Nice, but with "You can host any LEGAL images" does that mean i cannot upload music/film
covers? because i upload music and films on a site and the imagehosters likes to delete the images.

I would like to say this is pretty good host but in my opinion, you maybe can change the background of the heading BioHosts.

Dont try hussling me for more money.

First off i couldn't edit all those screens like the paypal and second off i will share my screen with any admin right now and show my paypal not receiving a payment from you EVER, and if you didn't scam me then why would you change your name and deny ever knowing me but just act like you paid me in your last comment? You do nothing but lie and get caught in it! Keep digging buddy and until you pay me yes i will post you are a known scammer in all of your posts so others know even if they are free giveaways. You scammed the wrong person i will never give up till im payed or you are banned. I have proof that you scammed me if im trying to get money from you why not post proof that you payed me you liar...oh thats right you cant post it cause you didn't pay. You are scum scamming over 25 dollars.

EDIT: ALSO don't think you looked at my paypal close enough the picture isn't old i have a payment in there i recieved with TODAYS date from blizzard from an item i sold in the diablo 3 auction house so quit trying to lie and be a man and admit to your deceit .
