Thread: [\[ALL MEMBERS\] C++ Crypter Sources \[LINK in THREAD\]](#)

n00b.ca - May 15, 2012, 1:26 pm

I have a small pack of crypter sources that I believe this section and its active members can benefit from. I did not make these sources, they happen to be lying around on my desktop.

A virus scan is not needed as these are sources.

All these sources can be found on HF. I just put them in the same zip file. That's all.

ENJOY: Enjoy: <http://mediafire.com/?16i6juki9u955pc>

Burhan.Raxa - May 15, 2012, 1:38 pm

hey man, can I have a look at this too?

I not posting here to get the sources, I'm just posting here laughing - If I deem you worthy, what a crock.

tulamba - May 15, 2012, 1:38 pm

can you share it with me?

Thanks in advance.

Regards,

C++ isn't the easiest language to pick up. These are simple crypters, I doubt anyone would have the audacity to try sell these.

Only problem with your theory is that they aren't going to copy and paste. You're directly giving them the full source code. I'm all for the - post the source on an image of a troll and send them the image instead -.

Hey can you hit me up with the link for these crypter sources, much appreciated!

KushKinGz - June 26, 2012, 11:04 am

Could I get a copy please and thanks?

I doubt I would ever fit the requirements because this is a new account but oh well, we'll see.

Thanks,
KushKinGz

someone_ - June 26, 2012, 11:12 am

I kinda dont get this "PM Me to get the booty" kinda deal. Why cant people just link the stuff in the OP. Especially if you didnt even code it yourself.

With that being said, i know my chances are now slimmer than slim - but being new to c++, and my goal being to code my own crypter, i would really like to see the sources of others crypters.

Hope you'll share them with me.

Have a nice day.

reece! - June 27, 2012, 12:32 pm

I'd like to have a look at this too.

Thanks in advance :)

DuncanNuura - June 27, 2012, 8:54 pm

Realy? wow thanks for supporting this part of forum

Also i want take a look inside

thanks

BearMawl - June 30, 2012, 4:06 am

New-Fag here, I would love a copy of this sources. i presently know c and c++ and i am looking to make my own crypter in c++. with that being said it is hard to find good crypter sources that i can analyze for private crypter creation. I think this is mainly do to the bullshit of this site pandering to script kiddies that just want something that works immediately and have no desire to actually teach/learn software programming.

sorry for the rant, but it would be much appreciated if you would give me a copy.

Thanks in advance.

Its really good collection of sources.
Once again thanks for sharing it. :D

notbtc - December 9, 2012, 9:01 am

From my personal experience by coding c++ crypters: all sources are detected, you have to learn something about hiding the code to AVs before downloading sources
