Open two browser windows, and drop the .swf file to the window and the other window open your video chat. IE: omegle, chatroulette , etc

Yes I feel you buddy, I'm having the same problem.

There are a lot of fixes but I can't be bothered trying them, use the search function on here or on google.

Yeah I had the same problem when I tried doing it once, I'd like to know how to fix that.

Vodge - June 8, 2012, 5:59 pm

Try reinstalling flash or something, I think VCW is flash based anyway. And try opening it in a different browser.

Quote:Note: the newest version of Adobe Flash Player (11.2.202.228) has a bug which prevents the virtual girl files from playing. To fix this, you will need to downgrade your system to the previous version of flash (11.1.102.63) or (10.3.183.18).

First, go to the following link to see which version of flash you currently have installed: <http://helpx.adobe.com/flash-player/kb/uninstall-flash-player-windows.html>

Then, if you need to downgrade to an earlier version, follow Adobe's instructions here: <http://helpx.adobe.com/flash-player/kb/archivedflash-player-versions.html>

Older versions of Flash are available for download here:

- (Released 3/28/2012) Flash Player 10.3.183.18 (67.3 MB)
- (Released 3/05/2012) Flash Player 11.1.102.63 (174 MB)
