Password Generator

By sh4d0w`

Released by Dream Warrior

What is included:

main.cpp (Source Code)

PWListGen.exe

settings.ini (Config file)

What does it do ?

Charset 0-9,a-z,A-Z, etc...

Generates Passwords.

Tells you the file size, and completion rate.

How to use it ?

Step 1: Extract the "Zipped" file, any where on your hard drive.

Step 2: You'll see three file "main.cpp", "PWListGen.exe", and "settings.ini". Click on "settings.ini", edit it to your liking.

Step 3: Save the edited file, you just edited (Which is settings.ini). Then just click on "PWListGen.exe", and it does all the work.

Rules

Post here, and I'll PM you. Or just post here and PM me so I can get to you faster.

Wait, what?

You need an encrypter to encrypt your passwords.

Which can then be de-crypted ?

On topic. If this was coded in a form, I wouldn't respect it as much. This is beautiful.

On topic. If this was coded in a form, I wouldn't respect it as much. This is beautiful.It doesn't need any damn encrypting, why in helll would it need encrypting. This software is for making a big list of passwords. So you can crack websites.
