Thread: [?????????? \[DDoS\] Cheap Powerful DDoS Botnets and IRC Spots! \[DDoS\] ??????????](#)

Cosmopolitan - June 3, 2012, 8:01 am

THIS IS NOT FOR SCRIPT KIDDIES

Want to have your own Powerful DDoS Botnet..?
Are you sick of trying to get your own DDoS botnet?
Are you sick of paying \$5/hr or \$100/24hr for DDoS Service?
Are you sick of weak Shell Booters all around?
Well then.. THIS IS THE PLACE FOR YOU.

TCP Flood
UDP Flood
SYN Flood
Unlimited Attacks

Here is Video Demonstration of how powerful and what 30 bots can do:
[Video: <http://youtu.be/WTl-mNermlw>]

Frequently Asked Questions:

Code Question: How powerful are the bots?

Answer: Each bot is a dedicated webserver 100mbps unmetered.

Question: How many bots are enough for me to ddos?

Answer: 20 bots should be enough to take down 90% of targets and 99% of the gameservers.
Basically, the more bots you have the more power you can generate.

Question: How does it works? How do I use it?

Answer: This is an IRC Botnet. Each bot runs on a linux webserver and connects to a host (IRC Server) you choose automatically. You can change the host (IRC Server) by yourself whenever you want. You can use the botnet with mIRC or through Webchat (HTTP).

Question: What is a bot exactly? And how stable is it?

Answer: All bots runs on unmetered 100mbits+ linux webserver and are extremely stable.

Question: Can I run linux commands on each bot and try to root it or whatever?

Answer: Yes. you can do whatever you want.

Question: How can I know each bot is atleast 100mbps unmetered?

Answer: You can do a test speed to download 100mb file and see the speed.

Question: Do I need an IRC Server to run the Botnet? I don't know how to set it up.

Answer: Yes. You gotta have an IRC Server to run the botnet. I can set you a lifetime IRC Server for \$10.

Question: Are the bots dying?

Answer: All bots will come back after system reboot. Its rare for bots to DIE since each bot is a stable linux webserver that hosts websites and not a simple home connection.

Question: Can I always buy more 100mbps unmetered bots to my botnet?

Answer: Yes.

Question: Can I see the botnet on live before I buy?

Answer: Yes no problems.

Payments:

\$5 for each bot. 10 bots minimum -> \$50

\$10 for setting you up an IRC Server if you can't. (you don't need to buy vps)

(Accepting LR only)

Still got questions? let me know..
