Thread: [\[TuT\] recover link from dead/hacked site](#)

PawKy - May 31, 2012, 11:33 am

how to recover link from dead/hacked site

example you want to enter this site - <http://community.mybb.com/post-643129.html> (Currently the mybb hacked..)

and that give you this error -

[img]http://img546.imageshack.us/img546/3919/notxe.png[/img]

so write in google cache:thelinkhere.

and the result :

[img]http://img213.imageshack.us/img213/8324/ress.png[/img]

enjoy!

Mr. Scatman John - May 31, 2012, 3:52 pm

This is actually great, but I don't think it belongs in 'Hacking tutorials'. ;-)

Ebol? - May 31, 2012, 3:53 pm

Thanks for the share! <3 But yea, I do not believe this is a "Hacking" tutorial.

? ? ?no problem man! i soon make more tutorial..

brosef - June 8, 2012, 2:36 pm

Great tutorial. Google's cache works pretty well.

Automatic Coding - June 8, 2012, 5:00 pm

Code 404. That's an error.

The requested URL

/search?sugexp=chrome,mod=1&sourceid=chrome&ie=UTF-8&q=cache%3Acommunity.mybb.com

%2Fpost-%2520643129.html was not found on this server. That's all we know.

lol problem? I know how to use cache, but, just adding cache:link != work, at-least, for that link
