Are we allowed to host SMS/EMail flooders, shells, [legal] porn, etc, etc?

Big vouch for MY boy Fanta. The BEST hosting you can ask for and the service is every FRIENDly!

Would be nice if the 'little cunt' could get host details to send when completing an order, inc name servers. guess that's a bit too complex to handle.

Would be just as nice if the customers could actually use a working email...

So little update since my purchase. The support is amazing. Honestly never seen such great support. Fast answers and there is a live chat. My website has had no issues with downtimes and the ONLY issue I've had, was additional security, and that is not an issue at all to most people. Plan on using you guys for quite some time

FantaŠec - May 30, 2015, 2:45 pm

We will also be adding spoofing and scanning servers with our rollout of KVM and the game panel :)

Vouch for service - @OP is amazing at what he does :)

Magicmann - June 5, 2015, 9:34 am

Just thought I'd throw it out there that I'm now a part of the Host Dark team. There's great things in the works and I doubt there'll be any disappointment.

Anonymous• - June 9, 2015, 9:13 am

Support is great at Host Dark, response is normally lower then 2 hours, vouch for Fanta!

Esme - June 11, 2015, 10:11 pm

Vouch for Fanta. He's a funny looking dude but he runs a solid business. Had a 512MB VPS from Host Dark back in September to run a TeamSpeak server, excellent network and no downtime that I was aware of.

Anonymous• - June 12, 2015, 6:30 am

Congratulations on your four year anniversary!
Keep up the good work.

Hello,

You can buy dedicated servers and also we do NOT ignore DMCA reports, we forward them to the client on the first one, second one termination and third suspension from our services.

Thanks

Was told there would be windows vps within 7 days. Its almost 7 days since I paid for the centos vps I don't need right now. When are the windows vps going to be added. Or was that just a trick to get me to pay early.

Don't worry, Windows VPS is on it's way. I know it's been a hassle for you. Austin is working on it.

And you will be compensated for the days of your VPS, we would never trick you into paying early.

New Post for an actual review:

I've been with Host Dark for a year now. Within that year my server has not gone down ONCE, that's right not ONCE. My server has been online 24/7, whenever I need my server it's always there. Speeds on the server are stunning, they are blazing fast and get the job done no matter where you are, I'm currently hosting a web server on it and I get lots of comments from people around the world asking what I'm using to have a web page located halfway around the world load SO FAST.

Support is prompt, I've personally never had an issue with my server therefore I haven't had the need to contact support for issues and such but I've contacted support with many questions only to receive a detailed response within just a few hours. Definitely going to recommend these guys to anyone and everyone.

FantaŠec - October 30, 2015, 2:41 pm

We have also redone our pricing on Dedicated Servers and Game Servers. Our thread will be updated soon, but for now, they are practically 50% less, not taking into account our discounts.

Emoticon - October 30, 2015, 8:37 pm

I was going to say something bad about this like I do on every other sales thread on HF, but this is

pretty cool. You know what you're doing more than some of the most well-known hosting companies.

Anonymous• - November 6, 2015, 4:00 am

Ehhhhh, been with Host Dark for nearly a year. I can say honestly it's 99% Uptime. Vouch for this company, going strong af.

FantaŠec - November 23, 2015, 6:33 am

We have upgraded our DDoS protection and added a few new promotions as well as staff members. Enjoy the upgrades :)

markeloff - November 26, 2015, 12:32 pm

Vouch for HostDark, been with them for a while and honestly it's really a great hosting. Prices are more than affordable, setup was instant and never faced a problem with them. However I had few questions and their support answer pretty fast. Don't hesitate to order from them, you won't be disappointed.

HiddenEyE - December 19, 2015, 1:59 am

Xepher The Cat - December 19, 2015, 2:58 am
