Thread: [? Caller ID Spoofer ? Spoof your number to any number! ? \[CHEAP - LIFETIME\]?](#)

0dayleet - June 9, 2012, 11:07 am

I'm a reseller of this product, if you are wondering how this products works, it's basically the same principle as Spoof Card but in a one time fee; you pay for the software one time and you can spoof unlimited times.

Please just look at the screen shot to have an idea on how it works.

This works with home phone & cellphones. The software needs to be running on a Windows OS computer.

LIFETIME & ANY CARRIER AS LONG AS THE NUMBERS DO EXISTS. You can use this with any device that is able to make a phone call.

Please take note that PayPal payments needs to be sent as a gift - TRUSTED MEMBERS ONLY.

Vouch test I just did for someone.

As you can see the number is 514 987 6543

"987 6543", referring to 987654321 which is a random number and not owned by me or anyone.

(These images ^ are taken from a 3rd party app I used to receive the call because when I took these screenshots I had broken my SIM Card and I couldn't use the default Phone app - Note that you do NOT need to have an app installed on your phone for this to work)

Some vouch:

I guess you didn't read my thread but I mentioned that I am not giving any vouch copies. I can do
VOUCH test, which is calling the number of your choice with the number you want me to.

Unless you got something that is equivalent to the \$15 price of this product in exchange, no vouch
copy, only vouch test. Sorry!

This actually works with your OWN phone, so just install something that is able to record the calls or just put it on speaker mode?

Had my comment removed LOL.

So what advantage does this provide over the site I posted? It doesn't have too much it can do yet. Not sales trashing, but there are other products out there like this.

So basically, I want to see why this is worth my money.

Features:

Unlimited calls

Direct support if you are having problems

Works with every device capable of calling

Lifetime

Cheap ONE time payment of \$15

Easy to use software, you just need to input 3 numbers.

You can use your home phone number, the recipient won't see your real number.

You can only spoof existing numbers else the carrier wouldn't be able to make the connection between you too and send the data.

Meaning the number needs to be in this format: 111-222-3333

It doesn't work with Australia, no you need to call a number that will be generated by the software itself and it will spoof your number and directly call the person's number you typed in the software.

Hmmm alright, I don't really care about what you've seen around here buddy ?.

Don't buy it from me if you don't want quality.

Odayleet - October 6, 2012, 10:21 am

Bump, still for sale - next person that buys it will have it for \$10.

LiveSupport - October 6, 2012, 10:30 am

i have like 5lr left if that well do hit me up :P

Claimsocmedia - October 6, 2012, 10:38 am

Thank you, glad to hear! :D

Ku?s?h? - October 7, 2012, 1:31 pm

So how does this work? Do you get the call onto your phone or do you use a mic?...

Odayleet - October 7, 2012, 6:49 pm

You need to call a number in order to have your Caller ID spoofed and it will connect and call the recipient you typed in the software.

Odayleet - March 3, 2013, 11:12 am

Bumping this thread, I am still selling this and the next person to PM me will get it for \$10 instead of \$15 so as soon as you see this feel free to send me a Private Message :D.

Funny thing is, you're a fucking moron because it isn't the same program and you have no idea what's behind my software, you are talk shitting just by looking at the GUI.

Now gtfo with your sales trashing, kid.

DarkComet™ - March 10, 2013, 7:51 pm

are you still selling this sir? If so, i PM'd you :)

District. - March 10, 2013, 7:55 pm

There are many free apps for android that do this O.O
