Shoutout to the RATs Crew

N3p BoY - May 24, 2012, 11:57 pm

Whenever i try to extract the prorat from the rar it is detected by AV even if i disable AV it automatically enable AV and my prorat setup get deleted. :(

Can i have the undetectable ProRat by AV

Thanks for that.

DaFreak - May 25, 2012, 12:01 am

(May 24, 2012 11:57 PM)N3p BoY Wrote: [\[CITE\]](#) Whenever i try to extract the prorat from the rar it is detected by AV even if i disable AV it automatically enable AV and my prorat setup get deleted. :(

Can i have the undetectable ProRat by AV

Thanks for that.

You can add your ProRat executable to your RAT exclusions, It depends on the AV you're using.

If you need further help, don't hesitate to PM us.

PoS3!DoN - May 25, 2012, 12:09 am

Vouch for this service....I know Dafreak....He is really good guy...Hope people will find answer of

their problem here..

Good luck guys

DaFreak - May 25, 2012, 12:10 am

Thanks PoS3!DoN , If you need any kind of help in the future, Dont hesitate to come here and ask ;)

Mohatu - May 25, 2012, 12:16 am

Good luck with the help desk, it looks promising. I know most of the members of the panel, and they know their stuff.

Rourke - May 25, 2012, 12:20 am

A legit competitor ;)

You should get some sexy ass graphics instead of that brick of text.

I'm glad more people are helping around in this area.

DaFreak - May 25, 2012, 12:23 am

Well, I might get graphics, but it doesn't really matter. Quality is the key for us. Thanks. I might soon get a thread design.

blackeagle_mn - May 25, 2012, 2:28 am

need a test install... pming you my download link for my server

DaFreak - May 25, 2012, 2:41 am

Alright, Blackeagle.

If anyone needs help LMK.

.?cb. - May 25, 2012, 4:54 am

(May 25, 2012 02:28 AM)blackeagle_mn Wrote: [\[CITE\]](#) need a test install... pming you my download link for my server

I can run it in my vm if you still need.

blackeagle_mn - May 25, 2012, 5:32 am

vouch for this team.. gave me full rat setup and gave me test installs.. awesome members thanks a lot

DaFreak - May 25, 2012, 5:42 am

No problem, We're glad that we helped.

blackeagle_mn - May 25, 2012, 6:03 am

do you give help with setting up a jdb?

DaFreak - May 25, 2012, 7:04 am

(May 25, 2012 06:03 AM)blackeagle_mn Wrote: [\[CITE\]](#) do you give help with setting up a jdb?

PM us and we might try to help you out ?

Terrified - May 26, 2012, 9:44 am

I hope that we can provide some of the quickest assistance with setting up your rats :)

Quizzical - May 26, 2012, 9:50 am

Looks good, I'm sure many people will benefit from this thread.

DaFreak - May 26, 2012, 11:05 am

Yeah, but our thread isnt attracting many people to come and ask for assistance.

King Rammus - May 26, 2012, 12:08 pm

My RAT does pick the stub up when I upload it on Anubis, but it doesn't work when I try infecting a computer that has firewall off and it hasn't got an AV. Any idea why it doesn't work? Also, I would like a test install, I've PM'd you with my link.

opp - May 26, 2012, 12:27 pm

Haiph I am not a offical helper but I can help you. Please PM yuor problem and I can help.

DaFreak - May 26, 2012, 11:40 pm

We welcome Ireland to our group.
:)

Floppa - May 26, 2012, 11:41 pm

Can you guys help me do my port fowarding with cybergate?
Couldn't we do it through team viewer?

opp - May 26, 2012, 11:45 pm

Hello Floppa, It very late where I live, I can help you in the morning.

Floppa - May 26, 2012, 11:50 pm

Oh okay but I'll be on if anyone else gets a chances :P

Xparten - May 27, 2012, 3:28 am

Hello, I'm not sure if my RAT is working, I'll send you a install... thank you very much guys, :).

.?cb. - May 27, 2012, 3:48 am

@Xparten, send me you server and I run in my VM

dante96 - May 27, 2012, 5:34 am

hi, i've a question:

i created a server with darkcomet and now i want to fud crypt it... what crypter should i use?

DaFreak - May 27, 2012, 5:40 am

(May 27, 2012 05:34 AM)dante96 Wrote: [\[CITE\]](#) hi, i've a question:

i created a server with darkcomet and now i want to fud crypt it... what crypter should i use?

You can use any crypter which is compatible and with proper settings provided , You can get some free crypters at this section.

[Cryptography, Encryption, and Decryption](#)

If you want a paid crypter, look at the marketplace.

Incognitos - May 27, 2012, 5:56 am

I Was wondering if you could help me, i've setup no-ip and portforwarded and check on canyouseeme and its been forwarded correctly so i opened up darkcomet and made a server and crypted it with a free crypter and took it down stairs and opened it on my dads computer to see if it would work i went back upstairs and it says i have no users still?

DaFreak - May 27, 2012, 5:59 am

(May 27, 2012 05:56 AM)Incognitos Wrote: [\[CITE\]](#) I Was wondering if you could help me, i've setup no-ip and portforwarded and check on canyouseeme and its been forwarded correctly so i opened up darkcomet and made a server and crypted it with a free crypter and took it down stairs and

I don't know which of you is online so I don't know who to PM

PM me with your TV info

gufrion - May 27, 2012, 6:16 pm

Having some issues that I didnt have before. Just wondering if anyone could help. Go DC 5.2, server all set up, ports and blah blah. It all works. Running the server in sandboxie shows me pop up on the list. All's good. However, when I crypt the file. no matter what options I use, I can't seem to get it to come up in Sandboxie. Is this normal? Wouldn't think it should be, but I dunno. Anyway, looking for assistance. Thanks guys

FluffyAndWild - May 27, 2012, 6:21 pm

I seem to be having issues with appearing in my RAT's user list.

Not sure if this is Port forwarding related or not, though.

undeadkorean - May 27, 2012, 7:36 pm

I have some issues with setting up my rat. I run the RAT on myself and with my AV disabled I disappear from my Darkcomet list. What is the issue with that? I even ran it on a friend outside of the network, he stays then leaves after about 30 minutes. I will contact one of the members with the TV info for some help. Thanks in advanced.

Lonely - May 27, 2012, 7:58 pm

I have a serious question. What is THE BEST paid RAT? Money is no problem. If you could link me to it. That would be even better :)

opp - May 28, 2012, 1:17 am

Im here for the next 20 min or so, I will be helping solve any unsolved issues please PM me!

DaFreak - May 28, 2012, 1:24 am

(May 27, 2012 07:58 PM)Fact Wrote: [\[CITE\]](#) I have a serious question. What is THE BEST paid RAT? Money is no problem. If you could link me to it. That would be even better :)

The best paid RAT would be blackshades, however I cant say whether its the "BEST" Custom coded private ones are always the best.

Rulerzz - May 28, 2012, 6:42 am

I'll test your server if you wish. I'm set up and ready to help some people :> For those that need help, I read my PM's more than threads sometimes lol.

FluffyAndWild - May 28, 2012, 5:24 pm

I require assistance.

According to canyouseeme.org, my port that I chose is open. However, unless I use 127.0.0.1 and infect myself, my RAT does not work.

I have tried both no-ip and my own IP address.

Using telnet xx.xx.xx.xx 1605 suggests that the port is closed as well, but according to canyouseeme.org, it is open.

Any suggestions?

Terrified - May 28, 2012, 6:01 pm

Are you using a VPN? You chose the same port for both settings of your server, as well as manually port forwarded in the router? If you're using a VPN, they sometimes block ports too.

Best regards

WebServices - June 1, 2012, 4:46 am

I got a problem with setting up the VPN needed for the RAT, port not working so need port forwarding, furthermore if you could give me 5min for help on keyloggers it will be really appreciated. Contact me for anything needed or such.

creepshots - June 1, 2012, 7:49 am

Im trying to do a Java Drive By. It works on me, But when i tried to get someone on it Via SPAM, my target, said that it just said error and its not letting him run it (pretended it was a live stream) please help, PMing one of you now

Edit : 10 minutes later, He's helped my test my JDB =) +3 if i could!

bully - June 1, 2012, 8:27 am

Need portforwarding help I use to know how to fix my problem but not ratted in years :(.

DaFreak - June 1, 2012, 8:30 am

I've just sent you a PM Bully.
I will be helping you.

NomNomNom - June 1, 2012, 8:33 am

i vouch for DaFreak for doing test install

DaFreak - June 1, 2012, 8:35 am

No problem NomNomNom, I'm glad that you liked it
I'm busy assisting other members.

xbluebell - June 1, 2012, 8:47 am

Can i have some help or advices for spreading please ? :)
My skype : xbluebell-
thanks in advance !! :)

bully - June 1, 2012, 8:47 am

Vouch sorted me out quickly :) use them they cool.

DaFreak - June 1, 2012, 8:49 am

Yeah, I know I'm cool @bully. xD

Thanks for the vouch.I'm off some other operators will come when I'm sleeping.

cornelio1308 - June 2, 2012, 4:43 pm

although you dont mention it on this thread on your old thread you mentioned spreading help so id like that please? im pm'ing now

PaulRocks - June 2, 2012, 6:16 pm

Is there a way, to make it so when they run the rat, it opens a fake program? I basically wanted to spread the Rat using this tutorial:

<https://hackforums.net/showthread.php?tid=2504737&highlight=How+to+get+slaves>

And create a fake program, that says a bunch of bullshit like "Cracking Minecraft Accounts" , and at the end, says "Error ocured. Please try again later"

Would there be a way, to make it so the program says that stuff, but secretly opens the RAT? Also, i could just say its a false positive, because its a hacking tool (I don't have my rat Encrypted)

Also, could you link me to what crypting actually is? I can't find one. :s

If you could tell me how to do that stuff^ I would be extremely grateful. Thanks!

~Paul

?osmo - June 2, 2012, 6:42 pm

Please don't tell me to get a VPN! I cannot connect to HF with it on! Its a pain in the ass to enable and disable just to open up my RAT!

So whenever I try to Portforward this happens.

Serial Menace™ - June 4, 2012, 3:14 pm

okay I need some help with my Dark comet server, I need to spread it but without binding with an image, I use Sheikh crypter and it isnt crypting my blackshades FUD and if i add any specs like extension spoofer it wont come out FUD. Is their a way I can spread? my DC server is FUD but My java drive by is also getting an error and im confused because i been using a JDB for so long and never had this problem.

sword981 - June 4, 2012, 3:24 pm

Could you please help me with forwarding ports? Thanks.

hack1ngPrO - June 5, 2012, 12:16 am

i successfully port forwarded, rat is ok and i can infect myself. on the other hand, i can't crypt the file. it is crypted and FUD, but server is not installed on system... i use dimension crypter. my rat is darkcomet. am i doing something wrong?

Pohaku - June 5, 2012, 12:42 am

A couple of questions about Darkcomet RAT:

I've been testing a DC RAT (5.2), crypted with Dimension and operating without a VPN. (I'm friendly testing right now.)

I can see my slaves fine, but I have a problem with the refresh rate on most functions. Even those that show up a ping of <100 are very slow. I'm talking about a refresh rate anywhere from 20 seconds to 5 minutes on both webcam and on remote desktop. In File Explorer it can take a minute to show the contents of a folder if it's got 100 or so files in it.

I will ultimately need a RAT that gives me a remote desktop refresh rate of maximum one second, and what's more I will need a livetime delay of no more than 10 seconds.

Is this possible with DC, and if not would a paid RAT like Blackshades make it more likely? Anyone have any idea how I can improve the speeds now? Or am I in dreamland?

Any advice appreciated.

Poh.

Jerak - June 5, 2012, 12:58 am

Im using Dark Comet 5.3, and i recently shut down this persons computer, and when he turned it back on, it didnt show up in the list, is there an option to auto run on startup?

Pohaku - June 5, 2012, 1:24 am

Jerak - yes there is. You can include this option when you create your stub, HOWEVER if you are using a crypter then it probably also includes a startup option in the crypt.

If so you should use the startup option in the crypter and not the one in the RAT server builder.

(If you didn't include it when you made the RAT you already gave to your slave, then I'd say you've lost him now until you give him a new version. Or until he runs the RAT manually again.

You should have checked "Active FWB" in the rat, you shouldn't add that because that corrupts your server.

When you come online please PM the online operators or Me if I'm online.

I will remotely assist you via Teamviewer regarding this. ?

Jerak - June 5, 2012, 2:41 am

Pohaku - I enabled Add to Startup in Dimension Crypter, then I tested it on my other computer, and I shut down that computer, restarted, and it came up. So, I'm still confused, might of just been a fluke, thanks for the help!

DaFreak - June 5, 2012, 2:44 am

Poh.

You can't really do anything about the ping, even myself when I use the remote desktop feature in darkcomet, I get it very slow and yes you can change the interval to 1 second if I'm not wrong.

Paid RAT can make it more likely but the connection speed and ping - There won't be much difference in this matter. However the client side may make some difference, You may try other

RATs like Cybergate if you want to ?

Johir, for some reason I cannot send you PM's. You must have disabled it.

Most likely reason you don't show up when you test it on yourself is the fact your probably using your external address when testing, (Eg, your WAN IP, or your No-ip DNS) and most likely your router/gateway/modem doesn't have NAT loopback support. Nothing to worry about, just when you test within your network use internal addresses, (eg, if your testing on the computer that is running the client use 127.0.0.1, if your testing within your network on a different computer use the address of the computer hosting the client).

Btw, sorry for posting on this thread

But i think Brock was wrong so thats why i just correct the problem

Send the link to [DaFreak](#) and he'll send you a test install.

You can upload the rat at <http://www.sendspace.com> .

rohit - June 5, 2012, 5:26 am

pm sent to him with the link to download the server....waiting for him now

looks like DaFreak is not online

anyone else interested in helping me testing my server?

here is the link:

<http://www.sendspace.com/file/vmgcj>

please help

iAmABanana - June 5, 2012, 7:36 am

Hi guy. I'll try to explain the best I can:

Two days ago my RAT (DarkComet) was working fine.

But the update came out yesterday and since then (not even downloading the update yet) I ran DC

and no slaves appeared.

I'm really really thinking it's a problem with the UPNP because when I use canyouseeme.org, it says that it failed and the connection timed out.

I also tried to manually port forward with my router login and I get this message
<https://gyazo.com/4abec2a454190f09d27ccb3f60a3d504>

Any help? Would like my slaves back : 'c

Zero. - June 5, 2012, 9:46 am

Um.. Do you know how i can earn some \$ off my slaves on RAT?

DaFreak - June 5, 2012, 9:51 am

(Jun 5, 2012 09:46 AM)ichigoborn Wrote: [\[CITE\]](#) Um.. Do you know how i can earn some \$ off my slaves on RAT?

You can run a bitcoin miner on it, That would be profitable , you need to some some good amount of slaves, The amount of money you'll earn depends on the slaves PC, graphic card, CPU, and RAM.

For example 50 bots from netherlands can easily make you 1\$ a day.

It all depends on the slave.

If you any questions please do let me know.

Zero. - June 5, 2012, 9:58 am

I have around 70 of them but how would i go about setting up a bitcoin miner?

iAmABanana - June 5, 2012, 2:43 pm

You get your victims to run a programme, and you get paid.

The more victims you have, the more money you can make.

DaFreak - June 6, 2012, 9:40 am

Depravity - June 6, 2012, 10:21 am

I can't seem to infect myself using a Java Drive-by attached with my Blackshades RAT's Server.exe with localhost (127.0.0.1).

I've had connections from the past with ease, but recently these past two days I am having difficulties for a victim to connect.

I can connect manually when running my infected file, but when I attach it to my Java Drive-by, I cannot connect when I accept/run my java applet.

My ports should be forwarded correctly, as when I run a port forward check, both of my ports & transferring ports seem to be open.

Could you please assist me?

J?ker - June 10, 2012, 7:52 am

I'm online, I am also able to crypt your server if you wish.

Jae? - June 10, 2012, 8:06 am

I'm in need of help. I PM'd one of your members and he said to come here and post my details, which wasn't very useful to me considering I don't have a clue what to ask you guys so, I'll just C+P

the message I sent to him.

Quote:A few weeks ago I had a few people trying to help me with my port forwarding. Long story short, it's fucking wierd. :')
They gave up and I lost motivation to RAT because I couldn't do it either. It's strange.

Could you possibly help?
Skype:

I'd love you forever.

7508626403 - June 10, 2012, 8:10 am

Can you crypt my server and give me test install thanks....

Insidious - June 10, 2012, 8:14 am

I'm in need of some portforwarding help. I have Verizon FiOS and I can get into the 192.168.1.1 and everything. When I click the 'Port Forwarding' option under the 'Firewall' tab, it gives me this screen and I'm not quite sure what to do with it...

Spoiler ([Click to View](#))

I'm just not sure how to go from here. And if it helps, I'm using DarkComet RAT w/ No-IP. Also, people tell me that you need to completely turn off the firewall but the Verizon Firewall tab only has 3 settings: Max (pretty much everything blocked), Typical (average firewall), and Low (everything allowed in and out). I currently have it on Low. Is that how I need it to be or is there an even lower setting?

Thanks guys,
~Insidious

+dUBSTEP - June 10, 2012, 8:16 am

PMing you right now ! :D ? lets try

Chanziz - June 10, 2012, 8:23 am

Can you please help me setup my RAT and crypt it for me thanks in advance.

WarrioR™ - June 10, 2012, 8:24 am

A small warning all our group members plz never use any licenced crypter .

its not allowed in HF

Thanks and best regards

My status : Busy ! Sorry guys :/ ?

WarrioR™ - June 10, 2012, 2:37 pm

I am verry busy atm so cant able to help anyone

Sorry guys

Jae? - June 10, 2012, 3:13 pm

When ratting with Dark Comet, you find that when the user is to switch his computer off, their name disappears from your users list. This can leave you confused on whether they are offline or they have uninstalled your RAT.

My question is, do any of the other rats not do this? For example, Cybergate or BlackShades? It would be helpful to see this as it's quite a pain not knowing.

Fluxert - June 10, 2012, 5:19 pm

could someone please help me setup a rat and jdb :(

DyingPuff - June 10, 2012, 5:56 pm

hey, i have just started using cybergate and i need someone to test it, i will PM you link. And thanks for doing this :D

Password. - June 11, 2012, 9:54 pm

can i please have the java drive by files please.

FearlessGrump - June 11, 2012, 10:44 pm

Should I get Black Shades NET or Fusion? Fusion is cheaper but Im doubting that it is as good as NET.

WarrioR™ - June 12, 2012, 1:52 am

(Jun 11, 2012 10:44 PM)FearlessGrump Wrote: [\[CITE\]](#) Should I get Black Shades NET or Fusion? Fusion is cheaper but Im doubting that it is as good as NET. Blackshades Fusion has relatively less features than BS NET.

In my openion you should go with blackshade NET. after the purchasing hit me up here i will setup your blackshade NET on your PC

Rock3r™ - June 12, 2012, 1:55 am

(Jun 11, 2012 10:44 PM)FearlessGrump Wrote: [\[CITE\]](#) Should I get Black Shades NET or Fusion? Fusion is cheaper but Im doubting that it is as good as NET.

Go for Blackshades NET unless you can't forward your port.

Blackshades Fusion has relatively less features than BS NET.

Can you open two ports on your system ?

+dUBSTEP - June 12, 2012, 2:11 am

Guys i am not offering more FUD crypts.. my crypter is now 5/36 !

zitanix - June 12, 2012, 2:40 am

Hello

im new registered user

i have try to send priv8 message to NAV1GAToR regarding RAT crypting but we should have 10 post :)

so i ask my question there:

i want a Crypter for making undetect my darkomet rats , if detected in futuer , provide us update we can pay for above service.

sorry if this post are out of forum rules

grEEkcr4ck3r - June 12, 2012, 3:10 am

Ok i make a darkcometserver then i try it on sandbox and it works..

Then i crypt my server i try it again on sandbox and it wokrs..

But then i upload it to 4shared.com and when i download it and try to run it it doesn't work???

Do you know why??

Thank you!!!

I use XML cryptor..

If I try to make a jave driver by??? Willl this work?

thanks in advance

delgar - June 14, 2012, 7:15 am

I have a slave with a particular game, and i have his password for the game, but when i goto remote desktop view and open his game to see his login name (email) the game wont show for me via remote desktop. I want to give this slave to someone else, so they can open said game from thier computer to tell me his login email.

can anyone help me? PMME

WarrioR™ - June 14, 2012, 8:09 am

Online and doing services ? , PM me or any of the helpers for assistance.

Gee4rce - June 14, 2012, 8:53 am

Postet this in an other thread before, but theres no reply since the last 3 hours, and i need the info to start my spreading- its the first time for me, i can't wait to try it out :) ...and i think its good to get answers from two different parties- so i can compare and get out the best results (i think).

So here are my Questions:

1.) I have a VPN,- is it possible to set the IP for the Server to my VPN IP ? (I tried, but the Server didn't show up- yes i portforwarded @VPN Supplier)

[This option would be the best i think, cus i trust my VPN Hoster and i think im more anonymous over it than i would be with No-IP]

2.) When i would use No-IP, how anonymous am i then? Isn't it traceable?

3.) What if the No-IP Account gets lost, or the VPN IP (if its possible to set up vie VPN) changes,- then the Botnet is gone or what D: ?!

I hope to find some answers, as i want to start spreading as soon as possible- thats the only Problem wich keeps me off atm =]

Greets, Gee.

swarmed - June 14, 2012, 9:35 am

Here is my question:

I can't find/connect to anybody on blackshades, I've infected myself and a friend with my server, but I can't connect to either of us.

-I use ports 8000 and 8001, which are both forwarded. (tested with canyouseeme and blackshades itself)

-I use no-ip(.biz)

-I don't use a crypter

I'm new to rats, I only have some basic experience with darkcomet. Can you help?

greetings,

Swarmed

WarriorR™ - June 14, 2012, 9:50 am

(Jun 14, 2012 09:35 AM)swarmed Wrote: [\[CITE\]](#) Here is my question:

I can't find/connect to anybody on blackshades, I've infected myself and a friend with my server, but I can't connect to either of us.

-I use ports 8000 and 8001, which are both forwarded. (tested with canyouseeme and blackshades itself)

-I use no-ip(.biz)

-I don't use a crypter

I'm new to rats, I only have some basic experience with darkcomet. Can you help?

greetings,

Swarmed

PM me with your tv info

let see me first what happend with your blackshade net

Appliance Warehouse - June 14, 2012, 9:58 am

greetings,

SwarmedTwo things.

1. I am now apart of the support team, so if anyone has any questions, feel free to PM me.

2. To answer your question,

You have either got a portforward or crypting error.

You cannot infect yourself with BlackShades . In other words, even if everything was working fine,

it still wouldn't have mattered because you can't infect yourself.

To see if your portforwarding works correctly, do follow these steps

1. Open Black Shades
2. Go to the "settings" tab
3. Activate the ports you want activated.
4. Go to canyouseeme.org and test those ports.
5. IF that doesn't work, then your modem or VPN is configured incorrectly.
6. If your portforwarding is working correctly, go this website and submit your unencrypted server.exe <http://anubis.iseclab.org/>
7. You should then get an install.

Its way easier shown then explained. There are a plethora of variables which need to be accounted for. I know what it feels like to be in your shoes.

Just PM me with a time for me to go over to your teamviewer and help you. PMing you now. Hope this helped.

Tutelary - June 14, 2012, 10:21 am

I'm online and helping as well. Feel free to PM me.

Zuppeman - June 14, 2012, 11:39 am

Can you pc me the rat plz?

Would be happy to have it :)

Dastoks - June 14, 2012, 11:59 am

i have around 5 rats on my darkcomet that keep showing up on my window, but they some times just dissapear ..

then suddenly come back ...

usually they dissapear after i try to see the remote desktop (they never have a desktop to show ..><)

any idea why ? :\

thanks for helping..

Gee4rce - June 14, 2012, 1:03 pm

Is nobody here able to help me with this??

(Jun 14, 2012 08:53 AM)Gee4rce Wrote: [CITE](#) My Questions:

1.) I have a VPN,- is it possible to set the IP in the Server settings to my VPN IP ? (I tried, but no client showed up- yes i portforwarded the port @VPN Supplier)

2.) When i would use No-IP without my VPN in between, how anonymous am i then? Isn't it traceable?

3.) What if the No-IP Account gets lost, is the Botnet then gone or what D: ?!

I thought theese are Basics in RAT'ing, so why does nobody answer ?

Please help me on that - its the only open thing that keeps me off from starting to Spread first time...

Greets, Gee.

war8lck - June 14, 2012, 1:26 pm

Hi Gee4rce,

- 1.You can use a VPN,It works for a lot of people,I use [censored] it's good for me
- 2.You are not Anonymous at any cost,your No-Ip link redirects your slave to you and when your slave is smart he can find your IP using his firewall in Custom mode (In case of Comodo) it pops up your IP
- 3.Everything is gone,This is pretty rare.

I hope these answers satisfied you,If not feel free to ask in this thread.

M0untain Dew - June 14, 2012, 1:28 pm

If I use the slave as a proxy and login to their facebook, will they still get a text sent to their phone saying there is a login from an unknown device since ill be using their ip?

war8lck - June 14, 2012, 1:29 pm

(Jun 14, 2012 11:59 AM)Dastoks Wrote: [\[CITE\]](#) i have around 5 rats on my darkcomet that keep showing up on my window, but they some times just dissapear .. then suddenly come back ...

You didn't specify your rat here, It may be because of bugs in the program (RAT) If you want a good then you must buy one.

Dastoks - June 14, 2012, 1:48 pm

(Jun 14, 2012 01:29 PM)chinnu Wrote: [\[CITE\]](#) You didn't specify your rat here, It may be because of bugs in the program (RAT) If you want a good then you must buy one.

i did .. its the Dark comet 5.3.1 :\

any idea why?

M0untain Dew - June 14, 2012, 1:53 pm

(Jun 14, 2012 01:28 PM)M0untain Dew Wrote: [\[CITE\]](#) If I use the slave as a proxy and login to their facebook, will they still get a text sent to their phone saying there is a login from an unknown device since ill be using their ip?

That ^ and also anyway I can control their computer without them seeing me do it?

Tutelary - June 14, 2012, 2:52 pm

(Jun 14, 2012 01:53 PM)M0untain Dew Wrote: [\[CITE\]](#) That ^ and also anyway I can control their computer without them seeing me do it?

That is true. If you login from their computer, it will not say "Unauthorized Login". And for the second question, it depends. They'll see the cursor moving and the typing...

IV-MP - June 14, 2012, 4:05 pm

Hi !

I recently bought Blackshades and I need some test installs to know if it work correctly, I will Pm you my direct link.

Thanks !

crackbabyv2 - June 14, 2012, 6:37 pm

portforwding i really need help ive done everything right but when i goto canyouseeme.org its says port is closed

Rock3r™ - June 15, 2012, 12:23 am

(Jun 14, 2012 01:48 PM)Dastoks Wrote: [\[CITE\]](#) i did .. its the Dark comet 5.3.1 :\ any idea why?

Ya its because you are screwing up the slaves bandwidth. He may have a slow connection with some downloads or torrents going on. If you put up more actions on him. The connection between you is lost. It happens to me all the time ?

(Jun 14, 2012 06:37 PM)crackbabyv2 Wrote: [\[CITE\]](#) portforwding i really need help ive done everything right but when i goto canyouseeme.org its says port is closed

Can you PM me your TV ID please ? I could help you.

DJ_SPINTZ - June 15, 2012, 1:52 am

MASSIVE FUCKING VOUCH for my boys over here, setting up my RAT and telling me all about it, even with a shitty connection.

kaviya1 - June 15, 2012, 2:42 am

can i have a test install to ensure my server is working ?
thanks in advance ?

almightydonglord - June 15, 2012, 2:52 am

PM'd NAV1GATOR about my RAT being crypted.

Tutelary - June 15, 2012, 7:49 am

I'm online and willing to answer questions/do RAT setup. PM me.

(I have no slaves, so don't ask for test installs. I cannot crypt for you either. Setup/Questions only.)

mads28 - June 15, 2012, 8:21 am

i have some questions about crypting, which free crypter to use, and how to use it, and how do i test the rat :)? and where to upload rat exes :)?

war8lck - June 15, 2012, 8:55 am

(Jun 15, 2012 08:21 AM)mads28 Wrote: [\[CITE\]](#) i have some questions about crypting, which free crypter to use, and how to use it, and how do i test the rat :)? and where to upload rat exes :)?

Dude if you go for a free crypter it may not be FUD,Still Chrome crypter is good

You can test then in your sandboxie

Here is a tutorial by Wind : <https://hackforums.net/showthread.php?tid=435649>

There are lot of sites,I dont know much about them but I use dropbox

mayboz127 - June 15, 2012, 9:03 am

Dafreak just helped me out. Great guy did everything super fast port forwarded and set up my rat! :) also gave me an install :3 Great people definitely would recommend them if you need help is this area!

WarrioR™ - June 15, 2012, 9:05 am

Never upload your server in dropbox because they give your sample in avs companies .here some direct download website name

Try disabling your windows firewall, or add an exception to it.

Do you use Upnp? If not, check if your local IP has changed.

As what you said I do not really see what could be wrong.

Send me a PM if this doesn't works, I will fix it tomorrow over Teamviewer.

Going to sleep now.

Yes, there is. Go to "Server Module", then "Full Editor".

Simply tick "Hide startup key from msconfig"

But as it is shown, It will only works on 32bit systems

[img]http://img607.imageshack.us/img607/7971/helpmodule.png[/img]

(Jun 15, 2012 11:15 PM)jp006 Wrote: [\[CITE\]](#) why is it so hard to test ports at canyouseeme.org? It shouldn't be so hard, if your port is successfully forwarded.

(Jun 15, 2012 11:13 PM)saafinkhan Wrote: [\[CITE\]](#) i need very urgent help i m using openvpn and cant see open port 81 or 1604 i can only see 80 port open and still cant rat peoples plz help me i will really appreciate :(

Because the VPN you are using don't have these ports open.
Ask them to open them for you.

reyo47 - June 16, 2012, 6:08 am

hey i have a serious problem !!!!

i setup DC 5 correctly i portforward my ports and test them i disable all kind of security softwar and than i create a server it works good and crypt it and test it on my friend computer it works but after 1 or 2 days it won't work anymore and i try to retest the non crypted server on anubis it didn't work !! what the fuuuuck

plz don't tell me check your ports cause when i creat a new one it work but it last only 1 day or 2 and stop working !!

please anyone know this problem pm me :D

(Jun 16, 2012 06:08 AM)reyo47 Wrote: [\[CITE\]](#) hey i have a serious problem !!!!

i setup DC 5 correctly i portforward my ports and test them i disable all kind of security softwar and than i create a server it works good and crypt it and test it on my friend computer it works but after 1 or 2 days it won't work anymore and i try to retest the non crypted server on anubis it didn't work !! what the fuuuuck

plz don't tell me check your ports cause when i creat a new one it work but it last only 1 day or 2 and stop working !!

please anyone know this problem pm me :D

Your static IP seems to change everytime you restart your modem or your computer. You should try to set a static IP to your computer which will always be used. It used to be the same here. It starts with 192.168.100 (For exemple)

Then each computer starts taking a slot. (101 > 102 > ...)

So if this IPv4 has changed, your port aren't forwarded anymore.

DaFreak - June 16, 2012, 6:51 am

Online and setting up RATs,Portforwarding.

reyo47 - June 16, 2012, 6:57 am

yeah and i portforward them again !!! and if this is the problem so why when i create a new server and test it it works (on anubis)

/etc/security/access.conf - June 16, 2012, 7:00 am

(Jun 16, 2012 06:57 AM)reyo47 Wrote: [\[CITE\]](#) yeah and i portforward them again !!! and if this is the problem so why when i create a new server and test it it works (on anubis)

If you portforward again then this is normale that it works. If you don't want to set a static IPv4 then you have to check if your ports are forwarded each days.

keylogbobb - June 16, 2012, 7:02 am

Hi guys i would love a hand with trying out an install, on a VM or something. Add me on skype please: keylogbobb

/etc/security/access.conf - June 16, 2012, 7:05 am

(Jun 16, 2012 07:02 AM)keylogbobb Wrote: [\[CITE\]](#) Hi guys i would love a hand with trying out an install, on a VM or something. Add me on skype please: keylogbobb

Please, read the main thread. We do not allow skype.\$

What is your problem exactly?

peterkap - June 16, 2012, 7:34 am

I have a question, How do I steal passwords on DarkComet?

keylogbobb - June 16, 2012, 7:44 am

(Jun 16, 2012 07:05 AM)Levi Strauss Wrote: [\[CITE\]](#) Please, read the main thread. We do not allow skype.\$

Well I just want to try my rat out, at the moment i can only try it out on myself however i have to enter a local IP in the builder Eg 196.168.1.9 rather than my no-ip address... So I don't want to go spreading when i don't even know if it will work. If someone has a VM that they could run it in that would be great!

/etc/security/access.conf - June 16, 2012, 7:52 am

You can use a no-ip address even if this is to test on your own computer.

keylogbobb - June 16, 2012, 7:55 am

Yes but i dont think my Router can handle connecting to itself (Cant remember the technical name for it) Which is why i would love for someone to try it out in a VM.

reyo47 - June 16, 2012, 8:18 am

yeah i do this everyday

Hey bro the problem may be because everytime i finish my work with DC 5 i enable av and firewall can this be the problem ?

/etc/security/access.conf - June 16, 2012, 8:21 am

(Jun 16, 2012 08:18 AM)reyo47 Wrote: [\[CITE\]](#) yeah i do this everyday

Hey bro the problem may be because everytime i finish my work with DC 5 i enable av and firewall can this be the problem ?

Then turn off the firewall and you av when you want to use DC again.

Be careful that your AV may detect DC and delete it.

keylogbobb - June 16, 2012, 8:25 am

EDIT relised that i awsered somthing that was not for me...

WarrioR™ - June 16, 2012, 8:43 am

Now i m online and doing my services.:)

TheRainMan - June 16, 2012, 8:45 am

Hello. Ive got a problem on Blackshades. After about 5-15 Minutes im getting this Problem. Connection is aborted due to timeout or failure.

<http://imageshack.us/photo/my-images/406/screenshot16op.jpg/>

I contacted about 5-10 people from the "Ultimate RAT Help Desk" about this. They set up my Server, Portforwarded it and FUD Crypted it but im STILL getting this Error/Problem. My AV and Firewall is 100% deactivated and my ports are open on canyouseeme.org and on blackshades. They told me to contact the Blackshades Support for help. Im doing everything right and this seems to be a bugg. The Blackshades Support doesnt seem to reply back.

Please help me fix it! Im gonna give a BIG VOUCH!?

WarrioR™ - June 16, 2012, 8:48 am

beastttttttt - June 17, 2012, 7:56 am

Hey, I have my server setup, crypted, and tested it on myself. It seems to be working fine on my machine but would really appreciate a test install on a different pc just to make sure it works.

I sent it out to a few people last night and I'm sure of at least two ppl ran it but they didn't come up in Dark Comet. Port fowarding seems to be setup properly so im no quite sure what the problem could be.

Any assistance or a test install would be highly appreciated. Feel free to PM me or Skype id is: beastly_mofo

PM sent with direct link, thanks!

WarrioR™ - June 17, 2012, 7:59 am

Sing - June 17, 2012, 10:12 am

WarriorZ helped me set up DarkComet.

Thanks man.

karlsenpwn - June 17, 2012, 10:58 am

have a question :)

if they delete the RAT i sent them, are they still injected and can i still use them ?

lewys - June 17, 2012, 12:20 pm

Hey

i REALLY need help trying to portforward on my sky router!!!!

i have been trying for about 3 days and it is pissing me off so much, i really would appreciate if one of you guys helped me out please?

war8lck - June 17, 2012, 3:23 pm

(Jun 17, 2012 10:58 AM)karlsenpwn Wrote: [\[CITE\]](#) have a question :)

if they delete the RAT i sent them, are they still injected and can i still use them ?

You must make sure that you add your rat to startup and inject it to some other process and check file presistance

In this way you can minimize the chances of loosing slaves

Tutelary - June 17, 2012, 4:09 pm

(Jun 17, 2012 12:20 PM)lewys Wrote: [\[CITE\]](#) Hey

I'll help you out. Send me Teamviewer details in a PM and I'll have it fixed in a snap.

karlsenpwn - June 17, 2012, 4:13 pm

Okey, i got some slaves from a guy, and everything worked perfectly fine, and when i restarted my computer, they where all gone.

my AV and firewall is down. I have re-listened on port 1604.

then i made a new server, crypted it, and sent it to my friend (for testing)

but he got this error when he tried to open the file:

error during execution. "C:\users\VLV-student\appdata\local\temp\stage1.exe
no acces

he also tried to run it as admin. nothing happened on DC.

i did not set a password or anything, so i dont know what the problem is.

i am a noob with this, so i dont know how to inject it to another process.

if you could help me via TV or something it would be really great!

(i also need the server crypted if that is possible)

can you test my rat thanks 35 chars

Abusadora - June 17, 2012, 11:13 pm

Hey so I've encountered a problem while setting up my Java Drive By. I have my RAT up and functioning fully. I even uploaded the files to a webhost (x90x.net), I have a link etc. I try loading my Java Drive By page and the page loads fine, at the top of the screen I get the Java message like I'm supposed to about running the java applet, Run This Time or Always Trust This. I click Run This Time and then another window pops up and I click accept... then run. At this point my RAT should be downloading correct? However, it does not.. my computer does not show up on my RAT list. I run the file on myself w/out the drive by and it detects a new user. I'm not sure why it won't download during my drive by. Anyone suggestions?

thanks

I've added the Direct Link for my rat to the htm file using the correct java code as well, but I was

thinking that this had to be where something is going wrong.

Additional question: If my RAT file isn't crypted well enough could this be the reason it will not download through the Java applet? Since it may detect it as harmless even though I clicked run and accepted the risk...

WarrioR™ - June 18, 2012, 12:01 am

Can anyone test my rat, I have it crypted

BboyEatsbacon - June 18, 2012, 6:21 pm

Can someone help me with portforwarding?

Lime Whips - June 18, 2012, 10:45 pm

Can someone help me portforward/setup my dc rat/test install if so it would help me a CRAZY AMAZING amount thanks in advance

perfidy - June 18, 2012, 11:36 pm

Hey bro. I know I've done everything correctly. From the DC install, to no-ip setup, to port forwarding. Online scan says my ports are open. I'm listening to the ports too, but I can't seem to get a hit from my sandbox. Any tips?

My AV is off, my WinDefender is off, my firewall is off, my router's firewall is off. I have a static local IP if that matters. no-ip is in sync with DarkComet.

I wonder what I did wrong?

Dastoks - June 19, 2012, 2:21 am

using dark comet 5.3.1

why i got doubles of slaves?

i got 2slaves, one is my laptop, and one some horny 30years old guy whos fapping non-stop ...

see picture to understand:

<https://puu.sh/C1Sj>

2. how can i know if my slave's computer is on or off? because if its off and i try to see webcam \ desktop
the slave from the darkcomet dissapears ..

SaschaaBD - June 19, 2012, 5:46 am

I can not solve

Error: I could not see your service on [MY P] on port (1604)

Reason: Connection timed out

/etc/security/access.conf - June 20, 2012, 1:54 pm

(Jun 19, 2012 05:46 AM)SaschaaBD Wrote: [\[CITE\]](#) I can not solve

Error: I could not see your service on [MY P] on port (1604)

Reason: Connection timed out

A firewall is probably blocking. Try disabling any kind of protections.

(Jun 19, 2012 02:21 AM)Dastoks Wrote: [\[CITE\]](#) using dark comet 5.3.1

2. how can i know if my slave's computer is on or off? because if its off and i try to see webcam \ desktop

the slave from the darkcomet dissapears ..

I already had kind of things like that. The remote computer was timing out and then another connection of the same slave was showing up.

The other one stayed in the list, but they were not able to receive any commands.

You will know if the computer is off, you would see your slave disappear.

You can still try to REFRESH your slave and check if the ping has changed. If it hasn't changed, your slave have probably timed out.

(Jun 18, 2012 11:36 PM)perfidy Wrote: [\[CITE\]](#) Hey bro. I know I've done everything correctly. From the DC install, to no-ip setup, to port forwarding. Online scan says my ports are open. I'm listening to the ports too, but I can't seem to get a hit from my sandbox. Any tips?

Of course. Send me a PM for a meeting.

@OnTopic: I am back. I am not totally recovered but I am going crazy if I do not do anything.

Mr. Gold - June 20, 2012, 2:01 pm

A friend of my helped me made a server. It look liked it all worked but if i test it on my self with sandboxie i don't show up in the list is that suppose to heaped?

/etc/security/access.conf - June 20, 2012, 2:04 pm

(Jun 20, 2012 02:01 PM)Mr. Gold Wrote: [\[CITE\]](#) A friend of my helped me made a server. It look liked it all worked but if i test it on my self with sandboxie i don't show up in the list is that suppose to heaped?

As I said, Sandboxie is often not working depending on the configuration.

Sometimes this is due to the fact that Sandboxie doesn't have the UAC permissions. Send me a PM with your link I will send you 10 slaves, if you need to test your .exe

WarrioR™ - June 20, 2012, 10:55 pm

setup problems pming now. of a post

ghostcaper - June 22, 2012, 4:22 pm

Hi I have fud server 0/37 and im using dc 5.1. canyouseeme.org says my port 1604 is open. I un install av turned of firewall. added dc to exception rule and still my slaves dont show up in dc. can you help will your service help thank you.

Exeption™ - June 23, 2012, 6:17 am

Hey guys,

I need help with setting up my Cybergate correctly!
Pming know one of you!

WarrioR™ - June 24, 2012, 6:13 am

now i m online and i m doing my services

wattheheck - June 24, 2012, 6:44 am

When I'm testing the cybergate server on myself, I get a bunch of missing dll errors. I know I can download the dlls but when wouldn't that mean I have bind the dll with the server as well?

Here's what it thinks is missing:

mozglue.dll
nspr4.dll
plc4.dll
mozsqlite3.dll
nssutil3.dll

Denyo - June 24, 2012, 9:01 am

hey can you check when i rat someone, and then they go offline, i lose them. So i think that my fud isn't on startup. Can you check?

Wires - June 24, 2012, 9:13 am

If this is the case, you'd have to check if your crypter has enabled 'startup' and what Rat are you using, some rats are more stable than others.

Denyo - June 24, 2012, 9:41 am

(Jun 24, 2012 09:13 AM)R?m???sc?Ng ? Wrote: [\[CITE\]](#) If this is the case, you'd have to check if your crypter has enabled 'startup' and what Rat are you using, some rats are more stable than others.ye i know what was wrong, warriorz helped me :) thanks though

Use up2x.com for a direct downloading site, & depending on the support, some may test non crypted servers, I would but i'd highly prefer crypted.

~Reminiscing

(Jun 25, 2012 10:26 AM)masonobbeans Wrote: [\[CITE\]](#) When ever I crypt my server (darkcomet) I get some errors....Pain in the ass! Think you can help?

By errors what do you mean? The crypter is corrupting your file? Try different settings or a new Crypter.

~Reminiscing

Terror900 - June 25, 2012, 10:58 am

pmmed server for testing i think. up2x.com won't work for me keep saying my 296KB file is too big
WarriorZ are you able to help me?

90210 - June 25, 2012, 11:00 am

I have no idea what's wrong with my RAT but when I test it it doesn't work.
Thanks in advance.

Vouch for this thread and warrior, set up my rat in less than 10 minutes, moved fast knew exactly what he was doing, was taking me over 5 hours to make and they helped soooo fast. Thank YOU!

DerrickB123 - July 6, 2012, 7:48 pm

Is there any way to get a free rat to work without port forwarding?

Rock3r™ - July 6, 2012, 10:20 pm

(Jul 6, 2012 07:48 PM)DerrickB123 Wrote: [\[CITE\]](#) Is there any way to get a free rat to work without port forwarding?

There no free PHP/HTTP RATs for free. I would try portforwarding you.

d695260 - July 7, 2012, 5:26 am

Hello.

I have two different infected files (let's say 2 different RAT).

Is it better to bind them and then to crypt the issued file?

Or to crypt separately the 2 files and then to bind them ?

Thank.

SIM-1073736 - July 7, 2012, 8:32 am

I'd like to bind my RAT to a picture / program, what binder should I use? (I got celesty binder, would this do the job?)

I would like to make it FUD, wich crypter should I use? (willing to spend up to 5\$)

Is it possible to upload the file somewhere, copy the link and spread it so people would be infected just by opening the link?

Thanks ;)

Maple ?? - July 7, 2012, 9:03 am

I was wondering if I could get a clean version of the latest DarkComet. PM'ing you now.

Support4You - July 7, 2012, 9:32 am

Help need ,

Yesterday ive been hacked , the guy who hacked me told he hacked me with my ip and port.

Could someone look my pc to get the virus out of my pc and also help me to still get port open so i can use my blackshades.

ZeTeXe_Hacks - July 7, 2012, 11:33 am

Hello, im looking for help on crypting my rat and getting it setup for spreading! thanks

Windz12345 - July 7, 2012, 1:07 pm

i need help with icons crypting tv - 238 513 363 , 5396

i will vouch u , ty :)

Hayley - July 7, 2012, 1:51 pm

I'd need some help with port forwarding, tried pretty much everything.

Also, if anyone knows, if I already have my default port open, am I able to use that one?

ArmDealer - July 7, 2012, 4:34 pm

Hey Do you mind giving me some test install? Thanks

Tutelary - July 8, 2012, 4:08 pm

I'm Online and willing to help anybody who needs it. PM/Post here.

The Deftone - July 8, 2012, 4:16 pm

can anyone help me out with a crypt? and test install? thanks

I am back and ready to help you guys.

Post here your issues.

Betelguese - July 11, 2012, 10:26 am

Is there a wqay to change the JDB applet to say somethign legity instead of (Unverified) or (Unknown) etc etc so it doesnt look so bait? Also what happens when the JDB becoems detected? Does it mean ill lose my slave or i jsut wont be able to use the link anymore?

Tjorvla - July 11, 2012, 10:40 am

I need help.. Blackshades! Worked before but now doesn't :S

NinjaChachi - July 11, 2012, 10:50 am

Ok this is my first time really setting up a RAT, I have tried Dark Comet but whenever I go to No-Ip Updater and enter my stuff in, it says

" Can't join remote server, trying later."

So I said screw DC for now I'll try CyberGate, I build the server with instructions from a couple threads, I test the server on my other computer and nothing shows up on my computer saying that I got a new Slave.

Canyouseeme.org shows that my port 100 is open and everything should work but it doesn't. Please PM me and maybe even Teamviewer, thanks!

Betelguese - July 11, 2012, 12:30 pm

(Jul 11, 2012 10:50 AM)NinjaChachi Wrote: [\[CITE\]](#) Ok this is my first time really setting up a RAT, I have tried Dark Comet but whenever I go to No-Ip Updater and enter my stuff in, it says " Can't join remote server, trying later."

As long as you have the no-ip DUC open it will work regardless of what it says in DC. SAmethgn happened to me but it is still synched. You can even see in your system tray that there is somethign that says DC is synchd

hola123 - July 11, 2012, 12:31 pm

How do i portforward for (blackshades)? maybe alittle explanation with what portforwarding does would help =p

/etc/security/access.conf - July 11, 2012, 12:58 pm

(Jul 11, 2012 12:31 PM)hola123 Wrote: [\[CITE\]](#) How do i portforward for (blackshades)? maybe alittle explanation with what portforwarding does would help =p

Simply got to your box (usually 192.168.1.1) (Default gateway) and port forward the port you use for bs.

Bruce80 - July 12, 2012, 1:40 am

Hi all nice post i must say..

Option 4 is my Option (4. To get Test installs, Post here and then PM me with your direct link. Thank you. 0

I have posted already but could not post in this section due to my rank so i ask you if you could help me out .

Thank you for your time

I need help with setting up Blackshades Stealth on Mac.

Insight - July 13, 2012, 9:24 pm

Everytime i run a previous or new blackshades server on a new slave, they don't get ratted; this happened after the whole downtime from last two days.. help lol

iuri - July 14, 2012, 9:16 am

Hello, i'm having issues when i test my server it won't show on DC, and i've portforwarded everyting correctly (i guess).
Could someone help me ?

Supernatural2411 - July 14, 2012, 10:16 am

Hi,

i have a problem, so I have a RAT with Cybergate done, like in the Tutorials here, but it works only for me, if I send anyone the RAT, it dont connect 2 my computer, and the IP is from No-IP and not mine.

I hope anyone can help me :)

PureEvil - July 14, 2012, 1:04 pm

Hey i need some help with crypting, can you crypt my server thanks

darkfortedx - July 14, 2012, 4:25 pm

im having problem with the RAT working on other computers

Switch Blade - July 14, 2012, 4:30 pm

Hi guys I have a problem when I enter my NO-IP details in my DK it says "Can't join the remote server please try again later". I checked canyouseeme and it says my ISP is not blocking it my port was forwarded and everytime I run the stub on myself I dont see myself in users help!

Forex - July 15, 2012, 12:45 am

What host should i use with my java driveby? Needs to be free.

Rock3r™ - July 15, 2012, 3:58 am

(Jul 15, 2012 12:45 AM)Wolf Haley Wrote: [\[CITE\]](#) What host should i use with my java driveby?
Needs to be free.

Try SPAM its free. But they might take down your site anytime. Better get a paid hosting(offshore) so they don't care about JDBs or botnets.

(Jul 14, 2012 04:30 PM)Malpractice Wrote: [\[CITE\]](#) Hi guys I have a problem when I enter my NO-IP details in my DK it says "Can't join the remote server please try again later". I checked canyouseeme and it says my ISP is not blocking it my port was forwarded and everytime I run the stub on myself I dont see myself in users help!

If you are testing it on yourself use localhost(127.0.0.1) where it asks for DNS.

strimpel2 - July 15, 2012, 3:59 am

i dont good with Portforwarding can some one help me on skype ? (nadav144)

am having the same problem too ... have you fixed yours?

iuri - July 15, 2012, 9:49 am

I'm having issues with my DC server, tested it in sandboxie working. But slaves won't show up.
Any help ?

Yagami Light - July 15, 2012, 10:40 am

Can i get some help with a JDB? anyone i would greatly appreciate it

grosseagle - July 15, 2012, 1:44 pm

Can I please get some help with setting up a RAT? I have set up Cybergate 1.07.5 and created my server. I have portforwarded successfully, and tested it on canyouseeme.org . However, when i have no-ip running, and cybergate started and i try to test it on my friend, he runs the file but doesn't get infected/i dont get his computer details.

Help would be appreciated. I am open to any PMs. Thank you :)

Captain Deadpool - July 15, 2012, 2:22 pm

Can someone help me? im trying to download DC but everytime I download it says a virus was detedcted and it gets deleted, I disabled and turned off my entire firewall and everything but it still does it, any help?

Edit: Nevermind I fixed it :)

Forex - July 16, 2012, 4:46 am

Can someone help me over teamviewer? I can't see any slaves in cybergate even though people are sending me installs.

Masculine - July 16, 2012, 7:32 am

I can't portforward correctly. Canyouseeme.org always says my connection times out when I portforwarded correctly.

Thanks in advance.

/etc/security/access.conf - July 16, 2012, 7:46 am

(Jul 16, 2012 07:32 AM)Masculine Wrote: [\[CITE\]](#) I can't portforward correctly. Canyouseeme.org always says my connection times out when I portforwarded correctly.

Thanks in advance.

Canyouseeme will show you that your forwarded port is open if a program is using it. Launch your rat, listen on your port and check again.

Forex - July 16, 2012, 10:12 am

(Jul 16, 2012 07:46 AM)Levi Strauss Wrote: [\[CITE\]](#) Canyouseeme will show you that your forwarded port is open if a program is using it. Launch your rat, listen on your port and check again.

Mine says no route to host. What does that mean, it was working before?

/etc/security/access.conf - July 16, 2012, 10:31 am

(Jul 16, 2012 10:12 AM)Wolf Haley Wrote: [\[CITE\]](#) Mine says no route to host. What does that mean, it was working before?

Something is blocking it. Disable any protections.

JackRooney10 - July 18, 2012, 1:45 am

Can someone help me over teamviewer? I can't see any slaves in darkcomet even though people are sending me installs.

I have the same problem, but the file looks too "dangerous" and no one wants to open it, or they open it and they didn't get infected. Please help

Alteta - July 18, 2012, 12:43 pm

Can you help me to set up my rat pls, I don't know what is the problem I setup rat, port forwarding, no-ip setup, but no victim, can you help me pls?

Nixros™ - July 18, 2012, 2:33 pm

Very Very nice service fast and easy they will help with anything you have my vouch.

Ryuuku89 - July 19, 2012, 7:18 pm

Hi, I bought a 1 month subscription of Mullvad VPN, and I wanted to setup my Blackshades RAT. Is there a way doing this behind a VPN? Is it also safe doing this with no-ip?

Aegis - July 19, 2012, 9:42 pm

Replied to your PM, will get your RAT setup thing done soon.
Waiting on a reply. ?

vanphi89 - September 23, 2015, 11:49 am

Pmed you, hope you reply me :)

myskype :phi.bb10
RAT Setup complete, VM/sbox testing ongoing.

Slightly. - September 23, 2015, 1:12 pm

HUGE VOUCH. Did a full setup for me on TV, which took nearly an hour because of some shit.

DamienVC - September 23, 2015, 9:57 pm

(Sep 23, 2015 01:12 PM)ExeeviaBO2 Wrote: [\[CITE\]](#) HUGE VOUCH. Did a full setup for me on TV, which took nearly an hour because of some shit.
Will sort out your "reconnection" problem later today, as you requested ?

DamienVC - September 24, 2015, 2:46 pm

LegendVPN can be used for RAT'ing
LMk

DamienVC - September 28, 2015, 5:20 am

Still doing this, contact us if you have any problems.

Note to message above: Sadly I dont think it supports portforwarding :(

haxcode - September 28, 2015, 12:41 pm

i am personally against such threads also i see you gyus wanna be friendly and so on. but i think we shouldn't make it so easy for those scriptkiddies.

DamienVC - September 30, 2015, 10:09 am

We both are online, contact us if you need quick help via TeamViewer or Skype.

xRezosh - October 1, 2015, 10:36 am

Need Help :(I sent you a skype message DaFreak
VOUCH he setting it up rn :) awesome service

DaFreak - October 3, 2015, 4:01 am

Help desk is still up and running. Pm me for quick help.

food8423 - October 3, 2015, 7:05 am

DaFreak - October 3, 2015, 1:05 pm

Thanks for the vouches. Thread is closed for 3 days or possibly forever. Important stuff to sort out

DamienVC - October 13, 2015, 8:45 am

Available for a limited amount of time.

Can do setups. Hmu

DaFreak - October 19, 2015, 9:05 am

We're glad to announce that, [Armada](#) and [Incendiary](#) would now be joining the help desk. Be assured of some top notch support from a RAT expert.

Incendiary. - October 20, 2015, 1:29 am

Be sure to let us know if you need assistance! We are always happy to help :)

DamienVC - October 20, 2015, 4:11 am

Our team is packing and ready to go.

Hit me up on skype

[live:damienvc.hf](skype:live:damienvc.hf)

Armada - October 20, 2015, 8:53 am

Cant get better advice than the team on board here folks. ?

DaFreak - October 21, 2015, 10:37 am

Armada is on a vacation for a month. I, Incendiary and DamienVC would be assisting you guys.

Red™ - October 21, 2015, 11:50 pm

I need help getting a rat setup, I always seem to have trouble port forwarding. PM me I dont use Skype.

DaFreak - October 31, 2015, 7:37 am

yo setting up rats

hmu or damien or incendairy

no skids or ungrateful motherfuckers pls

DaFreak - November 2, 2015, 2:58 am

DamienVC - November 4, 2015, 7:58 am

Still doing free setups

Send me a message

Raymond Reddington - November 5, 2015, 1:48 am

Professional help right here. VOUCH.

Kyotokatrov - November 5, 2015, 6:31 pm

BabylonRAT clients keep disconnecting for me.

?Stark - November 5, 2015, 11:24 pm

(Nov 5, 2015 07:31 PM)Kyotokatrov Wrote: [\[CITE\]](#) BabylonRAT clients keep disconnecting for me.

That is common problem, and same with me.

use njrat its kinda stable..

OP its 700th Post

Congrats dafreak

yosefebesh - November 7, 2015, 5:20 pm

I need help. Add deathmachinezombie on skype

tiberhockey1 - November 10, 2015, 7:59 pm

Need help, but i cant msg you. Ty

Mymann - November 11, 2015, 12:08 am

hit me up in like 10 hours bro

HFZhyonn - November 16, 2015, 11:35 am

Would you mind pointing me in the right direction to learn about what RATs are and how they function? I don't want to just be a skid and download Darkcomet.

Flixter - November 25, 2015, 3:27 am

Sent you a PM DaFreak! :) I hope you can help me.

yosefebesh - November 25, 2015, 7:06 pm

Add me on skype: Deathmachinezombie
I need help port forwarding

Incendiary. - December 5, 2015, 7:32 pm

We are back, bitches.
lol. Lemme PM you on skype Freak.

DaFreak - February 13, 2016, 2:49 am

To the angles you go.

help desk is still open.

DaFreak - February 24, 2016, 12:10 pm

Help desk is still up.

DamienVC - February 26, 2016, 2:45 pm

[H] 41 USD [W] IMPS TRANSFER by DaFreak
hmmhmmhmm

DaFreak - February 27, 2016, 7:03 am

(Feb 26, 2016 03:45 PM)DamienVC Wrote: [\[CITE\]](#) [H] 41 USD [W] IMPS TRANSFER
You're at the wrong place brother, go to the currency exchange section. And btw, didn't knew you were Indian.

DamienVC - February 27, 2016, 9:29 pm
