Thread: [\[TUT\] Reset Windows 7 passwords with Trinity Rescue Kit 3.3](#)

wiza - January 31, 2010, 12:17 pm

Perhaps among us have experienced forgot windows password of the account we ever here we will discuss about how to reset the account password on our windows. connected to crack and create a password reset xp've a lot, so we select only the latest windows well, ie windows 7 ultimate

For his tools we'll use trinity rescue kit 3.3, these tools based on "linux" .. is bootable, can be used to reset password windows 7, vista, and xp. To obtain it can be downloaded for free at <http://trinityhome.org>

ok! let's reset the p455w0rd!?

1. burn iso trinity to blank cd or use UNetbootin to make bootable flash
 2. check the user that we will reset the password, can be seen fitted to the login page and remember the good windows either a user should. Here I've set up a user that we will reset called "aan" with administrator status.

I've used TRK a lot, its really useful, not only for password resets. I've used it for virus removing too.
