Thread: [Where? \[Techsperts\]](#)

Positive - June 8, 2012, 7:33 pm

Where would you like to see this group go?

We want to go in the right direction..... off of your opinions.

If we did "change," what would you want to see this group come out as?

Some prime examples:Innuendo-ish style (eWhoring, stories, etc)

Coding

Security

Tutorials

Money making (too many, I would hate this too)

Trolls (I would hate this too)

Music

News

Please post your opinions, thoughts and I, as-well as all other leaders will try our best to respond.

Times Change - June 8, 2012, 7:33 pm

Music or Security, they'd be very interesting. Although I think 'News' would be a pretty cool change also.

Rolls Royce - June 8, 2012, 7:34 pm

Tutorials.

I know you would like it to be RuneScape based but I'm against that.

Inso - June 8, 2012, 7:34 pm

Coding and tutorials seem like the best. Is Techsperts still a pay to get in group?

Positive - June 8, 2012, 7:34 pm

I have added a poll.

Please vote, so we can get your public opinions and add them together with the inside-subforum ones.

Winterfell - June 8, 2012, 7:35 pm

I want to see the group become all the options listed

It will be until we can get everything "restarted."

That will be soon. But to get in after that, will be hell.

Hug. - June 8, 2012, 7:36 pm

Damn it Positive, took my choice off the poll. ?

Kidding, good luck with the poll. ?

Hydra - June 8, 2012, 7:36 pm

How about Webmaster. We need a group about Websites and Security and stuff like that.

United Kingdom - June 8, 2012, 7:37 pm

I personally think we should move into coding but different style and older coding.

Soulmate - June 8, 2012, 7:37 pm

Music, basically for everything else there is a group already.

Devote - June 8, 2012, 7:37 pm

I would really like to see this group be opened to applications or pay to get instant access.. That way some people who don't have the money to spare but are good users can get it.

;) Like meh

Russian Person - June 8, 2012, 7:40 pm

I'd like to see this group go with Security.

Good idea

Bad idea

Top - June 8, 2012, 7:46 pm

I voted for the same ones I voted for in the subforum.

I'd love to see some ideas other members have though.

venomous. - June 8, 2012, 7:46 pm

I would say tuts on hacking phones and things like that and cracking technical things

Well that my opinion

Endanger™ - June 8, 2012, 8:39 pm

I think a music/security group would be something new and cool to be apart of. :3

iElement - June 8, 2012, 8:41 pm

I think it should be pointed toward several types of subjects like debates, hacking, gaming, ect. I don't like the idea of groups being pointed toward one thing. More opportunities for people to contribute in different ways means more active and HQ group.

Alside - June 8, 2012, 8:43 pm

Tutorials would be a awesome group imo.

Cloudy - June 8, 2012, 8:44 pm

I would say Security. I think we need a "White-Hat" group. It would be cool. :3

prometheus. - June 8, 2012, 8:45 pm

Coding there are the coders already.

Security that's Eminence

@Cloudy - "white hat group" that's HIJackThis

Music / Innuendo-ish are the only two that don't really have a group already focused on them. :3

Mutes - June 8, 2012, 8:47 pm

I picked:

Security

Music

Trolls (see rep as to why).

Xerotic - June 8, 2012, 8:50 pm

Coding and security interest me the most... and they seem to be doing well.

Whirl - June 8, 2012, 8:51 pm

coding in my opinion, but it's really an open sort of group.

FuhrerWulf - June 8, 2012, 8:54 pm

There's no more hacking groups on hf left... And I mean a group based off ratting / ddossing / crypting ect.

Stewie™ - June 9, 2012, 3:37 am

Security and Tutorials would be good IMO.

redpois0n - June 9, 2012, 3:38 am

American Apathy - June 9, 2012, 3:42 am

Fucking grammar Nazi's, fuck that other stuff.

Bridge - June 9, 2012, 3:44 am

I would love to see you migrate to the Unix section, no group ever has. Even when Root started NOBODY from that group was there.

It is the only section I stay in and the users are by far the best.

Chunked - June 9, 2012, 3:45 am

Voted for other. You should have a group that has never been created on HF. What it should be... no idea.

Slot??h - June 9, 2012, 3:45 am

Anything that isn't related to hacking or coding.

+dUBSTEP - June 9, 2012, 3:47 am

a group who help other members.. + create alot of giveaways !

Mutes - June 9, 2012, 4:33 am

Do you think you'd ever open applications or some other way to apply?

Prince™ - June 9, 2012, 4:38 am

Change the username and also change the topic to " Music " .

bobjon - June 9, 2012, 4:39 am

Tutorials without a doubt. There is already security and the others aren't that interesting or good for the community.

American Apathy - June 9, 2012, 5:09 am

I still say make it a grammar Nazi group, HF needs one.

Xray'in - June 9, 2012, 7:31 am

Security I have yet to see a group that help with security I mean u can be the best money making guru in the worl but that don't mean shit if someone can take that money from you with ease your basically doing their work

ven0m - June 9, 2012, 9:14 am

fill with pure tutorials and security.

Yep that's what I wanna have from this awesome group.

?0y?L - June 9, 2012, 9:28 am

Is there a potential of being inducted into the group if one provides a sensible and then chosen direction for the group to go in?

LulzAge - June 9, 2012, 9:35 am

Security or News (People who post anything related to zombies and apocalypse should be banned :P)

Pointz - June 9, 2012, 10:05 am

Security seems like the way to go in my opinion.

I would be more apt to go out and spend my money to enter an official group focused on security rather than on a subject like Innuendo, etc.

Social Engineer - June 9, 2012, 10:08 am

HJT is already based around Security and seems to be doing a really good job.

Coding could be considered an option as there isn't a coding group, however not something I'd be interested in.

eWhoring group would be interesting, something I would be interested in since it could be considered social engineering.

Tutorials, Don't all groups do that already, What would the tutorials be based on anyway, Quite a wide range.

Trolls - Low Quality, Nope.

News - Could be interesting but you would need to keep a small number of members due to the News section being spammed.

Music - Interesting but no real point of discussion or contribution.

Money Making, Quite a few already revolve around this, such as Marketers and Illuminati.

So in my opinion ewhoring would be something I would be interested in, could be a little biased though due to my interests.

NoteMEdown - June 9, 2012, 10:12 am

I would love to see an innuendo group :P

I would join so fast :P

Renowned - June 9, 2012, 12:18 pm

I think Techsperts should remain Techsperts. Go and do what the name suggests.

Candyshop - June 9, 2012, 12:30 pm

I chose coding, money making, and tutorials.

Mahdy - June 9, 2012, 12:32 pm

From experience, I already know there's way too many people ewhoring. Unless you guys are extremely good at it and would like to give the new users who are attempting to make some money some advice, go to Coding or security.

Techsperts - the name suggests all... coding and tutorials and a small touch of other things

Darkwin - June 9, 2012, 4:24 pm

Why not just try to be different from the rest of the groups and dedicate to the Shopping/Music/Hardware areas? For example assisting members by putting together parts for a build or finding awesome tech deals maybe even encourage members to buy certain products and do video reviews? etc. The group name is 'TechSperts' afterall, just my opinion... Mostly everything on the poll has been done.

Agreed with this one too. I had the same idea too , why don't we go back to what Techsperts was when it was run by Rated R Superstar ?

Tangy - June 9, 2012, 9:37 pm

I though Techsperts were all about technology? I liked that period where you had people posting tutorials and reviews on products. I thought that was a great idea, too bad it stopped for some reason. I would love to see this reviewing come back, do a review on everything, sites, other forums, technology, booters, e-books. Anything you can think of.

Top - June 9, 2012, 9:47 pm

To people saying that Techsperts is about technology:
The name of the group can be changed by Positive.

samrokzz - June 9, 2012, 10:12 pm

i think coding and tutorial will be good for this group

Remorsal - June 9, 2012, 10:27 pm

If you were to change it, make it unique. Yes, people have thought about plans of a music group, but how many have really gotten to it?Showing a video/mic recording of what they can do.

Showing a sort of real singing/musical talent.

Extremely respectable in any kind of music genre.

Helping others with criticism with their recordings.

I honestly think this would be new, and extremely different. Sounds odd, but if you think in-depth it could be pretty nice.

Mike' - June 10, 2012, 7:30 am

I think moving into Security, Coding and Tutorials related to those would be an amazing move.

Nostre - June 10, 2012, 7:49 am

antigrav - June 10, 2012, 7:06 pm

Maybe hardware experts? "Techsperts" doesn't sound like much of a music/GFX group...

Hardware/Security are the only things that really fit the name imo. Maybe you guys could be a group dedicated to things like building computers and stuff! Make tutorials and help people out with build etc.

What do you mean by "Not a lot of people liked the way we just did work that was not accounted for."

And personally, I would be very disappointed with a music group. It is your group, but this is not a music forum. There is one tiny sub forum on this entire site that is dedicated to music. In my whole hearted opinion, I don't feel that music is the focus that you want to bring on a group that belongs on a site where no one really comes because of music.

If that is your choice, all the luck in the world to ya, but in my opinion, I'd review some other options before you go down that path.

EDIT: I don't mean to come off as a dick at all, I wasn't sure if I was too harsh on this post. But I did just do a review of all 13 pages of the 'New Posts' today on HF and I saw 2 of them involving music (out of I believe 130).

You seem like a good guy, and with this much potential with a group ready for change I think you could really do some awesome stuff. I'd love to talk to you about what you really want out of the group and maybe throw out some more suggestions.

Vouch for techsperts

best group eva

RootKing - June 12, 2012, 12:02 am

What the Techsperts should be about is in there name, I think the group would benefit by not following suit to so many other groups. I think If your a Techspert you should have news articles going out about the newest technology, how to fix a problem, also Security that's a great part in stead of Cracking; what about Prevention Techniques; how to protect your system and what to look for methods, how to build your own Firewall from old computer parts, Coding would be great to teach people how to code or if anything a keep it easy style, and Keep the Tech very broad, i.e. Cell Phones, Tablets, Network Hardware, VoIP, Computers, Cloud Computing, Database engineering, GPU talk, CPU talk, and anything about Tech and how to improve upon it.

This is my opinion and I hope it helps.

Scooter - June 12, 2012, 12:13 pm

We should be tutorial-oriented in which only the best tutorials are posted in the subforum. Any old tutorials/shitty ones get deleted. Also, there should be no Post/PM me crap in the subforum, as only trustworthy members should be let in.

Tay - June 12, 2012, 12:19 pm

Either what Scooter said above, or a music group.

Honestly everything in the poll has been done before besides the music idea.

Each group aims at making tutorials, whether it's gaming, coding, webmaster, etc.

I feel like a music group would be a great idea, but I don't see how it could be effective. I guess it would just be a group to discuss things, maybe even produce music?

Edit: I guess some of the other ideas in the poll haven't been done, but I still think music is the best.

webdev77 - June 12, 2012, 12:31 pm

I think that the group should focus on security and real programming tutorials, not ones that show how to make a crypter or certain program, but actually the basics of languages and how to use the different classes/structures/methods/properties.
