Thread: [\[idea\]Rep fuck recommendation ? \[/idea\]](#)

ajayu1992 - June 2, 2012, 9:56 am

The title says it all. The admin can keep a criteria like 150+ recommendation from ub3s/l33ts Which will make that user to get repfucked. Please share your opinion on this ?

Really good suggestion, i will say i like it ;)

Not really agreeing with this idea.

You can easily ask your friends to recommend a repfuck to the requested person without even a reason.

If they are a scammer then yes.

Very bad idea. I feel it could be massively abused. The only way that I would support this is if it reset every week or so. And there would have to be punishments for abusing the system.

Vexna - June 2, 2012, 9:59 am

I disagree. It would be quickly abused.

ROFL. You can't blacklist a HWID through a website. The website never receives that information.

I don't think this is needed. The staff already do a good job at repfucking people, they don't need other people to tell them who to repfuck.

Bad idea in my opinion,I wouldn't want to see this happen.

It sounds very exploitable. A bunch of friends get mad = another 10 recommendations.

Sol Yurick - June 2, 2012, 10:00 am

To much room for abuse.
