Thread: [\[TuT\]\[EASY\]? ? How To Change Windows Pass Without Knowing The Old Pass ?? \[EASY\]\[TuT\]](#)

Death_Stalker - May 27, 2012, 11:08 am

This Is My First Tutorial So Everybody Pls Bare With me

I Am Going To Show You How To Change Windows Password Without Knowing The Old Password

Step:-1 Open Up CMD With Administrator Privileges and type "net user" And Press Enter

[img]http://i2.lulzimg.com/9b99e364fe.jpg[/img]

Step:-2 Now Type Any One Usernames Like this and add one * at last. Then hit Enter. Now type the new Pass

again retype The New Pass To Confirm It

[img]http://i2.lulzimg.com/83aa65cce4.jpg[/img]

Step:-3 We Had Victory!

if U Have Any Problem Feel Free,To Ask

Later I Will Be Making A HQ Thread Of This...

vqs - May 27, 2012, 12:55 pm

It'd only work if the administrator allows you to open the administrator account.

Thanks anyways!

Polite - May 27, 2012, 1:01 pm

fails, since the password is resets in this method. Not just changed. Hence you lose your EFS files.

mastermansachin - May 27, 2012, 1:24 pm

only administrator can change the administrator password. not guest.

from guest user you can change the administrator password by doing some modification in "net user" command.

InputEagle - May 28, 2012, 2:10 am

You can also use a Ubuntu live cd and use the chntpw utility to edit the windows password

hackingeveryone - May 28, 2012, 3:25 am

haha thanks. my sister's laptop was stolen so have i changed it

SIM-553562 - *May 28, 2012, 4:26 am*

For sure you need administration rights to do this!

dsMadKilla11 - *May 28, 2012, 4:31 am*

I tried this out long ago but it doesn't work with regular access. Only Admin priveleges so not very effective .

Nevertheless the info is useful
