it says my gmail account info is not entered correctly which i did enter them right :|

what's the prob

Forward Slash - February 7, 2010, 10:15 am

You have to enter with the whole address.

knivesliam - February 7, 2010, 10:27 am

i did

its like "example@gmail.com"

and i even tried logging it in gmail and ive succesfully logged in

but when i test gmail on the builder it says wrong info :|

Forward Slash - February 7, 2010, 10:28 am

I'm not sure, let me look.

Momiji - February 7, 2010, 10:36 am

Can you make a "cure" for this. Just in case I no longer need to log someone, or feel bad, or accidentally infect myself.

Also, it keeps telling me that my gmail info is entered incorrectly. I checked 5 times and it was correct, but the logger won't accept it.

Just run a HijackThis scan and you can find it named "whatever the server.exe is called"

knivesliam - February 7, 2010, 10:46 am

have you found what's wrong and btw ive tried diff. loggers and im having the same problem :| i dont know why when i verify it or test gmail

it says i typed in wrong info :|

You have to name it something and then write .exe after the name i guess.

"Hijackthis has stopped working. Windows is checking for a solution to the problem"

Is this supposed to happen? It seems like every keylogger I test on myself always comes up with errors similar, so I'm convinced the only keyloggers that work are the professional ones you have to buy ?

Very nice release dude. You are a great member on HF community ?.

everybody - April 25, 2010, 3:18 am

thanks but i have pass needed

yogg123 - April 25, 2010, 4:36 am

Hmm nice butttttttttt I'll try itrrrrrrrrrr zzzzzz i need 25 posts, cant i get linik`?

whininguser - April 25, 2010, 5:15 am

Just make 20 posts and you'll see the pass

Raptor06 - April 25, 2010, 5:37 am

ho good job man nice !

maluxis - April 25, 2010, 8:13 am

how how how is the beeest Very very thanks you

zepp - April 25, 2010, 8:26 am

it doesnt send users and pass to ftp adress?

VISHAL.VODRO - April 25, 2010, 9:29 am

CAN ANYONE SHARE THE PASSWORD PLEASE...

Wind - April 25, 2010, 10:51 am

Hey Backslash, what is 'GDIPFONTCACHEV1.dat'? I've seen a few programs drop this when ran, including yours. What is it for? What does it do?

Thanks ?

Forward Slash - April 25, 2010, 11:28 am

I have never heard or seen this happen Wind?

EDIT: Show me a screenshot when you get the chance.

mojojojo99 - April 25, 2010, 11:48 am

simple but nice, thanks

Here :

Spoiler [\(Click to View\)](#)

Google is telling me that it's a cache for font data. But I just wanna make sure.

Forward Slash - April 25, 2010, 12:29 pm

I have no idea what it is, it isnt part of my app.

dst - April 25, 2010, 1:19 pm

It's one of the best keylogger ;)

kent24649 - April 25, 2010, 1:45 pm

how do i let this work? i enter my gmail username and pass then set an interval then "name of server" what should i put there?

then build? after build what will happen? is there somthing gonna appear on my desktop or what?

VISHAL.VODRO - April 25, 2010, 9:20 pm

PLEASE GIVE THE PASSWORD, I REALLY NEEDED THIS...

kent24649 - April 25, 2010, 10:54 pm

idk how this works any guide?.... when i press "Build" button what will happen?? is there somthing gonna pop out on my desktop as a program or what? how do i send it to ppl?

1000weedUser - April 26, 2010, 6:41 am

You should read a tut how to use keyloggers Use the search button...

M1CHA3L - April 26, 2010, 8:31 am

nice man :) it works

basegeneral - April 26, 2010, 9:00 am

Does this keylogger require the victim to have .Net Framework installed on their computer?

Rembrandt - April 26, 2010, 9:35 am

Thanks for this![TOOSHORT]

moronic_anonymous - April 26, 2010, 2:27 pm

can't download attachments yet, but can't wait to use it. thanks man.

stargate851995 - April 26, 2010, 2:35 pm

what's the password please give me it

ada? - April 26, 2010, 3:21 pm

Thanks bro..... :)

craig131 - April 26, 2010, 3:24 pm

So why is this thread rated so low?

Yes, it does.

Psilocybin Cubensis - April 26, 2010, 3:30 pm

(Jan 30, 2010 08:00 PM)?ackslash Wrote: [\[CITE\]](#) I had it in my mind for a while. I dunno, just decided to name it that.

Are the time sending intervals hours or minutes?

stickrpg23 - April 26, 2010, 4:26 pm

hmm i only need one more post
ty for the release

Forward Slash - April 26, 2010, 4:27 pm

I fixed it. You don't need 25 posts now.

VISHAL.VODRO - April 26, 2010, 9:26 pm

THANKS BRO... BUT CAN YOU PLEASE UPLOAD IT ON MEDIAFIRE???
THANKS AGAIN. YOU ARE GENIUS!!!

N1tru\$Eng@uge - April 27, 2010, 8:37 am

It would be cool if you uploaded like 3 stubs such as the following...

- 1: No post limit - for N00bs that will most likely be detected within 5 minutes of release
- 2: Over 150 post limit - may stay FUD if people would learn to only scan on scanner.novirusthanks.org and check do not distribute sample.
3. Assign a multi-encrypted password to the download which only people who know how to use FUD stubs should know how to unlock.

That's just my take on it, but that would be great man.

Forward Slash - April 27, 2010, 11:39 am

I'll continue to update it, actually reworking GUI as we speak... But I won't change the link. I think it is fair.

Thanks.

I think minutes

prokcent - May 1, 2010, 3:27 pm

nice gui dude! hope its good and fud

Forward Slash - July 11, 2010, 2:01 pm

Going to be making an update for this program very soon. Stay tuned.

hacker666 - July 12, 2010, 2:51 am

Its on sharemoney, mind uploading it on #?

Anonymous.7654 - July 12, 2010, 10:01 am

Friendly GUI :) Nice... Thanks for keylogger man.
