- 1) God doesn't exist, read the bible and you'll find out why
- 2) Let members figure out how to code binders on their own
- 3) Is this even yours? At least give credit to whoever made it

Hi ZhiYar-SlemanY

Can you tell more than FileJoner name, like:

- Are you using EOF data append
- Are you using Resource data append (like UpdateResource API)
- Or you using embedded data append (direct bytes array in stub)

Thanks in advance
