked pretty legit.

I was away for holiday vacction and i will return soon asap.

It's pretty obvious you scammed them, lol. Just give up.

Candyshop - June 1, 2012, 5:00 pm

It means he was banned and had his thread deleted. The type of service he is offering is not allowed on HF.
