[img]http://www.hfimage.net/images/rgqo5v80sogmfedpw9t.png[/img]

i took the text from another sig as i thought it would work better than what i could do at that time

Elfen Lied - June 4, 2012, 1:16 pm

This si the one I use at the moment. I am no photoshop pro or anything. I litteraly just copy and pasted in the render and added the text, took no more than a minute. But I think it came out pretty good :D.

Man I used to make anime signatures all the time.

This really makes me want to get into photoshop again.

rinluvr - June 4, 2012, 2:07 pm

Here's the one I made:

Ugh.... All of yours is probably better than mine =/

I even rendered the image, so I can take credit for 100% of this sig :P Besides the character... Same with my avatar ^_ ^

I made signatures the ghetto way. Take image, squeeze the hell out of it, and use paint to add my name in.

Spoiler ([Click to View](#))

I probably should learn photoshop so I can make a signature proper, but I'm far too lazy.

Levi - June 4, 2012, 3:32 pm

I'm terrible at gfx.

llbg2 - June 4, 2012, 4:12 pm

After being out of the graphic creation game for about 4 years, I decided to start up again today. Below is what I've come up with so far, I think it turned out to be pretty decent!

Spoiler ([Click to View](#))

EDIT: Also just quick whipped out a new avatar to match my new signature. Any thoughts/comments/critique is appreciated!

Haha, thanks! Creating graphics is NOT like riding a bike, lol, I forgot how to do pretty much everything and anything. Plus, I learned on Photoshop and was forced to use GIMP because Photoshop refuses to install for me after my most recent reformat. Though GIMP is pretty good, it

isn't as much of a powerhouse as Photoshop so it was a little bit more difficult. Glad you liked them though, yours are really good too. Love the simplicity of them and how they are themed with the background and everything. ?

Download Photoshop CS5 Portable then. I use it all the time, fuck installing it and doing all the registry key bullshit and waiting time.

Tasemu - June 4, 2012, 8:01 pm

Ive made a few but i wont post em, hate signatures and ill never make another. >.<

That is... a great idea! Never even thought of doing that, though I used to have it on my flash drive in case I ever needed it. Now to find a good torrent...

Programmargorp - June 4, 2012, 10:31 pm

My current one pretty much. Didn't feel like destroying the cleanness of the render by adding a background.

You got some serious skills. You have one of the best sigs I've seen in HF
All signatures are stolen resources, hence not my work. Thats what i meant when i said i hated

them and wont make them anymore. People who think they can design because they know how to make an attractive sig are just self-flattering.

semi_blind - June 5, 2012, 3:59 am

Lol all these sigs look really cool i wish i could make one of my own or someone made one for me.

I see what you mean.

The only thing i ever "steal" is the render though, i cant draw at all .__.

Here are some:

I have more, but do not wish to show them, I am very bad at signatures, I mean, those 2 are probably my best, and they are bad..

But well, signatures probably just aren't my place to be in the graphics world ^^

I don't know, I find the second signature to be quite badass. I wish I had talent to make a sick anime sig, but I have no skill in any paint/editing program. Oh well, haha.

Fonts, C4D's, brushes, Vectors? Theres no such thing as a sig that less dirty than the rest unless it was made from scratch.

SavageBoys - June 5, 2012, 4:01 pm

Hmm, let me see if I have any.. my current isn't anime.

Spoiler [\(Click to View\)](#)

And who knows how many half done psds laying around.

Ahh that's right, brushes and fonts as well .__.

I haven't gotten up to using C4D renders or Vectors yet.

That is Kagura from Gintama.

The render used was from some OC work I found based on a certain scene, I just cut it out and went from there.

K4M1N4 - June 6, 2012, 10:58 am

Not a signature but going to post it anyways (if you hate memes do not click):
