Thread: [\[TUT\] Invisible File Folder for Desktop](#)

clickhead - June 3, 2012, 11:40 am

Invisible Folder on Your Desktop!

We all have needs, but you should have the right for those needs to be private, you feel me? ;)

1. Right click on your desktop, hover over new, and select new folder.

And there you go! I hope this helps do whatever you need it to do, great! :D

Disclaimer : I know this isn't really hacking, but it's a great tutorial for hiding hacking programs :D

I think this has already been posted and I think almost everyone already knows about this.

EDIT: Boy was that the understatement of the year:
