Thread: [is it possible to infect a link with a RAT server?](#)

guyson - May 19, 2012, 11:40 am

is it possible to infect a website that if u click on it the file will automatic get in your computer.

im pretty sure its possible but how?

SIM-747559 - May 19, 2012, 11:41 am

Java Drive By or other exploits make this possible.

Wopy - May 19, 2012, 11:41 am

u Mean a JDB u go to the site they say allow then u Ratted them that's the only wat.

Snoweyes - May 19, 2012, 11:41 am

I have readed before it is possible by using java on a website

AlphaAce1 - May 19, 2012, 11:43 am

JavaDriveBy is the Solution :) If you want to buy there are alot in the Marketplace (FOXXY one is great) & you can also get one for free but just the JDB

guyson - May 19, 2012, 11:43 am

and some 1 know how to do it with java?

AlphaAce1 - May 19, 2012, 12:13 pm

@guyson yes :) some people setup for free & some for paid
use the search button & you will get yourself a tutorial :)

Does Javadriveby's work anymore?

If not, Is there any way to have people auto-infect on visiting a link?

User2020 - December 11, 2020, 7:36 am

Java Drive By but actually i think all of these things are detected by AV'S

I just didn't feel like making a new thread

So the drive bys work but they aren't undetectable, right?

Hmm this thread is from 2012 haha.

EDIT: Saw the reason you posted, sorryyyy <3

No worries bruh!

(Dec 11, 2020 09:02 AM)Features Wrote: [\[CITE\]](#) The java drive bys are pretty much all patched now bro.

So there's no way now to infect directly via visiting link? :(

With the java applet attacks, I don't think so, unfortunately.

User2020 - December 28, 2020, 7:34 pm

try java drive by but the victim need to have installed java on his pc
