Exactly some stupid script kiddie. Damn children one of these days because of the smart remarks of DDoS and how you can take things down is simply going to get you swatted, or in serious dept with money. Simply because you messed with the wrong guy and didn't interpret what he said he was going to do to you if you messed with him.

From my knowledge (little), it wont be able to connect to gameservers but you could possibly crash there DB's.
