Thread: [AA Weekly Poll #12: What do you use to watch your anime?](#)

Angel Beats! - June 9, 2012, 11:40 am

Hae AA, it's time for our weekly poll. For this one you are choosing which device you use to watch your anime!

[Last week's poll results:](#)

You guys are most attracted to Yuri rather than Yaoi, lolicon, shotacon, all, or nothing!

This week's poll: What do you use to watch the majority of your anime?

This poll is all about choosing the device you use to watch your anime. It's pretty straight forward. Here are your options:

Television

Laptop Computer

Desktop Computer

Phone/3-6 Inch Device

Tablet/7-10 Inch Device

Other

Feel free to leave a comment as to why you picked what you picked. This is not a debate thread. Poll is public and single choice only. Poll will close in 5 days.

Know a good poll topic? [PM me](#) or [PM Sp3ctr3](#) and your topic may (actually almost probably will, we're running out of ideas) be the next AA poll!

oneechan - June 9, 2012, 11:44 am

Desktop. Easier and I use it to download, so why not watch as well?

Would use the TV, but Streaming to 360 or something is a hassle. D:

Would use the TV, but Streaming to 360 or something is a hassle. D:

1. Download torrent directly to external hard drive

2. Plug in hard drive to 360

3. ????

4. Profit!

Will probably work on 360, idk, I use PS3. You might have to convert depending on what format you download in though.

Le shrug. I lot to keep my anime on a hard drive anyway, so I can use it on pretty much any of my devices, whether I'm online or offline.

Verts - June 9, 2012, 1:37 pm

Laptop. It's portable and still a decent size screen. If we could vote twice my second option would be my phone. iPhone is an excellent way to watch anime.

Rakshasa - June 9, 2012, 1:40 pm

Desktop, 24 inch monitor, 3 TB disk space.

Although if I had a tablet I'd probably be using it.

?aragon - June 9, 2012, 1:46 pm

I watch anime at my new 3D 47" tv :D

Wishes - June 9, 2012, 1:48 pm

Usually I use the projector, especially if it's a good series.

During daytime sometimes laptop for one or two ep max.

Your mum - June 9, 2012, 2:12 pm

I use a desktop running on Debian GNU Linux and thats basically all I use to do anything really. As for the clannad series I prefer to stream that due to there only being the one season and the after story season. Its easily available on the first page on Google but when I get unlimited bandwidth back I may download it. I've ordered Bleach season one and two to come which haven't arrived yet.

Corei3 - June 9, 2012, 2:17 pm

Television ftw... I can't stand watching it in a desktop monitor, too dam small QQ.

SIM-524734 - June 9, 2012, 2:22 pm

iPhone 4 for a year now ^^ . But, tablet is about to ship over ;)

Asphyx - June 9, 2012, 2:43 pm

I download to my external 2TB, then just have an extended screen running onto my big screen. It's always nice! (:

Sorun - June 9, 2012, 3:20 pm

I usually play it on my 52inch in 720p/1080p, but since it's broken T_T I just watch it on my kindle tab. It's a little more convenient but I miss 1080p big screen tv glorious master race quality.

Tarn - June 9, 2012, 3:30 pm

I use my laptop to download it and watch it on my iPod or iPhone.

Programmargorp - June 9, 2012, 4:31 pm

Desktop, the only thing i have besides a PSP, the PSP isn't fast enough to decode this on the fly or stream it off my hard drive so :x

KinGxKeV - June 9, 2012, 4:35 pm

I use my laptop cause my desktop is currently a piece of shit.

Dr Achtogonapus - June 9, 2012, 7:01 pm

Recently I've been using my Xbox to watch stuff on Hulu, Netflix, or the new anime app that came out on it. Otherwise I watch what I purchase, so physical copies, or I use my Kindle Fire. I would use my lap top but my audio jack shorted out.

?hadow - June 9, 2012, 7:18 pm

Laptop with an external monitor because my laptop resolution is too small for 1080p anime.

Prox - June 9, 2012, 7:31 pm

Laptop FTW. Idc how good your desktop is, nothing beats lying down in your bed with your laptop right there ^_^

Programmargorp - June 9, 2012, 7:32 pm

I watched anime with my desktop hooked up to a 42' tv before. It was pretty epic, esp in full screen mode.

Angel Beats! - June 9, 2012, 8:10 pm

Lying down sideways with a tablet in bed, you can't beat. You can't really turn a laptop sideways.

BlackMan Hacker - June 9, 2012, 8:54 pm

Dub: 70in flat screen HD

Sub: Htc Aria... rather shit, eat, swim, travel, walking with a small screen to watch sub easy on the

eyes

Lol, I have the HTC Aria as well! :P

bossy - June 9, 2012, 11:18 pm

i use the laptop, for me it's the best :D

2awesome4u - June 9, 2012, 11:52 pm

I use my desktop and my iPod for watching. But most of the time it's my desktop :P

~Para - June 10, 2012, 5:01 am

I use my laptop for the most part, so I can lay down at night on my bed and enjoy the darkness without straining my back sitting on my hard ass chair.

Speak - June 10, 2012, 6:22 am

I'll watch it on my desktop the most, but if I'm traveling it's my netbook

YERANUK - June 10, 2012, 3:03 pm

My computer, as the only reliable way to watch anime on a phone without using a hard drive external is streaming app.

I only have a 20gb space on phone and I rather not bloat it with anime, it would also require me to download LQ anime that is MP4..

Elfen Lied - June 10, 2012, 4:42 pm

I use my desktop mostly. Although I sometimes convert anime and watch it on my iPod when I go on holiday or something.

iMario - June 12, 2012, 10:17 am

I use my Desktop PC and sometimes my cellphone Sony Xperia. Also my parents laptop.

tomchez - June 12, 2012, 10:23 am

Mainly my laptop, but recently I've been plugging my laptop into the 40" TV with a HDMI cable to watch Anime.

Pikachu™ - June 12, 2012, 10:27 am

Stream various Anime from my laptop to my HDTV.

It's pretty nifty.
