Thread: [HowTo: Cam Shows E-Whoring // Noob Friendly // Links in description](#)

Hey everybody.

In this Tutorial I am hoping to help you in setting up your own camshows. All the information is completely free and the download links are survey free.

The only application that you will need to download is ManyCam which you can find here: [Click me](#).

ManyCam offers an unlimited free trial, but there is a watermark. However I will show you a quick and legal way to get rid of it without paying a cent. To get started, install ManyCam. I do not believe I have to follow you through on this one. The only thing I recommend is the Custom Installation and untick all those useless applications and the ask.com toolbar that they will try to give you in the regular installation. Once you have opened ManyCam, you will see something like this:

Underneath the "Video" Tab, click on "Sources" to the right of "Effects". Under the options select "Desktop" and then click on the button to firmly select a part of the screen to be filming. Now its time for your video sequence. Please take a look at the following screenshot:

Notice the following things:

1. Check the little box that says, hide cursor, otherwise it is visible on the video
2. Set the Update Rate to: "0"
3. I have a Flash File which basically lets me type in commands and then it will cut together the video. This girl is from <http://camdecoy.com/>, a nice application. Watch the video if you wish, but its no longer for sale. You will want to set the grey box above the video or whatever and click ok. Make sure that this part is always visible while talking to slaves. Dont put any windows in front. I suggest opening everything you need first and resizing it before starting to e-whore.
4. We still got that annoying watermark, don't we? A simple way to remove it:
 - i. Go to the "Effects" Tab
 - ii. Click on "Text Over Video"
 - iii. Uncheck the little Box that says: "Show ManyCam Logo" --> All Set!

Now the nice thing about ManyCam is, that it is actually recognized as a Webcam from sites like Omegle or Chat Roulette, or MSN.

That is about it. Any further questions feel free to mail me.

Please point out any grammatical or orthographic mistakes.

Why can't I my own thread?

:(

Put so much work into this and now nobody will see it.

Everybody starts out small. Cam shows are optimal for people that are more careful and dont trust you that you are really a female selling pics. On Omegle, everybody asks me to wave, touch my

nose or do something like that. 90% of the time I got the command they ask for. You should see their faces in some occasions. HILARIOUS!

P0NG0 - May 29, 2012, 10:15 am

Tnx, helped alot!!!

Greetz, P0NG0 ?
