Thread: [The Matrix \[hackers, coders, etc.\]](#)

FantaŠec - May 21, 2012, 2:37 pm

The Matrix Is A Group Of Elite 'Blackhat' Hackers. The Matrix Consists Of Security Experts, Coders, Ratters, DDoSers, etc...

We Plan To Operate Similar To The Group 'Anonymous', But With A Centralized System, A Closed Door Recruitment System, And With Elite Status.

In order to join, you must be accepted by me (Fanta) or a co-leader (Undecided).

There are no requirements directly associated with Hack Forums (such as post count), but only of your skill level.

(Forgive for the graphics not being perfect, we are a group of hackers, not GFX masters.)

What things have you coded:

After applying, dont forget to contact Frostin8897 on Skype.

Please allow up to 24 hours for your application to be reviewed and be accepted/denied.

Chris ?ansen - May 21, 2012, 2:42 pm

Name: M4D_DA5H

Age: 14

What forms of hacking do you do: Website hacking mostly

When did you start hacking: 7-8 months ago.

What things have you hacked: Disney, Goodsam.org, Harvard.edu, and many other things.

What coding languages do you know: Going to learn C++ and Java this summer

When did you start coding: Haven't yet.

What things have you coded: Nothing yet.

Burn™ - May 21, 2012, 2:42 pm

Damn looks nice, but i can't join since ratting isn't hacking :/

Eplexx - May 21, 2012, 2:44 pm

Name: John Doe

Age: 10, damn.

What forms of hacking do you do: I've done a lot of things that I would rather not discuss on a public post. I've done web design, graphics, hacking, social engineering, flash, video editing, audio editing,

modifying things, ripping themes, ripping a lot of things and a whole bunch.

When did you start hacking: At the age 14.

What things have you hacked: I can't really discuss that in a public post.

What coding languages do you know: I know css, html, some php and a few others. I'm mostly into web design but I'm a tech nerd in some aspects.

When did you start coding: I started learning a lot of things when I was 14.

What things have you coded: I've coded a few custom vBulletin themes, mybb themes, a few .net programs but that was a long time ago and some other things that I'd rather not discuss in a public post.

Invicta - May 21, 2012, 2:49 pm

Name: Ares

Age: 69

What forms of hacking do you do: Exploits

When did you start hacking: 69 years ago

What things have you hacked: Plenty of 'booters' using the Jeejeepower source

What coding languages do you know: VB, Delphi

When did you start coding: I don't know

What things have you coded: Annoying malware, ransomware.

FantaSec - May 21, 2012, 2:57 pm

(May 21, 2012 02:42 PM)Burn™ Wrote: [\[CITE\]](#) Damn looks nice, but i can't join since ratting isn't hacking :/

Actually it is, I will edit main post.

Bacardi - May 21, 2012, 3:34 pm

Hacker/coder as in Hacker and/or Coder? Question before I post my app.

FantaSec - May 21, 2012, 3:35 pm

(May 21, 2012 03:34 PM)Bacardi Wrote: [\[CITE\]](#) Hacker/coder as in Hacker and/or Coder? Question before I post my app.

Either/or it is more likely to be accepted when you are both.

Bacardi - May 21, 2012, 3:42 pm

(May 21, 2012 03:35 PM)?anta Wrote: [\[CITE\]](#) Either/or it is more likely to be accepted when you are both.

Alright, I'm not a coder. But I'm going to give this a shot.

Name: Bacardi

Age: 20

What forms of hacking do you do:

SQLi, LFI, RFI, Rats, Stealers, Keyloggers.

When did you start hacking:

Around the age of 15.

What things have you hacked:

Mostly websites, rooted a couple. Not anything major.

What coding languages do you know: N/A

When did you start coding: N/A

What things have you coded: N/A

Reason why I would like to join:

I've never actually been in a group before, and I think it would be a nice experience. Exchange methods etc.

And I've been away from the hacking scene for awhile, but got back into it some time ago.

Thanks.

FantaSec - May 21, 2012, 3:47 pm

Accepted, Pm me for more information and what to do.

James Kirk - May 21, 2012, 4:36 pm

Name: z5z2z (Quinn)

Age: 15

What forms of hacking do you do: Manual SQLi, XSS, IRC/HTTP/Twitter Botnets, Cracking, BitCoin Mining, Account Stealing/Hacking, Keylogging, RATs.

When did you start hacking: July 2011.

What things have you hacked: Teacher Emails from my school, RSwalmart.com, and a few other foreign sites.

What coding languages do you know: Batch, PHP, Html, Vb.net, VB6, SQL.

When did you start coding: January 2011.

What things have you coded: Various Fake Programs, IP Grabber, File Spoofer/Icon Changer/Pumper, Personal website, and a very simple autotyper/clicker.

Not really a coder, but I know the basics of these languages and can code simple software/websites .

Well thank you for reading this, hope to get a response soon. ?

Re?erence - May 21, 2012, 4:49 pm

Name: Shell Rotation

Age: 19

What forms of hacking do you do: RATs, DDoS, Scripting, and hijacking.

When did you start hacking: 10

What things have you hacked: Minecraft.net (that's why I got rep fucked.), Several Xbox kids(Ratted), and my cousin (RATed him also), and last but not least hit alot of skids offline.

What coding languages do you know: Perl, and Python

When did you start coding: 2 years ago.

What things have you coded: Several DoS Scripts.

DeadLine - May 22, 2012, 1:50 pm

Name:

Hello, my name is DeadLine. Nice to meet you !

Age:

I am currently 17 years old. My birthday is on the 28th of october, so it is not that long until I turn 18.

What forms of hacking do you do:

I hack/decompile applications.

When did you start hacking:

Depends on your meaning on hacking, but I started hacking applications about 2 years ago.

What things have you hacked:

Applications.

What coding languages do you know:

My first language I learned was Visual Basic Script. Soon after I learned VBS, I decided to learn batch. It did not satisfy my need to code, so I started learning Visual Basic. A year later I learned C# because it seemed like a more stable language. Right now I'm thinking about learning C++ because many people speak highly of it, and because it is just another challenge that needs to be completed.

When did you start coding:

I started coding a couple of years ago, I think I was 13 or 14 years old when I started with Visual Basic Scripts.

What things have you coded:

<http://hackapps.net/?p=289>

<http://hackapps.net/?p=151>

<http://hackapps.net/?p=275>

<http://hackapps.net/?p=251>

<http://hackapps.net/?p=248>

<http://hackapps.net/?p=242>

<http://hackapps.net/?p=219>

<http://hackapps.net/?p=215>

<http://hackapps.net/?p=163>

And so much more !

D3r1v4t1v3 - May 22, 2012, 1:59 pm

Name: Sam.

Age: It's rude to ask. I meet the minimum requirement.

What forms of hacking do you do: RAT'ing and keylogging mainly but also a little website hacking in terms of defacing & SQLi

When did you start hacking: Few years ago.

What things have you hacked: Have you heard of plausible deniability, lol?

What coding languages do you know: VB, PHP & a little C#.

When did you start coding: About 5 years ago.

What things have you coded: The only large project i.e. not just for tinkering sake or for educational purposes would be my keylogger found at: <https://hackforums.net/showthread.php?tid=313840>.

Loiter - May 22, 2012, 7:29 pm

Savsal14 - May 23, 2012, 7:49 am

Name: Savsal14 (I won't release my real name on a public forum)

Age: 17

What forms of hacking do you do: Sqli, xss, botnets, ratting, keylogging, some javascript injection, htmli, I know many vulnerabilities (i can't list them all here)

When did you start hacking: when I was 13

What things have you hacked: MIT,

Yale, telesensory.com, i-p-p-c.com, sisonlgu.gov.ph, cdb.gov.bt, outstandingguitar.com (selling 643 accounts from there), hana-yi.com and many more!

What coding languages do you know: basic html, batch.

When did you start coding: I just started learning

What things have you coded: A school server hacker in batch. A very basic website.

Baghead - May 23, 2012, 7:52 am

PM me!! I can make a thread layout for you:)

fobber - May 23, 2012, 8:33 am

Name: Fobber.

Age: Would rather not tell here. But I do meet the requirement.

What forms of hacking do you do: I can do manual SQL injection. I'm mostly doing XSS though. I also have some experience with LFI. Those are my three main things, you could say. I'm not really much into the black hat thing, I'm more of a white hat. I hope that's okay?

When did you start hacking: I'm rather new at this subject. I started About half a year ago I guess.

What things have you hacked: I've hacked and exploited expert.dk, it was just a simple persistent XSS in the comment field. Don't really know if that counts as hacking. But I'm not really exploiting anymore, I'm mostly just finding vulnerable websites, reporting them to the website owner, and then getting rewards. Have gotten \$200 giftcard, cinema tickets, 10 DVDs and other stuff. Getting rewards seems better than going to jail.

What coding languages do you know: I've been doing PHP for quite some time now (this includes, html, css, a bit javascript).

I've written some Python too. Made scripts for Counter-Strike: Source once, and these were written in Python. EventScripts Python actually, but it's really just a library to Python.

I've been at a three week course, where I learned developing for Android. This was done in Java.

When did you start coding: PHP was two years ago, I guess.

Python was probably also around that time.

Java for android development is like a month ago.

What things have you coded: In PHP me and a friend has a website, where we make websites for other people. We haven't really made many websites, but none the less, it gave us some experience.

I once made a website where you could stream television. It got quite popular within a short time. Within 2 days we had over 2000 hits per day. The website only existed for about 5 days before we were forced to take it down, due to some copyright infringement.

In Java I've made an Android app, where you could click at some animals, and it'd then play a sound. Like if you clicked the cow, it'd play a "Moo".

Another app I made was a hash thing. Where you could put in text, a salt, and then the hash algorithm you wanted to use, and it'd then give you the hash value.

Yeah well. I've made tons of other small things. But I'm mostly just helping out in the PHP section! :)

username.txt - May 23, 2012, 9:06 am

Name: username.txt

Age: 19

What forms of hacking do you do: SQLI, hardware

When did you start hacking: 3 years ago, ish

What things have you hacked: nothing, I merely test sites for vulnerabilities, I don't use them.

What coding languages do you know: C, very little ASM, a fair amount of PHP, Javascript, I'm not counting HTML, XML, or CSS as they aren't really coding...

When did you start coding: I got more serious into C at age 15, for MCU programs for robotics, but had played around a little with HTML at age 9.

What things have you coded: Several robots([youtube](#) has some videos), maze solving algorithms based on sensors, MCU -> LCD interfaces, LED matrix interfaces... and web things: An OOP CMS still under development, several custom sites, I made a recursive square root calculator that was fun.

Dialga - May 24, 2012, 5:14 pm

Name: Lucas (Gootch)

Age: 15

What forms of hacking do you do: RAT's, SQLi, XSS, Shelling, DDoSing

When did you start hacking: I have been hacking for about a year and a half now. I have learned many things from RAT's to Web Hacking.

What things have you hacked:

A recent deface

<http://www.moby-dok.com/Gootch.html>

I have also defaced other sites. I have written many tutorials.

What coding languages do you know: I know a little C but other than that I am mainly a hacker. I do know HTML and Javascript and CSS.

When did you start coding: When I was learning Security.

What things have you coded: Generators, Fake Viruses, Youtube bots.

Thanks for reading my application. I hope I get accepted. Thanks.

White Lightning - May 24, 2012, 5:31 pm

Name: White Lightning

Age: 16

What forms of hacking do you do: Webhacking skills include: XSS,CSRF,LFI,RFI, and all forms of SQLi and don't forget r00t, buffer overflow and more. A little knowledge of RAT's

When did you start hacking: On my own

What things have you hacked: That will remain Confidential

What coding languages do you know: HTML, little vb.net

When did you start coding: About a year ago

What things have you coded: Deface pages,Simple HTML sites.

I'm not a Skid but I don't Deface sites, I dump them. I don't hack random sites either

NoCheatPlus - May 28, 2012, 1:23 pm

Name: Frozen-Solid

Age: 14

What forms of hacking do you do: Website, Game Server, (Mainly Coding)

When did you start hacking: 11

What things have you hacked: Backdoored some MC Servers, Hacked Websites, Made fake MC Mod for victims.

What coding languages do you know: Java, VB.NET, Some(Php, MySQL)

When did you start coding: 10

What things have you coded: BTC Miner, Many MC Plugins (Backdoors), Random Php Scripts(SmS Bomber)

Hellian - May 31, 2012, 11:06 pm

Name: Intensive

Age: 17

What forms of hacking do you do: SQLi, Man in the Middle, JDB, and RAT

When did you start hacking: 3 years ago

What things have you hacked: School servers, cafe wifi, numerous websites (several of which were defaced)

What coding languages do you know: Visual C++, Visual C#, Visual Basic, Batch, Javascript, Assembly.

When did you start coding: 5 years ago

What things have you coded: Mostly visual applications relating to my own needs. I've created my own DDoS tools and a few trojans, as well as several programs that hack for me whilst I sleep.

SIMULACRUM - June 1, 2012, 12:09 am

.: [?] .:

Name: .: [?] .: Hiere?ia?TM

Age: 17, yet I am very mature for my age.

What forms of hacking do you do: Advanced RAtIng with impressive and unique spreading methods for RATs. Currently learning how to use my new HTTP bot for herding my botnet.

When did you start hacking: 3 years ago. Note, you may have seen my thread a few days ago, I have dedicated my life to hacking, and would therefore think I am the ideal applicant to be accepted into this group.

What things have you hacked: Nothing I plan on saying in a public forum.

What coding languages do you know: Java, and am working on my C++.

When did you start coding: Age 10.

What things have you coded: Never coded anything of value. Simple calculators and GUIs.

Review - June 1, 2012, 2:23 am

Name: Review

Age: N/A

What forms of hacking do you do: Everything within the 802. protocol, in all honesty I maintain a small level of experience with system penetration.

I know the all around basis of everything down to about the binary level, theory is a powerful weapon if used correctly.

When did you start hacking: Around 3 years ago when I first acquired my machine.

What things have you hacked: Library, Insurance Agency and some other SOHO here in my local area.

Personally most of my work is done physically through wireless. I've done the usual stuff, gain access to 70+ machines through MFW once that was pretty neat.

What coding languages do you know: Programming languages none, only a bit of scripting so.. PHP.

When did you start coding: Around 2 years ago I started at a bit of C#, turned it own after a short period of time.

What things have you coded: N/A

Personal Note: I'm completely for the idea of a none requirement association with Hack Forums, being that the most wisest of members don't go around spamming the forum but instead provide effective and helpful post to serious discussion only. Most of the time regular members with negative reputation turn out to be the smartest because of there knowledge they carry but get shunned for outsmarting the average 16 year old ub3r, hence the red reputation that follows for proving them wrong.

Shadows - June 1, 2012, 3:43 am

Nice group Fanta, shame about being unofficial, but that'll be fine.

inurl - June 1, 2012, 4:19 am

Name: Inurl

Age: 30/35

What forms of hacking do you do: Sqli , backdoor ,Man in the Middle , Pentesting , ect.

When did you start hacking: Around 13 years ago.

What things have you hacked: inform you in private and show you proofs.

What coding languages do you know: PHP , Pearl

When did you start coding: Hobbie.

What things have you coded: N/A

Personal Note:im here to learn more everyday and teach what i know , friendly and i can spoke a few landguage like french , english , spanish, always here around.Now im learning a bit of coding.

KarSticx - June 1, 2012, 6:33 am

fobber - June 3, 2012, 11:43 am

I see that the original post has been changed so that it now contains "Blackhat".
This is not what I've been looking for anyway then. Auch. I really thought this was the group I had been looking for.

I'm out. Sorry for wasting your time. But I'm a whitehat person. Or greyhat maybe.
