That's not bad for your second creation but there is much to learn as always. Try making the image a bit slimmer and try doing something with the text. You can follow some easy tutorials to help you.

not bad for your 2nd one, but a lot more work to get better.

Liking the signature man.

Thanks for taking the time to link my thread ;D

i hate that text!!! its so plain as well! 3/10 sorry man!

NMFamous - June 8, 2012, 3:50 pm

Yeah, that text is used way too often.

Sorry about the text, and yeah, I noticed the text was a bit too popular.

I rate a 3/10

The text doesn't blend in with the background, the renders look out of place as well.

Without some sort of gradient to slowly blend the colours together, red would never go with green.

I saw your first one. I will not compare it with second one but in a word it is nice. Try more and create something new. background image is nice.
