both links contain a JDB? my av stops both of em.

Navigator98 - July 24, 2012, 9:26 am

I'm sorry to say, but the MSP Generator script does not work, it just distributes used codes & it wants you to fill out a survey twice before you can even get to the codes & it tells you you can get only 1 code every day + they're all used already.. Bit of a disappointment.

Edit: besides distributing fake used codes, it also contains a Java Drive-by infection, and the site is blocked by Google because of malware. If you still want to have a look there, go on, at your own risk..
