How To E-whore using Apple iDevices

Personal Experience:

I started E-whoring on my iPhone when I wasn't doing very good else where. Almost immediately I had 100's of people sending chatting requests. I used the pictures I had on my computer and sent them to my phone using the app Video safe. This allowed me to have them all in a safe location and to use them when needed. I have made quite a bit of money considering I sell the pictures 'very cheap because I was kicked out of the house and need money for books.' There have been more doubters on here than on hte computer however and a simple 'preview' of one picture usually convinces them that I will send more. I have been called fake once and all I said was 'IDGAF what you think. Do you honestly think I want to have to do this? You don't know what im going through so GTFO' and that cleared everything out.

Terminology I will use:

Chat app- An app with a profile not just random strangers with no profile picture

Stranger app- refers to apps similar to Omegle text

Slave- I might use this term differently than most people, I'm not sure, this is the person I focus on the most usually found on a stranger app and use email after we disconnect. I use Omegle 2 since you can send pictures so I can show them what my whore looks like look like. Do not send nudes until later. You can [blackmail](#) this person!

Pedo- Just a bunch of random guys on a chat app who will immediately message you when you make the app.

What I use: (Not necessarily needed for you but these are very helpful!)

-VideoSafe (\$4.99 usd and well worth it)

It will allow you to add your photos and videos right to your iphone. You can make folders so if you are like me and have 109 sets of girls and 10,000+ pictures this becomes very helpful.

-WhosHere (Free)(Chat App) This is a great app for doing it, it allows people to view more than one picture of you so make sure you have multiple pics of your whore with regular clothes. I have an average of 180 new chats at anytime on here. Unfortunately they can see where you are (you can make it that the minimum is 20 miles so it doesn't hurt anything)

-theXchange (Free)(Chat App) The people on here are usually younger, about 18-24, they will still buy pictures but do not expect as many chats with people of this app.

-Stranger Chat (Free or get pro for \$1.99 usd) (Stranger app, obviously) Kind of like Omegle, this is where I found my Slave, it allows you to send pictures and has multitasking support.

-Omegle 2 (.99 cents usd)

-Paypal (Free) If you want to be able to use it from the Phone

-Email app (Usually Free) Find an app for whatever your fake Email is, mine is Yahoo and I highly suggest it.

-Whats Good (Free) (Chat app)

This app is GREAT for blackmailing because you can put your age as under 18 and people over that will still ask for nudes however you will be banned eventually if you put your age as under 18 and post that you are selling or get reported too much.

-MyYearBook (Free)(Chat app) It is kind of like Facebook, but not. They have a website so you can use it when you don't have your iPod. Out of millions of users my whore became the 15,000 most popular in around 4 days and I have over 80 awaiting conversations. Shoot people down and never rate saying that you have more class than that or something then after a few days post that you are willing to sell pics because you need the money but sound like you don't want to, immediately people may flame you, just reply that you don't want to but have to and eventually people will tell you they want to help you out. People will want to "meet up" or "want your number" just tell them you can't.

*These are the things I use, if you want an additional list I have other apps you may find more helpful. Just PM me

Pros:

-With 3g you can do this almost anywhere, which is good considering how many requests you will get.

-You can send pics in most apps and they are very discreet and not much to register, usually just an email and username are required.

-Free most everything is free and if you need points you can almost always get it from other people.

Cons:

-If you do not have 3g then you will have to use wifi which can be weaker than computer wifi.

-You will need to take the time to transfer your whores to your device.

-If sending a large set you may need to email them a zip or one-by-one if you, or they, do not want mediafire files for their computer.

-some apps have a limit to how many pictures you can send or they cost points, I was able to trade 10k points for one nude picture, plus you generate points every hour for free so you shouldn't have a problem.

-If you run out pic sending you will either need to lay low if people text you calling you fake until you regain unlimited picture sending (who's here only lets you send a certain amount of pictures at first then after a little bit you earn unlimited)

Hints/Help/everything else:

-This is an unsaturated source, please do not abuse it.

-I went straight at it and put that I really needed money and was willing to sell pictures on Who's here and theXchange and am doing very good, I made \$500 in one day.

-Only let them see 1 or 2 pictures, not including your profile picture, all with clothes.

-You may want to sell cheaper than you would on the computer.

-Make sure you seem like a girl. Many guys suck at doing this even though they feel like they are using a good job. Do not use words like OMG, say 'oh my gawd!! lol', say shuttup instead of shut up, use my instead of muh, especially when complaining like about your parents not helping you out to get money.

I can provide support for anyone who needs it, please leave feedback.

Hexicidal - May 18, 2012, 11:16 am

Hmmm damn, this is a good tutorial. It includes aspects that are usually left out when e-whoring.

Great job Tarn. I would love to see what else you could do!

EXPLICIT CONTENT - May 18, 2012, 11:16 am

Thank you and I will try this out!

I was looking for this.

JX? - May 18, 2012, 11:20 am

Nice tutorial Tarn.

You should do more of these ;)

Soarin - May 18, 2012, 11:23 am

Good tutorial Tarn well your always good at things dont blame you

.kDS - May 18, 2012, 11:39 am

Nice tutorial Tarn.

Awesome tut, awesome in general :D

#V1rus

Tarn - May 18, 2012, 1:00 pm

Thanks for the feedback :) please post if you get any nice results

nitoh - May 18, 2012, 1:36 pm

thnx bro will definitely check this out.

got an iphone but now i now how to make money with it.

keep the tut's coming :D

Kaede - May 18, 2012, 2:06 pm

I will try this out later, nice tut keep it up.

SIM-668047 - May 18, 2012, 2:43 pm

Thanks for making this tutorial!

Its really HQ!

Soulmate - May 18, 2012, 2:47 pm

Good job, I'll be trying this later.

EXPLICIT CONTENT - May 19, 2012, 12:16 am

Tryied it out.

Earned me 20\$ from one guy in first night not hard. He gave me £3 per picture.

Thanks bro, it totally works!

A tip for you guys! Download iFile, in safari link to a mediafire ewhore pack download (make it .rar) and when it's ready,

open in iFile, use Unarchiver. This will extract the .rar into your var/mobile/Documents, now if u open the pictures at the bottom

you can see a folder with a arrow pointing down on it. Press that to get the necessary pictures to your Camera Roll.

(The ones you are going to use in E-Whoring)

henkieturbo - May 19, 2012, 2:32 am

Damn this is a good tutorial, gonna try this out in a few days i think. Thanks!

-Henkieturbo

Cristiano Ronaldo - May 19, 2012, 4:20 am

now this is what im looking for the past few days.. thanks mate, :)

MinecraftGeak - May 20, 2012, 12:01 am

Nice tutorial! Really cool idea :D but how does your paypal not get limited if you earned 500\$ in a day :0 and can you pm that more advanced app list?

Cristiano Ronaldo - May 20, 2012, 12:32 am

how come theXchange app says it is not available in US store?

MinecraftGeak - May 20, 2012, 2:16 am

^^ I couldn't find it either but search on google for cracked IPA if you really want it

PhilippKing93 - May 20, 2012, 5:15 am

thank you so much for sharing this, i will give it a try ;)

Justice - May 20, 2012, 8:49 pm

Great thread, this will help out many people thanks!

Sanch0 - *May 24, 2012, 2:51 am*

thanks so much, will have to give this a go! :)

xyz iz lawless - *October 8, 2012, 3:54 pm*

what do you do when your paypal has a guys name attached to it!!!

DubIA - *December 10, 2012, 6:54 pm*

Nice tutorial Tarn.

Awesome tut, awesome in general :D
