Hello hf, been thinking about trying ewhoring. But the last time i tried to setup a paypal they limited it. ? I dont have a bank account to verify. Is there any way around getting limited and still being able to send/receive money? ?

I would love to know a way too. Paypal limitation sucks. :(

Is it a canadian paypal? Also, do you use a VPN with different IP addresses? Another thing is, when you receive money, do NOT send it immediately, PayPal will think something fishy is going on, and therefore they limit you. You need to wait a couple hours and create a donation link to send to your real paypal.

What do you mean?

you can still send/receive money when you haven't set up a card.

keep the payments small, anything too big and paypal will limit you. Also dont let a big balance build up because if you get limited then ur loss is bigger.

@OP

if you want, I'll take the payments for you and order/buy w/e you want online for you.

Let me know.
