Thread: [MsSQLi?](#)

orunu - May 24, 2012, 3:12 am

Hey HF, I haven't looked much into MsSQLi so are these just regular server errors or MsSQL errors? im asking cuz these are very high profile sites and if they are vuln then >;D

Yeah, that's definitely NOT a MySql Error.

A good example of a mysql error is:

Code You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near "" at line 1

Hope that helped.

-Steve.

-Steve.

yes because MsSQL and MySQL are the EXACT same thing.

Th3PonyWizard - May 24, 2012, 3:23 am

95% That you can't use the first one.

And judging by the second error's explanation , it seems also useless, although I never stumbled that error.
