Thread: [When and how did you guys learn to hack websites?](#)

copei2405 - May 16, 2012, 10:38 am

hi guys,

i just started ratting recently but i would also love to be able to hack into website and access databases etc. Any tips on how to learn to do that? and how old were you guys when you started? im 14 in a week

EIP - May 16, 2012, 10:50 am

You can start learning if you are even up to 30 years old. But most of talented Pentester has at least 4-6 years experience. If you start now then you will be a ninja hacker when you are 25 years old(Oh nice).

Anyway, Programming is not becoming a web hacker but knowing programming is smartness. I suggest you to Learn PHP, python and Read Security related books etc. GOOGLE is your best friend.
