Stev - May 17, 2012, 5:35 pm

Tutorial ???

Rourke - May 17, 2012, 5:36 pm

Nice guide kohsti <3

Any people that wish to learn more, don't hesitate to PM us.

Oni ? - May 17, 2012, 5:37 pm

Yet another amazing thread posted by hosman <3

Stev - May 17, 2012, 5:40 pm

Thanks for the feedback guys, remember: When you see anything wrong/ or you want to add anything. Don't hesitate PMing me.

Airon - May 17, 2012, 5:54 pm

This is pretty sick, and i love your work, goodjob mate it is HQ and i learned new things.?

Skiezo™ - May 17, 2012, 6:00 pm

Yup, Kohsti..

Always a High Quality Member

Especially when it comes to making threads.

Good Job!

Devote - May 17, 2012, 6:41 pm

Great tutorial my friend, awesome batch scripts! :D Could you make one for rebooting then deleting all files and then deleting system 32?

Not even sure this is possible but if you could it'd be awesome.

???? - May 17, 2012, 7:55 pm

Very HQ tutorial, should help out people that are having troubles.

Jinu - May 17, 2012, 10:26 pm

Worthy to read this. Really helpful for RATers.

Tangy - May 17, 2012, 11:07 pm

Nice guide. Really helpful and I love the batch scripts haha

Ordinary - May 18, 2012, 12:57 am

Really nice tips , would have been lovely to know back when I used R.A.Ts like bshades and DC.

A New Newb - May 18, 2012, 3:31 am

I just added an exeption for my antivirus and malwarebytes to the folder where I keep my hacking tools. Very good thing to do, ladies and gentlemen.

[Mille] - May 18, 2012, 4:27 am

Great tutorial, i will try to get some bots now ;D

Rafe_D - May 18, 2012, 4:34 am

Another quality thread from you. Informative, simple and easy to understand. Everything the beginner need's.

EDIT: Forgot to mention nice batch file's mate. Always good to have more.

Dark Demon - May 18, 2012, 4:49 am

Nice man!

Learnt a couple tricks while reading this.

LoIZ Gym - May 18, 2012, 4:51 am

Nice thread OP.

Btw: If you infect yourself with a rat there's an faster way to remove it:

<https://hackforums.net/showthread.php?tid=2504377> ;)

Maybe you can add it to your thread OP ? :D

Edit: Ant-virus kill won't work, they protect their processes / files and register keys.

Stev - May 18, 2012, 5:10 am

Added the part of "Removal of Infections"

Since it was suggested, thank you guys.

mrrocky314 - May 18, 2012, 5:24 am

damm good guide thanks for taking your time collecting the info and making all the useful info in one thread

Stev - May 18, 2012, 5:54 am

Added a suggestion of Rafe_D in, thanks a lot bro!

Skiezo™ - May 18, 2012, 10:10 am

If you guys have more suggestions, Just post
And Kohsti will add them in the thread!

Keep the suggestions coming!

Cubee - May 18, 2012, 10:22 am

Not bad work you did here, I like it.

fourtheye - May 18, 2012, 10:28 am

Awesome thread.This sure must help a lot of people troubleshooting their common problems ! Way to go !

Invisus - May 18, 2012, 10:36 am

This was LQ and useless.. Why would anyone ever use this for anything?

Spoiler ([Click to View](#))JK, This was HQ and usefull, anyone would use this for everything!

MindOfLogic - May 18, 2012, 10:50 am

Thanks man for this tutorial. Very HQ member here.

Aladeen - May 18, 2012, 1:33 pm

Very good tips and tricks, and nice added together, thank you for sharing!

Stev - May 18, 2012, 6:44 pm

Thanks a lot for your positive feedback guys, PM/post me for suggestions!
I will add them in straight away.

i rep africa - May 18, 2012, 6:50 pm

thanks for this very helpful for myself and other people starting out :D

Equisite - May 19, 2012, 4:14 am

Amazing guide!
Very hq and interesting!
Good job op :)

Stev - May 19, 2012, 11:38 am

(May 19, 2012 04:14 AM)the_holey_monkey Wrote: [\[CITE\]](#) Amazing guide!
Very hq and interesting!
Good job op :)
Thanks a lot man, appreciate your feedback.

Any more suggestions guys?

n00b.ca - May 19, 2012, 5:29 pm

Stop leaking classified secrets. It's not nice.

OT: Good tutorial, keep up the good work.

JasonFlinn - May 19, 2012, 10:23 pm

Probably the most HQ thread regarding RAT's I've seen in my time.
I'm impressed.

As far as suggestions go;

I think it'd be fair to mention that if you're considering "Cryptocloud" you'd better be willing to pay out.

One month with those guys is \$20 where as nVPN is \$6 and blackshades vpn is \$5.
Personally; I'd say nVPN is best value as it's never once for me been down (like bshades is fairly often) and doesn't cost an arm and a leg to use it.

Another thing to keep in mind is that some VPN's (such as nVPN) will open a chosen port... but it won't show as open when checked (i.e. canyouseeme.org) unless you are currently listening to that port. This can be done with a port listener tool or just using your RAT to listen to it. (this can also be true when portforwarding w/o a vpn)

Also; make sure you run your VPN's as Administrator... something as simple as not doing that can make it not function properly; which is frustrating for someone who over looks it (me) ;)

Last note I'll add tonight (since I'm probably over-typing my welcome lol) is to perhaps mention "dependencies" and how they can cause corruption of servers etc. Probably don't wanna go too in-depth on it in a tips and tricks thread... but might be worth mentioning?

Overall I'd say great work man, I learned things from this thread and I honestly thought I knew quite a bit about RAT's by now :P

This thing deserves its own sticky for shore.

Criosity - May 19, 2012, 10:33 pm

awesome tutorial thanks :D really worth reading it all :)

Stev - May 20, 2012, 5:03 am

Wow, thanks a lot for your great feedback!

I will definety add in the part about dependencies and the part about VPNs and its ports. I will add you in as credits.

Again thanks a lot.

Devote - May 20, 2012, 8:58 am

Just want to give this somewhat of a , and also say that this tutorials .bat files are so helpful to me in rat'ing I am subscribed to this thread. Incredibly HighQuality. I feel like it should be stickied.

Stev - May 20, 2012, 9:00 am

(May 20, 2012 08:58 AM)Depth Wrote: [\[CITE\]](#) Just want to give this somewhat of a , and also say that this tutorials .bat files are so helpful to me in rat'ing I am subscribed to this thread. Incredibly HighQuality. I feel like it should be stickied.

Thanks a lot, that's a very nice compliment of you.

Will add the suggested in right now, by the way.

lightsycle - May 21, 2012, 8:02 am

(May 17, 2012 06:41 PM)Depth Wrote: [\[CITE\]](#) Great tutorial my friend, awesome batch scripts! :D Could you make one for rebooting then deleting all files and then deleting system 32?

Not even sure this is possible but if you could it'd be awesome.

I think all you would have to do is have a line inserted into autoexec.bat. It is still there, just not used. However, we all know deleting files does not erase them. What point would it serve? remove the immediate evidence, yes, but things could still be undeleted/recovered. Best advice is to not be traceable at all in the first place.

Excellent tut! Thanks for the great info. I learn something new every day.

Stev - May 21, 2012, 2:51 pm

Thanks a lot, suggestions are welcome as always!

Any ideas on a next guide/tutorial? :)

Devote - May 21, 2012, 6:27 pm

Kohsi, is there any way you can add a .bat script to unblock websites? Thank you very much!

Basically like the opposite of the scripts you did before.

Stev - May 22, 2012, 5:45 am

(May 21, 2012 06:27 PM)Depth Wrote: [\[CITE\]](#) Kohsi, is there any way you can add a .bat script to unblock websites? Thank you very much!

Basically like the opposite of the scripts you did before.

I don't think this is possible, since you will need a custom CMD.

I was looking for a batch script that could delete the host files, but couldn't find anything. Maybe visiting the batch scripting section might be good.

zevanzz - May 22, 2012, 6:12 am

Appreciate the info and suggestions - a friend and I (he is pretty experienced with coding) are about to start RATING to hopefully make some extra cash. The world of RATs is dirty and most definitely something I want to be apart of :P.

benx - May 22, 2012, 7:38 am

(May 20, 2012 09:00 AM)Kohsti Wrote: [\[CITE\]](#) Thanks a lot, that's a very nice compliment of you.

I don't think it's possible to port forward on a virtual machine, at least I have never tried. So sorry.

Rourke - May 23, 2012, 4:33 pm

Can some of you guys post suggestions for us to add to this?

Stev - May 24, 2012, 4:59 pm

Yeah guys, all suggestions are welcome, I will add them in the thread right away (of course if they

are good).

Pedono - May 26, 2012, 4:27 am

A very detailed tutorial, thanks a lot for sharing this! Bookmarked!

Stev - May 28, 2012, 3:12 am

Thanks a lot, any more suggestions to add in guys?

King Rammus - May 28, 2012, 3:49 am

Very nice tips and tricks about RATs man, thanks a lot for sharing this!

Rulerzz - May 28, 2012, 6:08 am

Thanks a lot for this! This really helped me out.

Kenny_Powers420 - May 28, 2012, 10:12 am

Hey there guys....I havent kept up much about RATS, but now is the time I want to have one....my new priority. My question is....Which RAT is best that is free. I ask this, cause things come and go and new things happen and etc. Also whats the word on paid RATs, and the differences between a free vs paid...but atm im looking for a free one....but a good one:) Thanks RAT Help Center, lol.

Stev - May 28, 2012, 10:17 am

(May 28, 2012 10:12 AM)Kenny_Powers420 Wrote: [\[CITE\]](#) Hey there guys....I havent kept up much about RATS, but now is the time I want to have one....my new priority. Darkcomet is a good and free RAT, a lot of people use it. And it's very stable.

Kenny_Powers420 - May 28, 2012, 10:28 am

Thanks for the advice Kohsti!...one last question what would be a good paid one, and is a paid one worth it over a stable free version..Thanks again man....I'll probably be getting in contact with you in the future if I encounter any problems with anything.

Stev - May 28, 2012, 10:30 am

(May 28, 2012 10:28 AM)Kenny_Powers420 Wrote: [\[CITE\]](#) Thanks for the advice Kohsti!...one last question what would be a good paid one, and is a paid one worth it over a stable free version..Thanks again man....I'll probably be getting in contact with you in the future if I encounter any problems with anything.

Blackshades NET is a good/paid RAT, a lot of people have it, and it has many features.

Kenny_Powers420 - May 28, 2012, 10:36 am

Okay whats the difference between a paid one a free one. I am just iffy abit...As we all know, never to get a free VPN/VPS...or is it just there are more features in a paid one then a free one, or does that matter?...Or is it just how you distribute your RAT that makes it a successful program?

EDIT: Which one would be best to watch and log webcam feed? Thanks, and if you'd like you could PM me on setting a RAT up. I am just overwhelmed on which one I should choose, that has the best and stable features.

nenepas - May 29, 2012, 6:39 am

Fantastic tut! It really helped me out to understand for RAT's as a noob.. Well Done!!!

nocturnalhacking - May 29, 2012, 4:07 pm

Thanks a lot for these tips and tricks, they were really helpful!
You have brilliant tutorials Kohsti :D

Stev - May 29, 2012, 5:08 pm

Thanks for the amazing feedback, any suggestions yet?

deano2727 - May 29, 2012, 6:17 pm

Love your tips and tricks about RATs, helped me out :D

nenepas - May 30, 2012, 7:18 am

First of all congratulations for this thread, it really helps out noobs (like me) to get to point..

Some question cause i am totally new to this and still searching for the best setting and results..
My setup is DC 5.2 and Crypter 2012

1) Managed to set my server after reading a tut and afterwards i crypted with the crypter and also binded with a pic file + icon changing etc. Ports are open (checked it with canyouseeme.org), firewalls disabled (AV, Defender) and the first test was in my machine and to the 2nd laptop i ve got under the same ISP. I got immediately 2 connections and thought that everything should be ok but after making some restarts both of the "slaves" have gone.. Any ideas?

2) The start-up option is it necessary to be checked and if it is, should it be at the DC or the Crypters settings? (Could this be the reason for loosing slaves?).

3) Testing the server to my own PC's is it reliable enough that everything is ok and that it will work at the "real life"?

4) When i am setting up a new server i would like to be an SCR and not an EXE. Could this be a problem for the Crypter? (The ones i have tested are EXE).

Sorry for the big post, thanks in advance..

Stev - May 31, 2012, 3:25 am

Sorry for the big post, thanks in advance..

-The DC startup is very important, check it and then don't check it on the crypter, so if you reboot you will keep the slave.

-And testing on your own PC is a good thing to do, it's reliable.

-Changing the extensions is no problem at all.

Neveah - May 31, 2012, 4:24 am

best guide i have seen so far. very helpful , i am definitely going to try this, thank you <3

Rulerzz - May 31, 2012, 6:14 am

Great Guide Really Helped me. Thank You are For Sparing The Time in Writing this

Stev - June 2, 2012, 4:12 am

No problem, I am open for all suggestions!

Nicholastt - June 2, 2012, 9:06 am

thanks bro this is great...=) very helpful stuff as im now starting

Fluxert - June 2, 2012, 12:40 pm

thanx for the nice tut big vouch for you

Stev - June 2, 2012, 4:48 pm

Stev - August 19, 2012, 12:18 pm

Tips & Tricks ed for the noobs out there ;)

Abusadora - August 19, 2012, 6:40 pm

Hey, quick question. I create my server through Dark Comet, I run it on myself and it detects me and I show up on my users, life is good. I close the server out. However, I crypt the very same file (with Riven Crypter) and then I try running it on myself and it doesn't appear. Any ideas? If I use the crypted file on another person will it appear or am I an exception for some reason? D:

maymoon - August 20, 2012, 11:59 pm

Good job! Thanks m8! Worthy to read!

?erenity - August 21, 2012, 10:05 am

Clockwork - August 22, 2012, 11:02 am

quick question, when using the disable internet batch code, how long should their internet be out? Will it come back on eventually?

thatguyyoudontknow - August 22, 2012, 12:19 pm

Awesome TUT thanks!

This has helped me out no end!

Muchos!

Lomas - August 22, 2012, 3:26 pm

really good post, I wonder about the providers of vpn though, really, I think they all need to keep some degree of log. they must keep a log of payments otherwise they would not function as a business so something is going on there, also, many say things like "no p2p" - if they are to enforce this then they must keep logs.

i am skeptical here but its definitely better than having it come back to your home ip!

Stev - August 27, 2012, 2:23 pm

(Aug 22, 2012 03:26 PM)Lomas Wrote: [\[CITE\]](#) really good post, I wonder about the providers of vpn though, really, I think they all need to keep some degree of log. they must keep a log of payments otherwise they would not function as a business so something is going on there, also, many say things like "no p2p" - if they are to enforce this then they must keep logs.

i am skeptical here but its definitely better than having it come back to your home ip!

Of course... I think they keep some logs stored, and especially when cops ask for it.. .but then again, it's good for their sales etc. And I don't expect you doing some real serious shit. If you were, then you wouldn't just use a simple VPN to keep yourself safe.

If you are really trying to hack some major shit, then a VPN won't protect you.

nishantagrawal25 - August 28, 2012, 1:30 am

thanks alot for this guide

it is very useful and helpful

i am a noob so i learned a lot of things from this guide

please keep posing more like this

thanks

:)

Lathame - August 28, 2012, 1:48 am

This is a great HQ tut. Nice work. keep it up

malw0rm - August 28, 2012, 4:38 pm

Nice guide Kohsti, very helpful.

Good job.

majikz10 - August 31, 2012, 7:55 pm

how can i make money with a rat or a keylogger?

AzureMyst - September 15, 2012, 4:13 am

Thank you very much, amazing tutorial/tricks! :)

Rikh39 - September 15, 2012, 6:44 am

Really Nice Post!,

But It Is Better If You Post A Installation Guide From An RAT (Poison Ivy, a Little Bit Old...)

KING - September 15, 2012, 6:59 am

Really nice tutorial this is great for beginners at ratting (me) cannot wait to start :)

busileonardo - September 19, 2012, 10:53 am

Very nice info . Im learning a lot tx

?

?Dante - September 19, 2012, 11:30 am

hi kohsti,

you've done a nice 'n clean job here..

given your precious time too...

but as you've written in the end of your thread-

Quote:This thread isn't complete yet,You guys can post feedback. Post/PM if you want to add anything. I will add it it right away.

I'd like to add certain things...

we all..

on HF...

is here to LEARN.. not just only to be a SCRIPT kiddy...

plz don't mind as I'm not flaming ANY1 out here..

but...

that fact is..

EVERYBODY wanna know how stuff works...

but i wanna know how can I MAKE some stuff...

u r getting me?

like we can see a majority of tuts explaining "ONLY the USAGE" of some GREAT tools...

but i wanna CODE that tools too...?

and HERE's is what HF is lacking...

i dun know about other sites..but HF was always been mah favorite guide...IS mah favorite...'coz the community is so helping...

?

BUT,,,,,

HF need some sort of DEVELOPMENT area too...

where the threads will like-

how to CODE a JDB, exploit development, crypters, 0 day exploits etc.

?

you see?

?

okay...

i think i spammed a lot.. pardon me if I've said anythin' wrong.
but these mods HAD to be taken to improve HF
u read that OMNI?
?

~dantehh...?

Kilmarnock - September 19, 2012, 2:43 pm

thanks for the info will try some now

Lil W?yne - September 19, 2012, 4:14 pm

very good guide im starting to rat and this helped me a lot

Stev - October 1, 2012, 3:03 pm

I love reading all you guys positive feedback, really <3 you all!

chrismaker - October 15, 2012, 7:00 pm

So far, you have been the most helpful member on HF I have encountered. Thank you for all of your contributions as you have a lot of knowledge and experience! (I've read all 35 pages of your RAT QA Thread). *10 thumbs up!

Stev - October 22, 2012, 3:37 am

That's some real support you are showing here, sir. Thanks.

natany - October 22, 2012, 8:32 am

Worthy to read this. Really helpful for RATers.

muzportakal - October 30, 2012, 9:00 am

It was a really nice guide. You must've put a lot of effort into this

gondor522 - October 30, 2012, 9:06 am

this is amazing post. you given lot more in this tutorial specially the batch part i like it..

a1kop990 - October 30, 2012, 11:52 am

great guide friend
it really helped me a lot :)

Stev - October 31, 2012, 3:24 am

It's good to see all of you are still enjoy reading this tutorial!

Stev - October 31, 2012, 3:25 am

Stev - October 31, 2012, 3:26 am

It's good to see all of you are still enjoying this tutorial!

JasonFlinn - October 31, 2012, 7:24 am

Hey Kohsti,

My question is this: Is it still possible to make a RAT Auto-Execute from a flash drive?

I asked on this help thread rather than other because I got much respect for your work man.

Thanks!

-Flinn

Stev - October 31, 2012, 8:38 am

-Flinn

I am not sure what you mean with flash drive... but if you mean Java Driveby, then yes.

All you need is a good working .jar file and your RAT.

You can also follow my tutorial on how to setup a JDB.

bobokidd - October 31, 2012, 8:53 am

I'd Like to have this

Thanks In Advanced for sharing ..

JasonFlinn - October 31, 2012, 11:20 am

No my friend. I mean like a flash drive/junk drive/pen drive/usb drive. I want to be able to put an executable on it and have it auto-execute once placed inside of the USB port.

Hope that makes sense ?

Stev - October 31, 2012, 1:53 pm

Ahh. I am afraid that doesn't work on the newest OS man.

You could do it, but you would need a very good exploit.

It does work on older machines like XP or 95.

Stev - November 28, 2012, 5:37 am

More people should read this, it went down a lot :(

melfxd - November 28, 2012, 8:11 am

This was a helpful tutorial ... Does netwire support batch commands etc?

Stev - November 28, 2012, 11:27 am

(Nov 28, 2012 09:11 AM)melfxd Wrote: [\[CITE\]](#) This was a helpful tutorial ... Does netwire support batch commands etc?

Of course it does. And this feature is completely flawless on NetWire :)

saisrujan - November 30, 2012, 8:29 am

another nice thread very informational bookmarked this thread reading later..

theblackllama - November 30, 2012, 11:16 pm

i need help setting up my rat can someone plz add me on skype and help me? :envysbamf

R?gicide - November 30, 2012, 11:21 pm

Great TuT, one of the best ive seen on HF.

Could someone please explain to me why this is the case? What increases the probability of becoming infected when using a RAT?

Thx

Well, I'm pretty sure Kohsti means you will run your server at least once. To decrease the chances I suggest using [Sanboxie](#) to test your server.

Great tutorial Kohsti. Good to see this from another Anonymous RAT help center member.

Stev - December 17, 2012, 8:44 am

There are many things that could happen. Like opening your own RAT, running something backdoored etc.

Thangorn - December 17, 2012, 1:41 pm

Really love the guide, I'm relatively new, I don't particularly want to infect many people just play around with it, any idea where I can get a free RAT?

\$ XTC \$ - December 25, 2012, 4:49 am

Really like this collection! :)

Merry Chistmas!

Stev - December 30, 2012, 4:44 am

There are a lot of free RATs like DarkComet and jRAT. I recommend those both.

-Papjautaz- - December 30, 2012, 5:25 am

Thanks! I'm giving them a try as we speak, quite complicated at first but I think I'm getting to grips with it all :D

crashnash - December 30, 2012, 11:33 pm

Great Tips and Tricks that can be used on both sides hacking and protection .

Thanks so much Kohsti ...

CrashNash (Hacking Rookie) .

DEVIL X - December 31, 2012, 7:41 am

great, you have rearranged everything about RAT problems in one post...

GeoEcon - January 1, 2013, 4:07 pm

Thank Dude Your Are A Perfect....

Do You Have Any Email For Conact... (Its For Help)

Gage8910 - January 1, 2013, 7:03 pm

So i did the open cd thing to myself and it wont close>.> what do i do?

Arbitrage - January 19, 2013, 9:14 am

This is a pretty detailed guide, thanks for sharing, it was very helpful! :3

4RG0S - January 19, 2013, 2:41 pm

Amazing Tutorial, thank you very much for sharing this also bookmarked :)

Stev - January 28, 2013, 3:06 am

Thanks for the kind words, appreciate it.

Sir Cyrano - January 28, 2013, 3:19 am

Very nice tips and tricks about RATs man, thanks a lot for sharing this!

bhuwan_gupta - January 29, 2013, 9:48 pm

great tutorial very well appreciated

Superkawaii - January 29, 2013, 11:50 pm

very nice and easy to understand A+ thank you for this , bookmarked =)

Stev - February 1, 2013, 10:17 am

Thank you homies and maties, appreciate your feedback.

ronin0024 - March 1, 2013, 8:25 am

Nice tutorial i learn a lot ... thanx KHOSTI ...

MDMA. - March 13, 2013, 8:39 am

This should be sticky, amazing guide!

Z_LIFE - March 14, 2013, 11:58 pm

Very helpful as I've decided to go with Blackshades.

brother12 - April 4, 2013, 11:37 pm

Amazing tut. I learn a lot .keep sharing

pwwrfull - April 4, 2013, 11:46 pm

Sick tutorial, Very in depth guide.

ericforeman - April 29, 2013, 2:39 pm

another HQ threat I have to save this one.

tambov - May 11, 2013, 2:37 pm

Big thanks for the detailed guide, learnt a lot!

GMRRR1 - May 23, 2013, 9:49 am

Great TUT, thanks 4 sharing that...

Sikes - August 17, 2014, 5:57 pm

Extremely helpful guide. Download is clean too ;)
