Thread: [\[Tutorial\] How to change Icon on a .exe !](#)

Cheloo - January 30, 2010, 3:42 pm

Hello everyone welcome to my tutorial!

1. Install the ICON Changer! the serial is in it!
2. Goto the Files you want to change ICON on and right click! you will see an option saying Change Icon Click on it!
3. Go Change the Folder that the icons is in ! Default folder is C:/
4. When you selected the folder the icons are in you will see a lot of icons around.. Click on one then at Left Conner you see "Set" click on it and goto the .exe (or what ever u changed Icon on) and you will see that it got same icon as you selected :) This Doesn't only work on .exe Files! it works on all files!

Thanks. Pretty simple to use, no need of the tutorial really :P

I needed the serial.

Although, you can use other Icon Changers in this forum.

Yeah, this Is quite basic that all advance users know (well they should know), but I guess It's useful for members who're new to this community here and wish to further their knowledge.

Cheers mate.
