Thread: [Nvpn](#)

PardeeandCurtin - May 19, 2012, 5:43 pm

Im about to buy Nvpn, im wondering where I should have my server located. Ex: USA, Russia, Etc. I want the best one.:)

The choices are here:

https://nvpn.net/order.php?step=1&utm_source=nVPN+Site&utm_medium=nVPN+Site&utm_campaign=MonthlySharedIP

I'm about to buy there too, gonna subscribe to this thread and hope to get an answer too :P
If I wouldn't have anyone to help me with this I'd choose USA, UK or Sweden.

Slayster - May 19, 2012, 5:45 pm

Netherlands is probably the best, In my opinion.

Could you tell us why? :P
Is it the safest connection or the fastest?
I'm a noob with VPNs and all that, sorry ?

I would like to know as well. Also, will I need to portforward anything, as I have a little trouble doing all that. Or will I just need to download it, and run it?

This is why I chose nVpn.
It automatically portforwards for you, so no need to worry about that :)

What do you mean by free time?
If you mean this wait time for PayPal first time users bla bla, then please hit me up and explain what I need to do or whatever.

There is no "best" server. It is down to user preference.

Foco - May 19, 2012, 6:04 pm

Well I'm assuming your buying this for nefarious purposes so you should pick an off shore location. I.E the less modernized the better. I would go for Ukraine or Turkey

Mohatu - May 19, 2012, 6:07 pm

I wouldn't choose anywhere in America. Sweden is a good option.

s7yle - May 19, 2012, 6:08 pm

Alright, I just chose UK now as I prefer UK in general.

I paid and it went all smoothly.

Waiting 2 days now to see what's happening and such.

By the way, at the guy above: I can't PM yet, so I couldn't send you my E-Mail and such for the referral thing.

UK is offshore, isn't it?

UK is offshore, isn't it? Well America is offshore to me because I live in Canada right? But there is still heavy law enforcement in all "major" countries. Therefore it is easier to get V& in any major country like America, Canada, UK, Australia. Even places like Germany and Sweden have a decent amount of law enforcement. Where as places like Turkey, Russia, indonesia etc. the government and police force are constantly in corruption and chaos. So they don't pay attention to cyber crimes and do nothing (usually)

Well, I live in germany and you can basically do whatever you want.

As long as you download from offshore hosters you're pretty safe ?

dawnofwar - May 19, 2012, 9:59 pm

Lol why did you go with the UK?

If you are going to use it for illegal purposes, UK is the worse location for a server.

I would've gone with Russia, as that is a communist country who hates the US and other non commy countries.

I'm pretty safe here in germany, I could've chosen every server except the US one :P

Well, I have used openVPN in the past and I would say choose Russia or Sweden if you are going to be using it for illegitimate reasons, although you might want to pick a server that is closer to you if you want to optimize speed.

Yeah, this is the most important part to me, the speed.

I guess I'm good with what I ordered.
