Spreading Ways

Here I listed some great Spreading ways. They work perfectly and gave me more then 1000 downloads.

- Youtube, MyVideo, Clipfish

(Make a Video of a Fake program, and say it real Works. Simply bind your Server/Bot/Virus to the fake, Upload it on a hosting (example: www.mediafire.com) get the downloadlink and Paste it in the description of the Video. If you are Lucky, and the program seems legit, they will download and run it.

- Torrents

(Make a torrent in BitTorrent or utorrent, Register at #.org, and Upload it. Make sure the Server/Bot/Virus has a nice description, and it should Look legit. If you have Done all right, you will get a Ton of victims.

- Forums

This is a nice spreading method. If your Server is FUD (Fully undetectable),you will get many Victims.Of course you have to make some Pictures, or give some more details about the program you make a Thread about. (In this Situation its the Server.) just Say it is a cool Call of Duty 4 Modern Warfare 2 Keygen or something like that.)

- Java Driveby Site

(This is a free site you can make. The Victim just needs to go to the Site, and He is infected without Even Downloading something.)

- Online Chat Rooms

(This is a very powerful spreading method. Crypt your Server, name it "Sexy slideshow" and in the online Chat Room say its a slideshow and if you are Lucky they will download and you will get victims.)

- Facebook, MySpace etc

(Say you have uploaded very nice pics of you and give them the Download link.)

Some programs which can Spread your Server automatically.

Also i suggest you this RAT to Use

Blackshades NET

Blackshades NET requires a portforwarding but to be honest this is one of the best products that you can buy from them.

You can do the following things with Blackshades NET:

- Control several computers at once, performing tasks ranging from viewing their screens to uploading/downloading files from them
- Perform maintenance on a Network
- Help a client out by using the screen capture feature, even if they are on the other side of the world
- Monitor a specific PC, recording the keystrokes and remotely managing the files
- Access your computer that you have at home if you are on holiday
- Monitor the computers of students and their activity while teaching a computing lesson.

If you're interested in Steam accounts, origin, any etc... Just do the classic, go on any game and cheat, use aimbot Something that looks obvious like a cheat And most kids will be interested and just share your virus. Since most cheats are virus detected, had 21 hits of call of duty modern warfare 3 this friday, since Vac3 is down and any cheat can be used.

Yup, even Omni himself confirmed that the project isn't safe anymore.

Do you realize how old this is? And yes, except JDB's were patched with Java 7 and BlackShades is highly monitored by the Feds so you'll only want to use that if you're TRYING to get arrested. I suggest Luminosity Link (paid) or njRAT (free).

iROOT - October 31, 2015, 5:17 pm

Right, I also remember those lucky days... i dont know but do you remember when Liberty reserve was up and working? i bought BS Net in those days.. and when Blackshades changed to bshades.eu they limited the time of license.. but my license was made to lifetime as i had 1 of the earlier copies :D ? ?

Aaahhh what im say ? ... well lets see maybe someone make rat like that now a day... but whatever BShade was best with all of its features ?

Regulus - November 26, 2015, 3:47 pm

A mod should close this thread. No one should use Blackshades in my opinion.
