So they sent me an email the other day asking for two forms of identification. Problem is I'm on vacation and don't have access to such things, as they are back home. So is there anyway I could fake the info so I can just get my payout? Let me know below or feel free to PM me.

Thank you for you time. (:

Why dont you wait until you get home? And fuck sake how could you go on for a vacation without any personal informations, ID card or anything else?

Take the loss and try Uploaddee :P. Way better rates then Shitca\$h

unskulledman - June 14, 2012, 1:48 pm

or fileflare, awsome rates compared to shitcash ^^

He meant file-flare instead of "spam".

Does FF even have any payment proof yet? Is it conformed legitimate?

WishBone - June 15, 2012, 9:34 am

Yes they're legit. But none of the sites mentioned in this thread can compare to Filelce.

I've had problems with them.... I'm not giving them my SSN, so fuck their rates they can burn.

Agreed, i dont know why people put their full trust into FI. I'm not saying they aren't trusted, but who says one day they won't go bad.

Reticulum - June 15, 2012, 10:00 am

I wouldn't even give that kind of information to share cash.

Hah. You're missing out on earnings, bro. All major CPA companies require SSN, so you're fucked.

Reticulum - June 16, 2012, 9:00 pm

Its all good I have a personal method that's made me over a grand, fuck that cpa bullshit.

sonicfanrs - June 17, 2012, 1:09 pm

They're short and simple tax forms. And I don't think Share-cash requires you to be over 18. The only thing you should be wary about it putting your SSN; but I did it over a year ago, and received all earned money.

But now you'll have to pay taxes on your earnings; although, you would have supposed to anyways.
