Thread: [\[Medium\]A little challenge...\[Medium\]](#)

ibaijc - May 30, 2012, 7:05 am

After some weeks I finally came up with this challenge. I had to learn how this method worked first that's what why.

Goal:

1. To add your hackforums username to the page I will provide.
2. Rooting the server (I'm not sure if it's possible but if you can I have a prize)

Site:

<http://www.abrazamoslaveda.org/default.html>

Hints:

1. The host is accessible.
2. It's an old method so people that have been in this world for a while might know about it.

Good luck!!! PM me with proof (pictures AND method name) that you have done it. No firebug allowed for the whole process! Please don't cheat, if you're planning on cheating then just leave now.

Cya people! Happy hacking!

For any questions concerning details just post on this thread.[/font]

Tell if i'm wrong but you're not Mr.Botter : <http://pastebin.com/JKmDvDWq>, I think it's an hacking request to know how Mr.Botter hack this website.

bckslsh - May 30, 2012, 8:04 am

It's not webdav by any chance?

If so I can't do it. Whenever I try and connect nothing happens, for any site.

ibaijc - May 30, 2012, 8:09 am

No, it's not webdav and no, I'm not Mr.Botter and that pastebin is empty.

What did Mr.Botter do ? I am not aware of any previous hack of that site.

Edit: I just took a look at Mr botter's sites and its the same method. Thats a big hint.

??????? - May 30, 2012, 8:13 am

Ahah pastebin is not empty you forgot to remove the , after the url : <http://pastebin.com/JKmDvDWq>

.

ibaijc - May 30, 2012, 8:17 am

oh yea... That was stupid, did you solve it ?

I have not tried it yet. But I'm going to try.

MR.Boter - March 8, 2014, 12:59 pm

lol guys , is it really a challenge ? :P
