Nice buddy, this would be something I would use.

Thanks ?????, glad to hear it! I might add a feature that allows users to submit a movie link. But it might get a little messy :S

Yeah, if you where to do that you would need some way of verifying it.

Are you just sending the URL of the video or are you actually streaming it.

That's nice work .Prodigy, but if you're going to let people submits videos then you should just add a image next to it like NOT TESTED yet or not sure.. and the users that signed up could like it like a rate between 1-10 and 8 - 10 means its ok and stuff? Just an opinion =/
