Thread: [\[b\] How to find IP adress on skype. \(+Pictures!\)](#)

hackingeveryone - May 26, 2012, 4:03 pm

Hello, HF! ? . I will show you how to find IP adress for Skype.

First login to Skype. Its look like this.

Okay after you login you will test it. First call a friends. Thats look like this

.

When he accept open "Task manager" when u open it click on "Performance"

Thats look like this.

When you are there open "Resource monitor..."

When you open it click on "Network" thats look like this..

..

You need to do all that if u are on a skype call. If u dont on a skype call it will not work. When you clicking on "Network". Then it will this first one some name is "Skype.exe" . I hope you enjoyed!? ?

Not hard to figure this out on your own. You're able to use multiple different programs for this.

Await - May 26, 2012, 10:13 pm

Doesn't deserve -3 good guide. Other than the trouble with the pictures.
