Not bad, I like it :)

Has some pretty cool features, but you should use a different GUI next time.

The red hurts my eyes :P

Try it, its an awesome feature.

Ask it a hacking question, like: "How do you setup an IRC server?"

It works most of the time.

Mate, this Tool Is awesome to say the least. I'll definitely be checking It out after this post. I do agree that the red part of the GUI Is a little strong on the eyes, but as long as It does the job as described (no doubt, It will), then that's all that Is of concern to me.

Cheers mate. Good stuff :)

norton 2011 identified this as a threat

**vianett** - December 28, 2010, 3:10 pm

The program is not so good. It redirects you to a link

**iZan** - December 28, 2010, 3:16 pm

Love it. Really I do. Pinned it to my Start Menu + Task Bar. This is a REALLY great tool on hackforums. Keep it up please nigz!
