I was bored as hell, had nothing to do. I couldn't think of anything else to make when suddenly the idea of such a program crossed my mind. I did a quick search only to find out that such a program was never posted here.

Enough with the blabbering, here's the download link: <http://www.mediafire.com/?in4cjkd kfio4x29> (Source code & Executable)

VirusTotal Scan report -> [here](#).

Feel free to leech/rip/w/e.?

Arcane.cfg.
