Uh quick question.. I can see through the green lines on your main image that there is some choppiness going on around the edges on a few of those. Could you try to fix that and upload a better quality sample picture?

fdigl - May 31, 2012, 12:08 am

Sure, I'll do it probably tomorrow.

WCKicksAss - May 31, 2012, 1:27 am

wow downloading this now, so far it looks amazing!!

fdigl - May 31, 2012, 7:28 am

Thanks! Is there anything you want added to the pack? I'll rip it from the game and add it.

WCKicksAss - May 31, 2012, 2:23 pm

Well, could you get some renders (people)? haha, these are pretty HQ. +1

People renders. Won't add to pack, too lazy to give credit.

Here's a preview. I can't edit the op anymore. Anything you see here that's not in the pack was found on Google Images.

But you cut them right? I cant cut for shit. You should make a tut on it ;D!

fdigl - June 1, 2012, 1:13 am

All you need to do is rip them from the game. Those IW files use the same encryption as the older games, except CoD4.
