Thread: [Make Your Own Operating System In Some Minutes](#)

WarrioR™ - May 18, 2012, 12:56 am

Hello Friend,

Now i am again come with a new interesting topic , today High Quality Post based on Operating System. No No !! i am not going tell you about a new OS. My today post tell you how to make your own Operating System, Plz read again because i think that you think what i said in back line .

You think a g8t knowledge necessary for read forward but i say noop (no) because this OS create by you without any knowledge and totally free. So why wait for Amazing work let's start.

Step 1: First Go to below write website..
SUSE Studio

When you open this link then a page open like below pic, here click on "Sign In or Create an Account" , see below pic..

Step 2: When you done step 1 then a window pop up like below pic, where some account given , now click on any account for open which one you have already exist to you , then enter your account Username and Password , do not fear that secure.

Step 3: When you done step 2 then he asking access information of your account then click allow for forward process , if you don't trust so use fake account here.

Step 4: Now Select your OS template , if pic not clear so right click on pic and open image in new tab.

Step 5: When you select the OS then it ask about your OS name, you change name according to you and click on software tab , see below picture...

Step 6: Here select software which you want on your OS, see below pic...

Step 7: now go to Configuration and Select General , here you see at below your Username "Root" and select Password according to you. I select "toor" as default Linux Password , see pic...

Step 8: Now click on Personalize and select your logo and Login window background , you can also upload your own logo and wallpaper, see below pic...

Step 9: Now last work , go to Build and select your OS format , and after that click "Build" , See below pic...

Step 10: Now your OS start Build and when this Build Complete a download link come then you download you OS under 7 days.

Reply this is the gift for me by u in exchange of my work hard .

Enjoy your OS!!

Bookmarked for later use . Absolutely awesome mate :)

DaFreak - May 18, 2012, 3:30 am

Nice tutorial dude.Keep it up ?

Skatzi - May 18, 2012, 3:32 am

Honestly This isn't much of a tutorial, you can look up "how to make your own Os" and find suse studio's. Plus Its Linux Based if I am correct. So that would be rather useless.

RandomHoax - May 18, 2012, 3:53 am

wow i will give it a try ,looks so freaken hot

frgmt2 - May 18, 2012, 6:48 am

watch my new tutorial for how can we make a web browser :)

Roowie - May 22, 2012, 11:36 pm

Nice HQ tutorial, will definitely try this out when I have some more time. Most of the setting can be done within the basic installation but still nice because now you can make it easier to install.

mufasalives - May 23, 2012, 7:38 pm

posted your query in here i will try to reply as soon as

webdev77 - May 24, 2012, 12:49 pm

That's actually really cool. I mean it's not truly making your own OS, but it's at least a very customized OS. Unfortunately you cannot customize windows like this that easily.

vjbittu7 - May 25, 2012, 1:07 am

thank you i tried it out and it works successful
