Thread: [\[Tut\] How to make a Pixel Art Pokemon \(THE FIRST 150\) \[EASY\]](#)

Quinck - June 8, 2012, 1:31 am

If you have an original Pokedex made by Hasbro, then you can simply do this yourself. If not, PM me with the pokemon you would like a picture of and I will happily send you the image so you can make your very own pixel art.

Some Pokemon already pictured to help you practice:

Charizard

Spoiler [\(Click to View\)](#)

Pikachu

Spoiler [\(Click to View\)](#)

Ditto

Spoiler [\(Click to View\)](#)

Squirtle

Spoiler [\(Click to View\)](#)

Step 1

Download the old version of MS Paint or use Photoshop.

<http://imgtfy.com/?q=Windows+XP+MS+Paint>

Step 2

Paint: Grab your pencil brush and zoom in x8

Photoshop: Grab your pencil tool and set to 1px and zoom in until you see the small pixel squares.

Step 3

Look at your resource image and simply plot all of the points that you see in your image.

Step 4

Once finished, grab an image off of Google of your chosen Pokemon and save it. Open it in your desired program and color grab the color codes by using the eyedropper tool. You can also download an eyedropper tool online if you search it in Google as well.

<http://imgtfy.com/?q=eyedropper+tool>

Step 5

Color your pokemon accordingly and you are finished. You can look up tutorials on how to make pixel art backgrounds or scenarios as well.

Optional

If you want, you can enlarge your image by doubling the pixel size, or increasing the image size via Photoshop.

Also, you can edit some portions of the sprite and make an animated pixel art if you wish.

This was my first tutorial posted on Hack Forums and I do hope you have enjoyed it. If you have any questions, feel free to PM me or post here.

Thank you.

Stev - June 8, 2012, 8:42 am

Looks like a sick tutorial, Kristain
Keep up the good work.

Vinnie - June 8, 2012, 8:51 am

Nice tut broski, keep up the work and you might be in GM soon :-)

xor - June 8, 2012, 8:52 am

Nice tutorial kristian, im alberto from tc :-P gr8 work

josh - June 8, 2012, 8:52 am

Nice tutorial Kristian lol. I'm not into pokemon and stuff, but that was really cool xD

Quinck - June 8, 2012, 8:54 am

Yeah me either man, I just found this thing and realized it was easy as hell to make some icons or sprites.

Thanks for the comments guys!

Soulmate - June 8, 2012, 9:05 am

This is fucking awesome man, I did this with a Haunter in like 6th grade for a project.

Diabolic - June 8, 2012, 9:07 am

This is awesome, I'll be sure to try do a Haunter.

SIM-914155 - June 8, 2012, 9:07 am

Awesome tutorial, you could potentially also use those for minecraft pixel art if anyone is actually into that stuff. Also, can't GIMP do this just fine?

Quinck - June 8, 2012, 9:18 am

Ah that is true. Minecraft is always used for pixel art.

I never used GIMP before, but I am sure you can use that as well.

RY4N HAX - June 8, 2012, 9:33 am

This is awesome man. Thanks a ton for this bro.

Froggy - June 8, 2012, 9:37 am

Great tutorial, Kristian! Extremely easy to follow. Here's Charmander!

That looks incredible.

Now make it animated :D

Tweteh - June 8, 2012, 9:50 am

Oh wow this is pretty cool (:

Must try this out!

josh - June 8, 2012, 11:01 am

Imgur is finally back up lol

I was bored xD

AtomicEquinox - June 8, 2012, 1:01 pm

Thanks for the tutorial, I never really thought about making pixel art but now I'd really like to try it.

DoomsdaY™ - June 8, 2012, 2:49 pm

Really nice bro keep going

very nice tut bro

Froggy - June 8, 2012, 3:59 pm

Made Charizard! Got too lazy to do legit shading or to make bg transparent, but here it is!

Quinck - June 12, 2012, 12:15 pm

That looks good. I say you do an animation evolution graphic.

Alside - June 12, 2012, 7:32 pm

Awsome man thanks for the share this is great :P

mayboz127 - June 14, 2012, 12:32 am

Looks great man, once again another well laid out tutorial.

Snotlepel - June 14, 2012, 12:42 am

Nice tutorial=p to bad I lost my pokedex.
